Portfolio has 0.44% exposure to interest Rate Swaps.

This scheme has exposure to interest rate derivatives. The duration of these instruments is linked to the interest rate reset period. The interest rate risk in a floating rate instrument or in a fixed rate instrument hedged with derivatives is likely to be lesser than that in an equivalent maturity fixed rate instrument. Under some market circumstances the volatility may be of an order greater than what may ordinarily be expected considering only its duration. Hence investors are recommended to consider the unadjusted portfolio maturity of the scheme as well and exercise adequate due diligence when deciding to make their investments.

RP - Regular Plan

Note:

- All returns are for Regular Plan - Growth Option. Except DSP Flexi Cap Fund.
- Past performance may or may not be sustained in future and should not be used as a basis for comparison with other investments.

The returns are calculated by XIRR approach assuming investment of ₹ 10,000/- on the 1st working day of every month. XIRR helps in calculating return on investments given an initial and final value and a series of cash inflows and outflows with the correct allowance for the time impact of the transactions. Load is not taken into consideration for computation of performance.

DSPBEF is managed by Atul bhole, Abhishek Ghosh and Vikram Chopra ('Fund Managers'). Since the orientation & feature of DSPBEF is different from all other schemes managed by Fund Managers, hence the SIP performances of other schemes managed by Fund Managers (except DSP Flexi Cap Fund) are not shown. Similarly, DSPNRNEF is managed by Rohit Singhania, Jay Kothari. SIP performances are shown for all open ended equity oriented Schemes (except DSP Arbitrage Fund) managed by Rohit Singhania and/or Abhishek Singh. Since the orientation & feature of DSPNRNEF is different from FOF schemes managed by Jay Kothari, the SIP performances of FOF schemes managed by Jay Kothari are not shown. For performance of all schemes in SEBI prescribed format please refer page 46-63.

Disclaimer: The above investment simulation is for illustrative purposes only and should not be construed as a promise on minimum returns and safeguard of capital. The AMC / Mutual Fund is not guaranteeing or promising or forecasting any returns. SIP does not assure a profit or guarantee protection against a loss in a declining market.

*With effect from April 1, 2020, all lumpsum investments/subscriptions including all systematic investments in units of the Scheme is accepted. For performance in SEBI format refer page no. 46 - 63 of the factsheet. The alpha of the funds is calculated with their respective benchmarks for all years. The total count of alpha and positive alpha is then calculated for all the years. The percentage of positive alpha over total count of alpha is then calculated at the end. The document indicates the strategy/investment approach currently followed by the Schemes and the same may change in future depending on market conditions and other factors. Large Cap: 1st -100th company in terms of full market capitalization Mid Cap: 101st -250th company in terms of full market capitalization Small Cap: 251st company onwards in terms of full market capitalization. Past performance may or may not be sustained in future and should not be used as a basis for comparison with other investments. The document shall be read alongwith the Factsheet only. *Income Distribution cum Capital Withdrawal

For performance in SEBI format refer page no. 46 - 63 of the factsheet. The alpha of the funds is calculated with their respective benchmarks for all years. The total count of alpha and positive alpha is then calculated for all the years. The percentage of positive alpha over total count of alpha is then calculated at the end. The document indicates the strategy/investment approach currently followed by the Schemes and the same may change in future depending on market conditions and other factors. Large Cap: 1st -100th company in terms of full market capitalization Mid Cap: 101st -250th company in terms of full market capitalization Small Cap: 251st company onwards in terms of full market capitalization. Past performance may or may not be sustained in future and should not be used as a basis for comparison with other investments. The document shall be read alongwith the Factsheet only.
*Income Distribution cum Capital Withdrawal
Note : The AMC has stopped accepting subscription in the scheme. for more details refer addendum dated february 01, 2022 available on www.dspim.com for DSP Global Allocation Fund, DSP US Flexible Equity Fund, DSP World Agriculture Fund, DSP World Energy Fund, DSP World Gold Fund and DSP World Mining Fund.

Interest Rate Risk ↓			
Relatively Low (Class I)	-	-	-
Moderate (Class II)	-	-	-
Relatively High (Class III)	A-III	-	-

HOW TO READ A FACTSHEET

Fund Manager

An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

Application Amount for Fresh Subscription

This is the minimum investment amount for a new investor in a mutual fund scheme.

Minimum Additional Amount

This is the minimum investment amount for an existing investor in a mutual fund scheme.

Yield to Maturity

The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

SIP

SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests Rs 500 every 15th of the month in an equity fund for a period of three years.

NAV

The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

Benchmark

A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE200, BSE500, 10-Year Gsec.

Entry Load

A mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent. Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is Rs. 100 and the entry load is 1%, the investor will enter the fund at Rs 101.

Note: SEBI, vide circular dated June 30, 2009 has abolished entry load and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributors.

Exit Load

Exit load is charged at the time an investor redeems the units of a mutual fund. The entry load is added to the prevailing NAV at the time of redemption. For instance, if the NAV is Rs 100 and the exit load is 1%, the investor will redeem the fund at Rs 99.

Modified Duration

Modified duration is the price sensitivity and the percentage change in price for a unit change in yield.

Standard Deviation

Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.

Sharpe Ratio

The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

Beta

Beta is a measure of an investment's volatility vis-à-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

AUM

AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.

Holdings

The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature of Scheme

The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

Rating Profile

Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.

Total Return Index

Total return index calculation considers the actual rate of return of an investment or a pool of investments over a given evaluation period. Total return includes interest, capital gains, IDCW*s and distributions realized over a given period of time.

Alpha

Alpha is the excess return on an investment, relative to the return on a benchmark index.

CAGR

CAGR (Compound Annual Growth Rate) is the annual rate of return on an investment over a specified period of time, assuming the profits were reinvested over the investment's lifespan.
