SECTION I. INTRODUCTION

A. RISK FACTORS

Standard Risk Factors:

- a. Investment in mutual fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk, including the possible loss of principal.
- b. As the price / value / interest rates of the securities in which the Scheme invest fluctuates, the value of your investment in the Scheme may go up or down. In addition to the factors that affect the value of individual investments in the Scheme, the NAV of the Scheme can be expected to fluctuate with movements in the broader equity and bond markets and may be influenced by factors affecting capital and money markets in general, such as, but not limited to, changes in interest rates, currency exchange rates, changes in Governmental policies, taxation, political, economic or other developments and increased volatility in the stock and bond markets.
- c. Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme.
- d. The name of the Scheme does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- e. The Sponsors are not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs. 1 lakh made by it towards setting up the Mutual Fund.
- f. The present Scheme is not a guaranteed or assured return Scheme.

Additional Risk Factors for Foreign Investors:

I. Political Risk

Investments in mutual fund Units in India may be materially adversely impacted by Indian politics and changes in the political scenario in India either at the central, state or local level. Actions of the central government or respective state governments in the future could have a significant effect on the Indian economy, which could affect companies, general business and market conditions, prices and yields of securities in which the Scheme invest.

The occurrence of selective unrest or external tensions could adversely affect the political and economic stability of India and consequently have an impact on the securities in which the Scheme invests. Delays or changes in the development of conducive policy frameworks could also have an impact on the securities in which the Scheme invests.

II. Economic Risk

A slowdown in economic growth or macro-economic imbalances such as the increase in central and state level fiscal deficits may adversely affect investments in the country. The underlying growth in the economy is expected to have a direct impact on the volume of new investments in the country.

III. Foreign Currency Risk

The Scheme is denominated in Indian Rupees (INR) which is different from the home currency for Foreign Investors in the mutual fund Units. The INR value of investments when translated into home currency by Foreign Investors could be lower because of the currency movements. The AMC does not manage currency risk for foreign investors and it is the sole responsibility of the Foreign Investors to manage or reduce currency risk on their own. The Sponsor/Fund/Trustees/AMC are not liable for any loss to Foreign Investors arising from such changes in exchange rates.

IV. Convertibility and Transferability Risk

In the event capital and exchange controls are imposed by the government authorities, it would prevent Foreign Investors' ability to convert INR into home currency and/or transfer funds outside

India. The convertibility and transferability of INR proceeds into home currency is the responsibility of the Foreign Investors.

Scheme Specific Risk Factors

The Scheme is subject to the principal risks described below. Some or all of these risks may adversely affect the Scheme's NAV, yield, return and/or its ability to meet its objective.

a. Market Risk

The NAV of the Scheme will react to the securities market movements. The Investor may lose money over short or long periods due to fluctuation in the Scheme's NAV in response to factors such as economic, political, social instability or diplomatic developments, changes in interest rates and perceived trends in stock prices, market movements and over longer periods during market downturns. Investments may be adversely affected by the possibility of expropriation or confiscatory taxation, imposition of withholding taxes on Income Distribution cum Capital Withdrawal or interest payments, limitations on the removal of funds or other assets of the Scheme. The Scheme may not be able to immediately sell certain types of illiquid Securities. The purchase price and subsequent valuation of restricted and illiquid Securities may reflect a discount, which may be significant, from the market price of comparable Securities for which a liquid market exists.

b. Market Trading Risks

- **Absence of prior active market:** Although the Scheme is listed on NSE/BSE, there can be no assurance that an active secondary market will develop or be maintained. Hence there would be time when trading in the Units of the Scheme would be infrequent.
- **Trading in units may be halted:** Trading in the Units of the Scheme on NSE/BSE may be halted because of market conditions or for reasons that in view of NSE/BSE or SEBI, trading in the Units of the Scheme are not advisable. In addition, trading of the Units of the Scheme are subject to trading halts caused by extraordinary market volatility and pursuant to NSE/BSE and SEBI 'circuit filter' rules. There can be no assurance that the requirements of NSE/BSE necessary to maintain the listing of the Units of the Scheme will continue to be met or will remain unchanged.
- **Lack of market liquidity:** The Scheme may not be able to immediately sell certain types of illiquid Securities. The purchase price and subsequent valuation of restricted and illiquid Securities may reflect a discount, which may be significant, from the market price of comparable Securities for which a liquid market exists.
- **Units of the scheme may trade at prices other than NAV:** The Units of the Scheme may trade above or below their NAV. The NAV of the Scheme will fluctuate with changes in the market value of the holdings of the Scheme. The trading prices of the Units of the Scheme will fluctuate in accordance with changes in their NAV as well as market supply and demand for the Units of the Scheme. However, given that Units of the Scheme can be created and Redeemed in Creation Units directly with the Fund, it is expected that large discounts or premiums to the NAV of Units of the Scheme will not sustain due to arbitrage opportunity available.
- **Regulatory Risk:** Any changes in trading regulations by NSE/BSE or SEBI may affect the ability of market maker to arbitrage resulting into wider premium/discount to NAV.
- **Reinvestment Risk:** This risk refers to the interest rate levels at which cash flows received from the Securities in the Scheme are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.
- **Risk of substantial redemptions:** Substantial Redemptions of Units within a limited period of time could require the Scheme to liquidate positions more rapidly than would otherwise be

desirable, which could adversely affect the value of both the Units being Redeemed and that of the outstanding Units of the Scheme.

Regardless of the period of time in which Redemptions occur, the resulting reduction in the NAV of the Scheme could also make it more difficult for the Scheme to generate profits or recover losses. The Trustee, in the general interest of the Unit holders of the Scheme offered under this SID and keeping in view of the unforeseen circumstances/unusual market conditions, may limit the total number of Units which can be redeemed on any Working Day depending on the total "Saleable Underlying Stock" available with the Fund.

c. Redemption Risk

Investors may note that even though the Scheme is an open-ended Scheme, the Scheme would ordinarily repurchase Units in Creation Unit size. Unit holdings less than the Creation Unit size can only be sold through the secondary market on the Exchange unless no quotes are available on the NSE/BSE for 5 trading days consecutively.

d. Asset Class Risk

The returns from the types of Securities in which the Scheme invests may underperform returns of general Securities markets or different asset classes. Different types of Securities tend to go through cycles of out-performance and under-performance in comparison of Securities markets.

e. Risks Associated with Investing in Money Market Securities

• **Interest Rate Risk**

Changes in interest rates will affect the Scheme's NAV. The prices of Securities usually increase as interest rates decline and usually decrease as interest rates rise. The extent of fall or rise in the prices is guided by duration, which is a function of the existing coupon, days to maturity and increase or decrease in the level of interest rate. The new level of interest rate is determined by the rate at which the government raises new money and/or the price levels at which the market is already dealing in existing Securities. Prices of long-term Securities generally fluctuate more in response to interest rate changes than short-term Securities.

In case of TRI-PARTY REPO, the rate of interest, from time to time, depends upon the number of borrowers at that point of time and the amount to be borrowed by such borrowers.

In the case of Floating Rate Instruments, an additional risk could be due to the change in the spreads of Floating Rate Instruments. If the spreads on Floating Rate Instruments rise, then there could be a price loss on these instruments. Debt markets, especially in developing markets like India, can be volatile leading to the possibility of price moving up or down in fixed income Securities and thereby to possible movements in the NAV.

• **Prepayment Risk**

A borrower may prepay a receivable prior to its due date. This may result in a change in the yield and tenor for the Scheme.

• **Liquidity or Marketability Risk**

This refers to the ease at which a Security can be sold at or near its true value. The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. Liquidity risk is characteristic of the Indian fixed income market. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the Scheme. Different segments of the Indian financial markets have different settlement periods and such period may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of Securities. As liquidity of the investments made by the Scheme could, at times, be restricted by trading volumes and settlement periods, the time

taken by the Fund for Redemption of Units may be significant in the event of an inordinately large number of Redemption requests or restructuring of the Scheme.

- **Credit Risk**

Credit Risk means that the issuer of a Security may default on interest payments or even paying back the principal amount on maturity (i.e. the issuer may be unable to make timely principal and interest payments on the Security). Even where no default occurs, the prices of Security may go down because the credit rating of an issuer goes down. However, it must be noted that where the Scheme has invested in Government Securities, the risk of default is lower.

- **Rating Migration Risk**

Fixed income securities (excluding government securities) are exposed to rating migration risk, which could impact the price on account of change in the credit rating. For example: One notch downgrade of a AAA rated issuer to AA+ will have an adverse impact on the price of the security and vice-versa for an upgrade of a AA+ issuer.

- **Re-investment Risk:** The investments made by the Scheme are subject to reinvestment risk. This risk refers to the interest rate levels at which maturity proceeds & cash flows received from the securities in the Scheme are reinvested. The risk is that the rate at which these cash flows can be reinvested may be lower than that originally assumed.

- f. **Calculation of NAV**

From time to time, materiality thresholds may apply in so far as it relates to errors in the calculation of NAV in accordance with SEBI Regulations. Unit holders should note that the AMC may not pay the Unit holders or the Scheme the amount of any difference in circumstances where any such materiality thresholds provided under SEBI Regulations are not exceeded. Therefore such differences may lead to a different economic result than if such amounts were paid and such errors, which are deemed to be immaterial, will not lead to a reissued and corrected NAV.

As a result, Investors/ Unit holders who have Subscribed for or Redeemed Units of the Scheme on a day on which the materiality thresholds had been applied, the Investors / Unit holders may receive a different economic result than they would have received had the error in calculation of the NAV not happened.

- g. **Risk of Changes in Borrowing Rates**

The Scheme may borrow funds on a temporary basis within the limits set forth under the SEBI Regulations. The Scheme may choose to only borrow from the Custodian of the Scheme, and the borrowing rate imposed by the Custodian of the Scheme may change due to market conditions. As a consequence thereof, the borrowing rates imposed by the Custodian may not be the most competitive.

- h. **Uncertain Tax Positions**

Prospective Investors should be aware that tax Laws and regulations are constantly changing and that they may be changed with retrospective effect. Moreover, the interpretation and application of tax Laws and regulations by certain tax authorities may not be clear, consistent or transparent. As a result of uncertainty relating to the Fund's potential tax liabilities, including on any historical realized or unrealized gains, as well as liabilities that may arise as a result of investments made by the Scheme which have not reflected tax liabilities in their valuation, the NAV of the Scheme on any dealing day may not accurately reflect such liabilities (including those that are imposed with retrospective effect). In addition, the NAV of the Scheme on any dealing day may reflect an accrual for potential tax liabilities that may subsequently not be paid. Accounting standards may also change, creating an obligation for the Fund to accrue for a potential tax liability that was not previously required to be accrued or in situations where the Fund does not expect to be ultimately subject to such tax liability.

In the event that the Fund subsequently determines to accrue for tax liabilities and/or is required to pay amounts relating to tax liabilities that had not previously been accrued and/or any Scheme investments result in tax liabilities that were not reflected in their valuation (including historic investments), the amount of any such determination or payment will generally be allocated among the Unit holders of the applicable Scheme at the time of such determination or payment, rather than when the income or transaction to which such taxes relate was earned or occurred. Moreover, in the event that the Fund subsequently determines that an accrual for potential tax liabilities exceeds or will exceed the liability for such taxes, the benefit from any such determination will generally be allocated among the Unit holders of the applicable Scheme at the time of such determination, rather than when the income or transaction in respect of which such taxes were accrued was earned or occurred, and Unit holders who previously Redeemed Units of the Scheme will not receive additional compensation or otherwise share such benefit. Unit holders will not be notified of any of the foregoing determinations or payments.

Unit holders that invest in the Units of a Scheme at a time during which any liabilities for taxes are not accrued will invest in the Units of the Scheme at a higher NAV than such Unit holders would have invested had such liabilities been accrued at the time of the applicable investment. In addition, the returns of the Scheme may be considered to have been subject to an inadvertent leverage effect in that those additional assets would have been invested in accordance with the usual investment policy of the Scheme. On the other hand, Unit holders that Redeem Units of a Scheme at a time during which potential liabilities for taxes are accrued will Redeem Units of the Scheme at a lower NAV than if such liabilities had not been accrued at the time of the applicable Redemption. In that situation the Scheme may also be considered to have been subject to an inadvertent under investment effect if that accrual of taxes is not subsequently paid.

i. Stable NAV Risk

The Scheme may not be able to maintain a stable NAV at all times. Unit holders of the Scheme should not rely on or expect the AMC or an affiliate to purchase distressed assets from the Scheme, make capital infusions into the Scheme, enter into capital support agreements with Scheme / AMC or take other actions to help the Scheme maintain a stable NAV.

The Scheme is designed such that the Fund / AMC will seek to use, reasonable endeavors to maintain the NAV at a fixed value by distributing income from the Scheme as it arises. However, please be aware that there is always a risk that an underlying issuer could default or otherwise be subject to an impairment of credit quality such that the value ascribed to that Security may also be impaired. In these circumstances, the Fund / AMC will be unable to maintain the NAV of the Scheme at a fixed value and it is likely in that event, that a loss of capital will occur. Such loss of capital could be material and sudden.

j. Tracking error & Tracking Difference Risk

“Tracking Error” is defined as the standard deviation of the difference between daily returns of the underlying index and the daily returns of the scheme.

“Tracking Difference” is the annualized difference of daily returns between the Index and the NAV of the scheme (difference between fund return and the index return).

Tracking Error & Tracking Difference may arise including but not limited to the following reasons:

- i. Expenditure incurred by the fund.
- ii. The holding of a cash positions. The fund may not be invested at all time as it may keep a portion of the funds in cash to meet redemptions
- iii. The fund will deploy available funds into TRI-PARTY REPO at various points during the day, which may differ from weighted average rate published by CCIL at end of the day (considered for index return computation)
- iv. Execution of large buys / sell orders

- v. Transaction cost
- vi. Realization of Unit holders funds

RISK MANAGEMENT STRATEGIES

DSPIM is committed to a strong control and compliance environment and ensuring that the management structure is appropriate to the scale of the business. DSPIM's fiduciary business is managed according to the rules and a regulation stipulated for Asset Management Companies by the Securities & Exchange Board of India (SEBI) and also incorporates DSPIM's internal policies.

The AMC has systems and processes to monitor all the investment restrictions specified by SEBI and in this document on a regular basis.

- **Liquidity Risk:**

The liquidity risk will be managed and/or sought to be addressed by creating a portfolio which has adequate access to liquidity. The Investment Manager will select securities, which have or are expected to have high secondary market liquidity.

- **Credit Risk:**

Credit Risk associated with Fixed Income securities will be managed by making investments in securities issued by borrowers, which have a very good credit profile, based on thorough due diligence and research done by the in-house credit research team. There are defined limits for each of the issuer (other than government of India); these limits are for the amount as well as maximum permissible tenor for each issuer. The credit process ensures that issuer level review is done at inception as well as periodically by taking into consideration the balance sheet and operating strength of the issuer.

- **Term Structure of Interest Rates (TSIR) Risk:**

The Investment Manager will endeavor to actively manage the duration based on the ensuing market conditions. As the fixed income investments of the Scheme are generally very short duration in nature, the risk can be expected to be small.

- **Rating Migration Risk:**

The endeavor is to invest in high grade/quality securities. The due diligence performed before assigning credit limits should mitigate company-specific issues.

- **Re-investment Risk:**

Re-investment Risk is prevalent for fixed income securities, but as the fixed income investments of the Scheme are generally short duration in nature, the impact can be expected to be small.

It may be noted that no prior intimation/indication will be given to investors when the composition/asset allocation pattern under the Scheme undergoes changes within the permitted band as indicated above.

CHANGE IN INVESTMENT PATTERN

The AMC would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Since the scheme is an exchange traded fund, it will endeavor to replicate the index.

In the event of the asset allocation falling outside the limits specified in the asset allocation table, the Fund Manager will rebalance the same within 7 days.

E. WHAT IS THE INVESTMENT STRATEGY?

All investments of the Scheme would be in Tri-Party REPO, Repo in Government Securities, Reverse Repos and similar other overnight instruments and other Money Market Instruments.

RISK CONTROL

Investments made by the Scheme would be in accordance with the investment objective of the Scheme and provisions of SEBI Regulations. Since the investing requires disciplined risk management, the AMC has adequate safeguards for controlling risk in the portfolio construction process. The risk control process involves reducing risk through portfolio diversification wherever possible, taking care however not to dilute the returns in the process. It is the belief of the AMC that the diversification would help to achieve desired level of consistency in returns.

CHANGE IN INVESTMENT PATTERN

The AMC retains the flexibility to invest across all Securities/instruments as mentioned in its asset allocation pattern such as Tri-Party REPO, Repo in Government Securities, Reverse Repos and similar other overnight instruments and other Money Market Instruments.

PORTFOLIO TURNOVER

Portfolio turnover is the term used by the Fund for measuring the amount of trading that occurs in a Scheme's portfolio during a specified period of time. The Scheme is an open ended Scheme. It is therefore expected that there would be a number of Subscriptions and Redemptions on a daily basis. There may be frequent transaction to buy and sell the Securities resulting in increase in transaction cost. At the same time frequent transactions may increase the profits and which can offset the increase in cost. Consequently, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio. However, the Fund Manager will endeavour to optimize the portfolio turnover to minimize risk and maximize gains while keeping in mind the cost associate with

such transaction.

Portfolio turnover for a liquid ETF is the average maturity period of the securities held by such scheme.

F. FUNDAMENTAL ATTRIBUTES

Following are the fundamental attributes of the Scheme, in terms of Regulation 18(15A) of the SEBI Regulations:

G. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE?

The Trustees have adopted the Nifty 1D Rate Index TRI as the benchmark index.

The investments would be made as per investment objective in Tri-Party REPO, Repo in Government Securities, Reverse Repos and similar other overnight instruments and other Money Market Instruments. Thus, the benchmark is currently the only reference able index for the Scheme as no more appropriate benchmark is currently available. It should therefore be noted that the composition of index could be materially different from the composition of the Scheme and the Scheme's performance is likely to differ from, and underperform, the benchmark.

A detailed review of the Scheme and the performance of the Scheme vis-à-vis the benchmark will be placed before the board of directors of AMC and Trustee on a quarterly basis.

In terms of SEBI Circular No. MFD/CIR/01/ 071/02 dated March 26, 2002, the board of directors of the AMC and Trustees may review the benchmark selection from time to time, and make suitable changes as to use of the benchmark or select an additional or replacement benchmark, or related to composition of the benchmark, whenever it deems necessary after recording an adequate

justification for carrying out such change. However, change of benchmark and/or selecting additional benchmarks would be done in compliance with the relevant guidelines of SEBI in this regard.

The Fund Manager will bring to the notice of the board of directors of the AMC, specific factors if any, which are impacting the performance of the Scheme. The board of directors of the AMC on consideration of all relevant factors may, if necessary, give appropriate directions to the AMC. Similarly, the performance of the Scheme will be submitted to the Trustees. The Fund Manager / Chief Investment Officer will explain to the Trustees, the details on the Scheme's performance vis-à-vis the benchmark returns.
