SECTION I - INTRODUCTION

A. RISK FACTORS

Standard Risk Factors:

- Investment in mutual fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk, including the possible loss of principal.
- As the price / value / interest rates of the securities in which the Scheme invest fluctuates, the value of your investment in the Scheme may go up or down. In addition to the factors that affect the value of individual investments in the Scheme, the NAV of the Scheme can be expected to fluctuate with movements in the broader equity and bond markets and may be influenced by factors affecting capital and money markets in general, such as, but not limited to, changes in interest rates, currency exchange rates, changes in Governmental policies, taxation, political, economic or other developments and increased volatility in the stock and bond markets.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme.
- The name of the Scheme does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The Sponsors are not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs. 1 lakh made by it towards setting up the Mutual Fund.
- The present Scheme is not a guaranteed or assured return Scheme.

Additional Risk Factors for Foreign Investors:

1. Political Risk

Investments in mutual fund Units in India may be materially adversely impacted by Indian politics and changes in the political scenario in India either at the central, state or local level. Actions of the central government or respective state governments in the future could have a significant effect on the Indian economy, which could affect companies, general business and market conditions, prices and yields of securities in which the Scheme invest.

The occurrence of selective unrest or external tensions could adversely affect the political and economic stability of India and consequently have an impact on the securities in which the Scheme invests. Delays or changes in the development of conducive policy frameworks could also have an impact on the securities in which the Scheme invests.

2. Economic Risk

A slowdown in economic growth or macro-economic imbalances such as the increase in central and state level fiscal deficits may adversely affect investments in the country. The underlying growth in the economy is expected to have a direct impact on the volume of new investments in the country.

3. Foreign Currency Risk

The Scheme is denominated in Indian Rupees (INR) which is different from the home currency for Foreign Investors in the mutual fund Units. The INR value of investments when translated into home currency by Foreign Investors could be lower because of the currency movements. The AMC does not manage currency risk for foreign investors and it is the sole responsibility of the Foreign Investors to manage or reduce currency risk on their own. The Sponsor/Fund/Trustees/AMC are not liable for any loss to Foreign Investors arising from such changes in exchange rates.

4. Convertibility and Transferability Risk

In the event capital and exchange controls are imposed by the government authorities, it would prevent Foreign Investors' ability to convert INR into home currency and/or transfer funds outside India. The convertibility and transferability of INR proceeds into home currency is the responsibility of the Foreign Investors.

Scheme Specific Risk Factors

DSP world Mining Fund ('DSPWMF') intends to predominantly invest in BlackRock Global Funds - World Mining Fund ('BGF - WMF' / 'BGF - World Mining Fund'). The Scheme may also invest, at the discretion of the Investment Manager, in the units of other similar overseas mutual fund scheme, which may constitute a significant part of its corpus, and a certain portion of its corpus in the liquid schemes of DSP Mutual Fund. Hence scheme specific risk factors of such underlying schemes will be applicable. All risks associated with such schemes, including performance of their underlying stocks, derivative instruments, stock-lending, offshore investments etc., will therefore be applicable in the case of the Scheme. Investors who intend to invest in the Scheme are required to and deemed to have understood the risk factors of the underlying schemes.

DSPWMF shall endeavor to track the performance of the respective underlying funds subject to foreign exchange movement, total expense ratio and returns from investments made in money market securities or units of money market/ liquid schemes of DSP Mutual Fund.

Risk associated with underlying BGF scheme:

- **Liquidity Risk on account of investments in international funds:** The liquidity of the Scheme's investments may be inherently restricted by the liquidity of the underlying schemes in which it has invested.
- **Expense Risks associated with investments in international funds:** The Investors shall bear the recurring expenses of the Scheme in addition to those of the underlying schemes. Therefore, the returns that they may receive may be materially impacted or may, at times, be lower than the returns that the investors directly investing in the underlying schemes could obtain.
- **Portfolio Disclosure Risks associated with investments in international funds:** The disclosures of portfolio for the Scheme will be limited to the particulars of the underlying schemes and money market securities where the Scheme has invested. Investors may, therefore, not be able to obtain specific details of the investments of the underlying schemes.
- **Investment Policy and/or fundamental attribute change risks associated with investments in international funds:** Any change in the investment policies or fundamental attributes of any underlying scheme is likely to affect the performance of the Scheme.

Special Risk Considerations related to BGF - WMF:

Investors must read these special risk considerations. This section contains explanations of some of the risks that apply to BGF - WMF.

- **Emerging Markets**

The following considerations, which apply to some extent to all international investments, are of particular significance in certain smaller and emerging markets. Funds investing in equities may include investments by BGF - WMF in certain smaller and emerging markets, which are typically those of poorer or less developed countries which exhibit lower levels of economic and/or capital market development, and higher levels of share price and currency volatility. The prospects for economic growth in a number of these markets are considerable and equity returns have the potential to exceed those in mature markets as growth is achieved. However, share price and currency volatility are generally higher in emerging markets.

Some governments exercise substantial influence over the private economic sector and the political and social uncertainties that exist for many developing countries are particularly significant. Another risk common to most such countries is that the economy is heavily export oriented and, accordingly, is dependent upon international trade. The existence of overburdened infrastructures and obsolete financial systems also presents risks in certain countries, as do environmental problems. Certain economies also depend to a significant degree upon exports of primary commodities and, therefore, are vulnerable to changes in commodity prices which, in turn, may be affected by a variety of factors.

In adverse social and political circumstances, governments have been involved in policies of expropriation, confiscatory taxation, nationalization, intervention in the securities market and trade settlement, and imposition of foreign investment restrictions and exchange controls, and these could be repeated in the future. In addition to withholding taxes on investment income, some emerging markets may impose different capital gains taxes on foreign investors.

Generally accepted accounting, auditing and financial reporting practices in emerging markets may be significantly different from those in developed markets. Compared to mature markets, some emerging markets may have a low level of regulation, enforcement of regulations and monitoring of investors' activities. Those activities may include practices such as trading on material non-public information by certain categories of investor.

The securities markets of developing countries are not as large as the more established securities markets and have substantially less trading volume, resulting in a lack of liquidity and high price volatility. There may be a high concentration of market capitalization and trading volume in a small number of issuers representing a limited number of industries as well as a high concentration of investors and financial intermediaries. These factors may adversely affect the timing and pricing of BGF - WMF's acquisition or disposal of securities.

Practices in relation to settlement of securities transactions in emerging markets involve higher risks than those in developed markets, in part because BGF - WMF will need to use brokers and counterparties which are less well capitalized, and custody and registration of assets in some countries may be unreliable. Delays in settlement could result in investment opportunities being missed if BGF - WMF are unable to acquire or dispose off a security. The custodian of BGF - WMF is responsible for the proper selection and supervision of its correspondent banks in all relevant markets in accordance with Luxembourg law and regulation.

In certain emerging markets, registrars are not subject to effective government supervision nor are they always independent from issuers. The possibility of fraud, negligence, undue influence being exerted by the issuer or refusal to recognise ownership exists, which, along with other factors, could result in the registration of a shareholding being completely lost. Investors should therefore be aware that BGF - WMF could suffer losses arising from these registration problems, and as a result of archaic legal systems BGF - WMF may be unable to make a successful claim for compensation.

While the factors described above may result in a generally higher level of risk with respect to the individual smaller and emerging markets, these may be reduced when there is a low correlation between the activities of those markets and/or by the diversification of investments within BGF - WMF.

Investments in Russia are currently subject to certain heightened risks with regard to the ownership and custody of securities. In Russia, this is evidenced by entries in the books of a company or its registrar (which is neither an agent nor responsible to the custodian of BGF - WMF). No certificates representing ownership of Russian companies will be held by the custodian of BGF - WMF or any correspondent or in an effective central depository system. As a result of this system and the lack of state regulation and enforcement, BGF - WMF could lose its registration and ownership of Russian securities through fraud, negligence or even mere oversight.

BGF - WMF, investing directly in local Russian stock, will limit their exposure to no more than 10% of their respective Net Asset Value, except for investment in securities listed on either the Russian Trading Stock Exchange or the Moscow Interbank Currency Exchange, which have been recognised as being regulated markets.

- **Sovereign Debt**

Certain developing countries are especially large debtors to commercial banks and foreign governments. Investment in debt obligations ("Sovereign Debt") issued or guaranteed by developing governments or their agencies and instrumentalities ("governmental entities") involves a high degree of risk. The governmental entity that controls the repayment of Sovereign Debt may not be able or willing to repay the principal and/or interest when due in accordance with the

terms of such debt. A governmental entity's willingness or ability to repay principal and interest due in a timely manner may be affected by, among other factors, its cash flow situation, the extent of its foreign reserves, the availability of sufficient foreign exchange on the date a payment is due, the relative size of the debt service burden to the economy as a whole, the governmental entity's policy towards the International Monetary Fund and the political constraints to which a governmental entity may be subject. Governmental entities may also be dependent on expected disbursements from foreign governments, multilateral agencies and others abroad to reduce principal and interest arrearage on their debt. The commitment on the part of these governments, agencies and others to make such disbursements may be conditioned on a governmental entity's implementation of economic reforms and/or economic performance and the timely service of such debtor's obligations. Failure to implement such reforms, achieve such levels of economic performance or repay principal or interest when due may result in the cancellation of such third parties' commitments to lend funds to the governmental entity, which may further impair such debtor's ability or willingness to service its debt on a timely basis. Consequently, governmental entities may default on their Sovereign Debt. Holders of Sovereign Debt, including BGF - WMF, may be requested to participate in the rescheduling of such debt and to extend further loans to governmental entities. There is no bankruptcy proceeding by which Sovereign Debt on which a governmental entity has defaulted may be collected in whole or in part.

- **Restrictions on Foreign Investment**

Some countries prohibit or impose substantial restrictions on investments by foreign entities such as BGF - WMF. As illustrations, certain countries require governmental approval prior to investments by foreign persons, or limit the amount of investment by foreign persons in a particular company, or limit the investment by foreign persons in a company to only a specific class of securities which may have less advantageous terms than securities of the company available for purchase by nationals. Certain countries may restrict investment opportunities in issuers or industries deemed important to national interests. The manner, in which foreign investors may invest in companies in certain countries, as well as limitations on such investments, may have an adverse impact on the operations of BGF - WMF. For example, BGF - WMF may be required in certain of such countries to invest initially through a local broker or other entity and then have the share purchases re-registered in the name of BGF - WMF. Re-registration may in some instances not be able to occur on a timely basis, resulting in a delay during which BGF - WMF may be denied certain of its rights as an investor, including rights as to IDCWs or to be made aware of certain corporate actions. There also may be instances where BGF - WMF place a purchase order but are subsequently informed, at the time of re-registration, that the permissible allocation to foreign investors has been filled, depriving BGF - WMF of the ability to make their desired investment at the time. Substantial limitations may exist in certain countries with respect to BGF - WMF's ability to repatriate investment income, capital or the proceeds of sales of securities by foreign investors. BGF - WMF could be adversely affected by delays in, or a refusal to grant any required governmental approval for repatriation of capital, as well as by the application to BGF - WMF of any restriction on investments. A number of countries have authorised the formation of closed-end investment companies to facilitate indirect foreign investment in their capital markets. Shares of certain closed-end investment companies may at times be acquired only at market prices representing premiums to their net asset values. If BGF - WMF acquires shares in closed-end investment companies, shareholders would bear both their proportionate share of expenses in BGF - WMF (including management fees) and, indirectly, the expenses of such closed end investment companies. BGF - WMF also may seek, at their own cost, to create their own investment entities under the laws of certain countries.

- **Smaller Capitalisation Companies**

Securities of smaller capitalisation companies may, from time to time, and especially in falling markets, become illiquid and experience short-term price volatility and wide spreads between bid and offer prices. Investment in smaller capitalisation companies may involve higher risk than investment in larger companies. The securities of smaller companies may be subject to more abrupt or erratic market movements than larger, more established companies or the market average in general. These companies may have limited product lines, markets or financial resources, or they may be dependent on a limited management group. Full development of those companies takes time. In addition, many small company stocks trade less frequently and in smaller

volume, and may be subject to more abrupt or erratic price movements than stocks of large companies. The securities of small companies may also be more sensitive to market changes than the securities of large companies. These factors may result in above-average fluctuations in the Net Asset Value of the shares of BGF - WMF.

- **Derivatives - General**

BGF - WMF may use derivatives to hedge market and currency risk, and for the purposes of efficient portfolio management. The use of derivatives may expose BGF - WMF to a higher degree of risk. In particular, derivative contracts can be highly volatile, and the amount of initial margin is generally small relative to the size of the contract so that transactions are geared. A relatively small market movement may have a potentially larger impact on derivatives than on standard bonds or equities.

- **Country Risks associated with investments in international funds:**

Country risk arises from the inability of a country to meet its financial obligations. It is the risk encompassing economic, social and political conditions in a foreign country which might adversely affect the interests of the Scheme.

- **Currency Risk in funds investing in international funds:**

Investments in BGF-WMF and similar other overseas mutual fund schemes are subject to currency risk. Returns to investors are the result of a combination of returns from investments and from movements in exchange rates. For example, if the Rupee appreciates vis-à-vis the US\$, the extent of appreciation will lead to a reduction in the yield to the investor. However, if the Rupee appreciates against the US\$ by an amount in excess of the interest earned on the investment, the returns can even be negative. Again, in case the Rupee depreciates vis-à-vis the US\$, the extent of depreciation will lead to a corresponding increase in the yield to the investor. Going forward, the Rupee may depreciate (lose value) or appreciate (increase value) against the currencies of the countries where the Scheme will invest.

Risks Associated With Overseas Investments

Subject to necessary approvals, in terms of all applicable guidelines issued by SEBI and RBI from time to time and within the investment objectives of the Scheme, the Scheme may invest in overseas markets and securities which carry a risk on account of fluctuations in the foreign exchange rates, nature of securities market of the country concerned, repatriation of capital due to exchange controls and political circumstances.

Risks Associated With Transaction in Units Through Stock Exchange Mechanism

In respect of transactions in Units of the Scheme through NSE and/or BSE or any other recognised stock exchange, allotment and redemption of Units on any Business Day will depend upon the order processing/settlement by NSE, BSE or such other exchange and their respective clearing corporations on which the Fund has no control. Further, transactions conducted through the stock exchange mechanism shall be governed by the operating guidelines and directives issued by NSE, BSE or such other recognised exchange in this regard.

Risks Associated With Investment in Money Market Instruments

The following risks are applicable to the extent of the Schemes investment in money market instruments

- **Market Liquidity Risk:** The liquidity of investments made in the Schemes may be restricted by trading volumes, settlement periods and transfer procedures. Although the investment universe constitutes securities which will have high market liquidity, there is a possibility that market liquidity could get impacted on account of company/sector/general market related events and there could be a price impact on account of portfolio rebalancing and/or liquidity demands on account of redemptions. Different segments of the Indian financial markets have different settlement periods and such periods

may be extended significantly by unforeseen circumstances. There have been times in the past, when settlements have been unable to keep pace with the volume of securities transactions, making it difficult to conduct further transactions. Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Schemes are uninvested and no return is earned thereon. The inability of the Schemes to make intended securities purchases, due to settlement problems, could cause the Schemes to miss certain investment opportunities. By the same token, the inability to sell securities held in the Schemes' portfolios, due to the absence of a well-developed and liquid secondary market for debt securities, would result at times, in potential losses to the Schemes, should there be a subsequent decline in the value of securities held in the Schemes' portfolios. Money market securities, while fairly liquid, lack a well-developed secondary market, which may restrict the selling ability of the Schemes and may lead to the Schemes incurring losses till the security is finally sold.

- **Credit Risk:** Fixed income securities (debt and money market securities) are subject to the risk of an issuer's inability to meet interest and principal payments on its debt obligations. The Investment Manager will endeavour to manage credit risk through in-house credit analysis. Different types of securities in which the Schemes would invest as given in the SID carry different levels of credit risk. Accordingly the Schemes' risk may increase or decrease depending upon their investment patterns. E.g. corporate bonds carry a higher amount of risk than Government securities. Further, even among corporate bonds, bonds which are rated AAA are comparatively less risky than bonds which are AA rated.

- **Rating Migration Risk:** Fixed income securities are exposed to rating migration risk, which could impact the price on account of change in the credit rating. For example: One notch downgrade of a AAA rated issuer to AA+ will have an adverse impact on the price of the security and vice-versa for an upgrade of a AA+ issuer.

- **Term Structure of Interest Rates (TSIR) Risk:** The NAV of the Schemes' Units, to the extent that the Schemes are invested in fixed income securities, will be affected by changes in the general level of interest rates. When interest rates decline, the value of a portfolio of fixed income securities can be expected to rise. Conversely, when interest rates rise, the value of a portfolio of fixed income securities can be expected to decline.

- **Re-investment Risk:** The investments made by the Schemes are subject to reinvestment risk. This risk refers to the interest rate levels at which cash flows received from the securities in the Schemes are reinvested. The additional income from reinvestment is the 'interest on interest' component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.

RISK MANAGEMENT STRATEGIES

DSPIM is committed to a strong control and compliance environment and ensuring that the management structure is appropriate to the scale of the business. DSPIM's fiduciary business is managed according to the rules and a regulation stipulated for Asset Management Companies by the Securities & Exchange Board of India (SEBI) and also incorporates DSPIM's internal policies.

The AMC has systems and processes to monitor all the investment restrictions specified by SEBI and in this document on a regular basis.

Risk Associated With Underlying Schemes

- **Liquidity Risk on account of investments in international funds:** The investments are made in international funds, which provide daily liquidity. However there exists a possibility that different settlement cycles and foreign exchange conversion could lead to delay in receipt of redemption proceeds. To mitigate this risk, daily cash management monitoring is performed by the Risk and Quantitative Analysis (RQA) team by taking into consideration future cash flows on account of redemptions as well as subscriptions into/from the domestic fund. The endeavor is to maintain an adequate liquidity cushion in Indian Rupee terms by making investments in very short term money market instruments and/or liquid schemes in India

- **Expense Risks associated with investments in international funds:** Any increase in the expense structure of the international funds is not expected to have any impact as the aggregate of expenses incurred by the Indian Fund-of-Funds scheme and the underlying international funds is subject to limits prescribed by SEBI.
- **Portfolio Disclosure Risks associated with investments in international fund:** Although full portfolio disclosure is not available at the end of each month, top ten holdings as well as sector holdings are made available at the end of each month for the international fund. Full portfolio holdings can be obtained from underlying international funds with a three month lag i.e. March portfolio can be obtained at the end of June.
- **Investment Policy and/or fundamental attribute change risks associated with investments in international funds:** Investments are made in such international funds, which have similar investment objectives to the domestic fund in India. However there exists possibility that there is a change in the fundamental attributes of the international fund. In such circumstances, the Investment Manager will seek to invest in other international funds, which have the same investment objective as the domestic fund.
- **Risks associated with investments in BGF-WMF - special risk consideration related to international fund:** To the extent of the investments in BGF-WMF, the risks of BGF-WMF will exist. . The investors should note that these risks cannot be defeated as these are international funds managed by BlackRock. However, as part of our due diligence, we have chosen funds, which have long term performance track record, stability of fund management team and are accredited by third party funds evaluators like S&P, Morningstar etc.

Risks Associated With Investment in Money Market Instruments

- **Market Liquidity Risk:** The liquidity risk will be managed and/or sought to be addressed by creating a portfolio which has adequate access to liquidity. The Investment Manager will select fixed income securities, which have or are expected to have high secondary market liquidity. Market Liquidity Risk will be managed actively within the portfolio liquidity limits. The first access to liquidity is through cash and fixed income securities. The investment in unlisted securities will be minimal.
- **Credit Risk:** Credit Risk associated with fixed income securities will be managed by making investments in securities issued by borrowers, which have a good credit profile. The credit research process includes a detailed in-house analysis and due diligence. Limits are assigned for each of the issuer (other than government of India); these limits are for the amount as well as maximum permissible tenor for each issuer. The credit process ensures that issuer level review is done at inception as well as periodically by taking into consideration the balance sheet and operating strength of the issuer.
- **Term Structure of Interest Rates (TSIR) Risk:** The Investment Manager will endeavour to actively manage the duration based on the ensuing market conditions. As the investments of the Scheme are very short duration in nature, the risk can be expected to be small.
- **Rating Migration Risk:** The endeavour is to invest in high grade/quality securities. The due diligence performed by the fixed income team before assigning credit limits and the periodic credit review and monitoring should address company-specific issues.
- **Re-investment Risk:** Re-investment Risk is prevalent for fixed income securities, but as the investments of the Scheme are short duration in nature, the impact can be expected to be small.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEMES

The Scheme/plan shall have a minimum of 20 investors each and no single investor shall account for more than 25% of the corpus of the Scheme/plan. These conditions shall be complied with, in each calendar quarter on an average basis, as specified by SEBI. In case of non-fulfillment of the condition of 20 investors in a calendar quarter, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations shall become applicable automatically without any reference from SEBI, and accordingly the Scheme/plan(s) shall be wound up and the units redeemed at the relevant applicable NAV. If there is

breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be available and thereafter, the investor who is in breach of the rule, shall be given 15 days' notice to redeem his exposure over the 25% limit. Overview of the underlying fund - BGF - WMF

<p>Basis of selection of the underlying fund</p>	<p>BGF - WMF is Undertaking for Collective Investment in Transferable Securities (UCITS) III Fund approved by Commission for the Supervision of the Financial Sector, Luxembourg, with BlackRock (Luxembourg) S.A. as the management company. BGF - WMF seek to maximize capital growth expressed in US dollars. The fund has a flexible investment style, which captures the broadest possible opportunities. Apart from leveraging on the global expertise and the backing of a strong team of investment professionals at BlackRock, the predominant reason for our selecting the underlying fund is the investment philosophy and identification of attractive and structural investment themes on a global basis through detailed analysis.</p>
<p>Investment Objective</p>	<p>The Fund seeks to maximise total return expressed in US dollars by investing in the equity securities of mining and metals companies worldwide whose predominant economic activity is the production of base metals and industrial minerals such as iron ore and coal. The fund may also invest in gold or other precious metal or mineral mining companies. The fund does not hold physical gold or metal.</p>
<p>Investment Strategy of the BGF - WMF</p>	<p>The team aspires to be the leading manager of Natural Resources funds and recognised as having unrivalled skills in generating outstanding investment performance.</p> <p>The team invests through the natural resources investment cycle, combining bottom-up, fundamental analysis of companies with a top-down macro and industry overlay. We believe that markets are not fully efficient and that through our detailed knowledge of natural resources companies, we can generate alpha over the long-term. While this is our belief, no investment is risk free. Proprietary technology platforms may help manage risk, but risk cannot be eliminated.</p> <p>We constantly seek differentiated sources of alpha and believe investing in natural resources equities requires a flexible investment style. Differentiated sources of returns include:</p> <ul style="list-style-type: none"> • Growth potential - we seek investments in companies with long-term structural drivers for above market earnings growth • Relative valuation and re-rating potential - we analyse the valuations of companies and sub-sectors relative to each other and relative to their own histories as we seek to identify and exploit mispricing opportunities • Turnaround stories - we seek investments in companies that have fallen out of favour but have catalysts which we believe will see them return to favour • Long-term sustainable business models - we incorporate companies that have a strong portfolio of assets, which are not easily replicable, that are able to deliver consistent growth • Commodity / macro tilts - our commodity / macro analysis leads us to favour certain commodities, sub-sectors and geographical regions over others. With these views in mind, we use our in-depth fundamental analysis to identify those companies best placed to take advantage of the direction of travel <p>Given the volatility and cyclicity of the natural resources sector, we feel strongly that we need to maintain flexibility in order to generate returns for our clients. Depending on the macroeconomic backdrop and depending on where we believe we are in the investment cycle, we will emphasize some sources of alpha over others. For example, during periods of rising commodity prices and improving market</p>

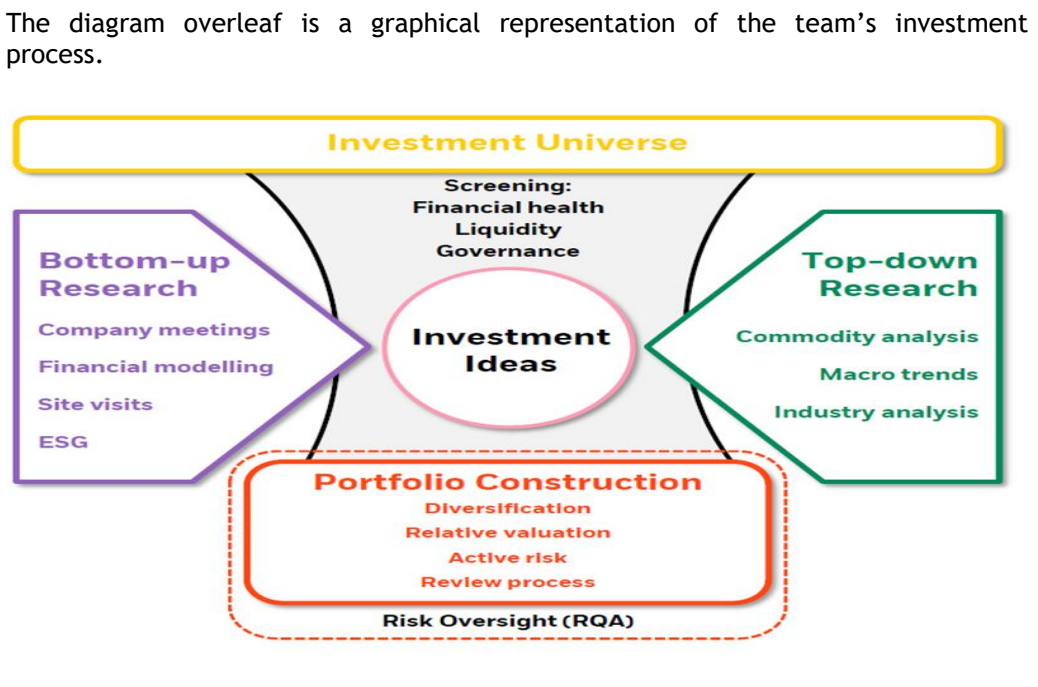

sentiment, we will typically emphasize growth potential stories.

The management of risk is central to our investment philosophy, and we are able to benefit from BlackRock’s sophisticated risk management tools. The team views BlackRock’s Risk and Quantitative Analysis division (RQA) as a business partner to help build and maintain portfolios with appropriate and deliberate levels of risk. Environmental, Social and Corporate Governance (ESG) considerations are also embedded in the team’s investment philosophy and process. The team has a rigorous and systematic approach to reviewing ESG risks at an industry and company level. Our site visits provide valuable information to further assess quantitative data provided by third parties. Our firm belief is that companies must consider and address ESG issues in order to maintain their social license to operate and therefore they are an important determinant of investment performance.

Long Term drivers of the BGF - WMF

- Supply and demand in mined commodity markets is generally very tight today and prices look well-supported in our view.
- On the demand side, increased global infrastructure spending is supporting demand, whilst we expect the mining sector to play a critical role in the coming years in supplying materials required for lower-carbon technologies, like wind turbines, solar panels and electric vehicles.
- The Russia Ukraine crisis puts greater focus on energy independence, particularly for Europe, and will further accelerate investment into renewable energy capacity build out in our view.
- On the supply side, we are encouraged by what we are hearing from management teams in terms of maintaining their focus on capital discipline.
- Longer-term, ill-discipline remains a risk but, regardless, increases in capital expenditure would take some time to feed through into new supply given the time-lags associated with mining projects.
- Mining companies are generally in robust financial shape today with strong balance sheets and high levels of free cash flow being generated.
- Finally, we view mining equities as an effective way to hedge portfolios against persistent inflationary pressures.

Investment Process

Source: BlackRock, as at 30 June 2022. ESG: Environmental, Social and Governance. RQA: Risk & Quantitative Analysis Team. Current process for selecting investments in the portfolio is in accordance with its stated investment objective and policies.

Process subject to change based on market conditions, portfolio manager's opinion and other factors. Investment process subject to change and provided here for illustrative purposes only. ESG considerations are evaluated alongside a number of other considerations, and/or would not be the sole consideration when making investment decisions.

Screening and Idea Generation

The starting point of our investment process is analysis of the Fund's investment universe. The investment universe of the BGF World Mining Fund includes all mining companies around the world. We typically have low exposure to pure play exploration stocks, preferring to invest in companies that already have some form of production, amongst which, we believe we can add greater value as stock pickers through our in-depth fundamental analysis.

The team screens the investment universe on valuation, performance and ESG metrics to help us identify ideas for inclusion in the portfolio. We also generate ideas through our combined approach of bottom-up, fundamental analysis of companies with a top-down macro and industry overlay. Ideas are also generated through us leveraging resources and insights from the wider BlackRock community, including sector specific research groups, plus other equity and credit teams across the firm.

Research Process

As displayed above, the team draws on top-down, macro orientated research and bottom-up, company level analysis when generating ideas, and in this process, there are two key attributes we look for in a company: Firstly, a clear strategy to grow shareholder value through one or more of the 'differentiated sources of alpha' mentioned above. Secondly, we seek investments in companies that exhibit some or all of the following quality factors:

- Asset quality: high margin, barriers to entry, intellectual property advantage
- Management: proven track record of delivering value to shareholders
- Capital structure: strong financials and debt coverage
- Capital allocation: sensible approach to capital allocation between investment and dividend growth
- ESG: strong management of ESG factors

Top-down research

Commodity, macro and industry research is integral to the team's ability to generate alpha and in doing so, we draw on a number of resources which include:

- Our team based proprietary research
- Sell side broker commodity/macro analysts
- Industry contacts and private companies operating in the industry
- Internal BlackRock networks

The top-down process is focussed on identifying trends that will impact the supply/demand balance of the underlying commodities, monitoring the political and regulatory environment and analysing market sentiment. The team holds a macro-economic meeting every week where topics of discussion are prepared in advance by a rotating meeting chair. During the meeting, questions are posed by the chair to encourage the discussion and enhance the debate. In addition to this, we also hold a weekly commodity meeting which rotates between the various sub-sectors within the natural resources universe and runs in a similar format to the macro-economic

meeting.

The output of the commodity, industry or macro analysis can be supply/demand models or industry conclusions detailed in relevant company notes. This can also feed directly into additional company research.

For example, in a favourable commodity or industry outlook we will search for companies exposed to this trend and conduct a company review.

Bottom-up research

The team spends a significant amount of time conducting fundamental company research and whilst this process may vary from company to company, it typically includes:

- Regular meetings with senior management and or board members
- Site visits to key assets
- Valuation and financial modelling
- Attendance at industry conferences
- Meeting with industry experts and private companies

We spend time analysing a company's market dynamics, revenue drivers, financial statements, valuations and risks to the central scenario. We seek to understand the factors that influence a share price and as well as what the market is anticipating or missing. This includes monitoring Environmental, Social and Governance (ESG) factors for which we draw on data from MSCI, Ethix and Bloomberg, as well as working closely with BlackRock's Investment Stewardship Team. This process ensures that the team understands the drivers of both a company's value creation and of its share price.

Valuation tools used

Depending on the sector and the stage of company development, the team uses a range of valuation metrics including:

- Discounted cash flow analysis
- Price to net asset value
- Price to earnings
- Enterprise value to EBITDA
- Price to book
- Free cash flow yield
- Dividend yield
- Communication

ESG Integration

As part of our structured investment process, ESG risks and opportunities are considered within our fundamental analysis of companies and industries. Our unparalleled access to company management allows us to engage on these issues through questioning management teams and conducting site visits. We look to understand how management approaches ESG risks and opportunities and the potential impact this may have on company financials. Further engagement is carried out by the BlackRock Investment Stewardship team (BIS), who meet with boards of companies frequently to evaluate how companies are strategically managing their longer-term issues, including those surrounding ESG. Through this combination of quantitative and qualitative assessment, we ensure that our understanding of our investments is thorough, reliable and up to date. Our

	<p>understanding of ESG issues is further supported by BlackRock’s Sustainable Investment Team (BSI). BSI look to advance ESG research and integration, active engagement and the development of sustainable investment solutions across the firm. BlackRock believes environmental, social and governance issues have real financial impacts over the long-term. The sustainable investing effort is embedded into our culture from the top down as we believe that a company’s ability to manage environmental, social, and governance matters demonstrates the leadership and good governance that is essential to sustainable growth.</p> <p>Portfolio Construction</p> <p>The Natural Resources team uses portfolio construction and position sizing to reflect the level of conviction, liquidity as well as risk associated with an investment opportunity. Risk Management

Risk management is central to the team's portfolio construction process. Portfolio managers monitor portfolio risk using BlackRock's sophisticated risk management tools. Portfolio managers evaluate the risks and rewards of each stock and are able to model what effect the addition of new stocks will have on portfolio risk. Risk data is also monitored independently by BlackRock's Risk and Quantitative Analysis (RQA) division. The team maintains an ongoing dialogue with colleagues in RQA and meets with them formally every six weeks to discuss portfolio risk exposures in detail.

BGF - WMF and the other underlying overseas mutual fund schemes where the Scheme will invest shall be compliant with all provisions of SEBI Circular SEBI/IMD/CIR No7/104753/07 dated September 26, 2007.

E. WHAT ARE THE INVESTMENT STRATEGIES?

The scheme will invest predominantly in units of BGF - WMF. The Scheme may, at the discretion of the Investment Manager, also invest in the units of other similar overseas mutual fund schemes, which may constitute a significant part of its corpus. The Scheme may also invest a certain portion of its corpus in money market securities and/or money market/liquid schemes of DSP Mutual Fund, in order to meet liquidity requirements from time to time.

Portfolio Turnover

Portfolio turnover is defined as the lower of the aggregate value of purchases or sales, as a percentage of the average corpus of the Scheme during a specified period of time. This will exclude purchases and sales of money market securities.

The portfolio turnover in the Scheme will be a function of the inflows in the form of subscriptions into the Scheme and outflows in the form of redemptions from the Scheme, as well as the market opportunities available to the Investment Manager. Consequently, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio(s). It will be the endeavor of the Investment Manager to keep portfolio turnover rates as low as possible. However, there are trading opportunities that present themselves from time to time, where in the opinion of the Investment Manager, there is an opportunity to enhance the total returns of the portfolio. The Investment Manager will endeavor to balance the increased cost on account of higher portfolio turnover with the benefits derived therefrom. Although the exchange-traded equity derivatives contracts in India are available upto 3 months, the liquidity is predominantly in the one month contracts (near month contracts). The Scheme has no specific target relating to portfolio turnover.

Overview of Money Market in India

Overview of Overseas Debt Market

The nature and number of debt instruments available in international debt markets is very wide. In terms of diverse instruments as well as liquidity, overseas debt markets offer great depth and are extremely well developed. Investment in international debt greatly expands the universe of top quality debt, which is no longer restricted to the limited papers available in the domestic debt market. The higher rated overseas sovereign, quasi-government and corporate debt offer lower default risk in addition to offering a high degree of liquidity since these are traded across major international markets. Investments in rated international debt offer multiple benefits of risk reduction, a much wider universe of top quality debt and also potential gains from currency movements.

Investments in international markets are most often in U.S. dollars, though the Euro, Pound Sterling and the Yen are also major currencies. Though this market is geographically well-spread across global financial centers, the markets in the U.S., European Union and London offer the most liquidity and depth of instruments.

Besides factors specific to the country / issuer, international bond prices are influenced to a large extent by a number of other factors; chief among these are the international economic outlook, changes in interest rates in major economies, trading volumes in overseas markets, cross currency movements among major currencies, rating changes of countries / corporations and major political changes globally.

Apart from the Investment Restrictions prescribed under the SEBI (MF) Regulations, internal risk parameters for limiting exposure to a particular scheme may be prescribed from time to time to respond to the dynamic market conditions and market opportunities.

3. IDCW Policy

i) Growth Option

Under this option, the Mutual Fund will not declare any IDCW. The income earned by the Scheme will remain invested in the Scheme and will be reflected in the NAV. This Option is suitable for investors who are not looking for current income but who have invested only with the intention of capital appreciation. Moreover, if Units under this Option are held as a capital asset for a period of greater than 36 months from the date of acquisition, Unit Holders should get the benefit of long term capital gains tax. Please refer the section “A. Tax Benefit of Investing in the Mutual Funds” in the SAI.

(ii) Income Distribution cum Capital Withdrawal option (IDCW)

The above options are suited for investors seeking income through IDCW declared by the Schemes. Only Unit Holders opting for such option(s) will receive IDCWs. Under these options, the Schemes envisage declaring IDCWs comprising substantially of net income and realized gains.

The options stated in point (ii) above, in turn offer two suboptions i.e. “Payout IDCW” or “Reinvest IDCW”

• Payout IDCW

As per the SEBI (MF) Regulations, the Mutual Fund shall despatch to the Unit Holders, IDCW warrants within 30 days of declaration of the IDCW. IDCWs will be payable to those Unit Holders whose names appear in the Register of Unit Holders on the date (Record Date). IDCWs will be paid by cheque, net of taxes as may be applicable. Unit Holders will also have the option of direct payment of IDCW to the bank account. The cheques will be drawn in the name of the sole/first holder and will be posted to the registered address of the sole/first holder as indicated in the original application form entirely at the risk of the unitholders. **To safeguard the interest of Unit Holders from loss or theft of IDCW cheques, investors should provide the name of their bank, branch and account number in the application form. IDCW cheques will be sent to the Unit Holder after incorporating such information.**

If the IDCW amount payable (net of tax deducted at source, wherever applicable) under the IDCW Payout sub-option of the Schemes is for an amount equal to or less than Rs. 100/- then such IDCW will compulsorily and automatically reinvested in the Scheme/ Plan by issuing additional Units of the Scheme under Regular Plan/ Direct Plan at the Applicable NAV on the next Business day after the Record Date. There shall be no load on IDCW so reinvested.

• Reinvestment of Income Distribution cum Capital Withdrawal option (IDCW)

Under this sub-option, IDCWs will be reinvested by way of additional Units of the Scheme instead of being paid out. Such reinvestment will be at the applicable NAV on the next Business Day after the Record Date. There shall however, be no entry load/exit load, if any, on the IDCWs so reinvested. The IDCWs so reinvested shall be constructive payment of IDCWs to the Unit Holders and constructive receipt of the same amount from each Unit Holder, for reinvestment in Units. The additional Units issued under this option and held as capital asset would get the benefit of long term capital gains if sold after being held for greater than 36 months. For this purpose, 36 months will be computed from the date when such additional Units are issued/allotted.

• Effect of IDCW

The NAV of the Unit Holders in IDCW Option, Monthly IDCW Option, Daily IDCW Reinvest Option and Weekly IDCW Option will stand reduced by the amount of IDCW declared.

On declaration of IDCW, the NAV of the IDCW option will further stand reduced by the applicable statutory levy/surcharge/cess/ any other levy payable by the scheme in respect of separate category of investors if any. Notwithstanding varying rates of statutory levies, the ex-IDCW NAV will remain the same for all categories of investors in a particular option, though the amount of IDCW received by Unit Holders may vary depending on the category of each Unit Holder.

For details on taxation of IDCW please refer the SAI.

4. Minimum amount for Application/Redemption/ switches

▪ First Purchase and Subsequent Purchase	Rs. 500/- and any amount thereafter Note: The minimum application amount will not be applicable for investment made in schemes in line with SEBI circulars on Alignment of interest of Designated Employees of AMC.
▪ SIP Purchase	Rs. 500/- and any amount thereafter
Minimum amount for Redemption/ Repurchase*	Not Applicable

*In case of Units held in dematerialized mode, the redemption request can be given only with DPs or on Stock exchange Platform; and only in number of Units and the provision pertaining to 'Minimum amount for Redemption' shall not be applicable to such investors.

The Trustee shall have absolute discretion to reject any application for purchase of Units, if in its opinion, increasing the size of the Unit Capital is not in the general interest of the Unit Holders, or if for any other reason it does not believe it would be in the best interest of the Scheme or its Unit Holders to accept such an application.

5. Ongoing price for subscription (Purchase Price)/ switch-in from other schemes/ plans by investor (This is the price you need to pay for purchase/switch-in)

The Purchase Price of the Units on an ongoing basis will be calculated as described below, which is based on the Applicable NAV

Purchase Price = Applicable NAV

Illustration:

Say, Applicable NAV = Rs. 12/-
Therefore, Purchase Price = Rs.12/-

6. Ongoing price for redemption (sale) /switch outs (to other Scheme/plans of the Mutual Fund)/intra-Plan switching by investors (Redemption Price)

(This is the price you will receive for redemptions/switch outs)

The Redemption Price of the Units will be calculated on the basis of the Applicable NAV subject to prevailing Exit Load, if any. In the case of Schemes which currently have no Exit Load, the Redemption Price will be the Applicable NAV. In the case of Schemes having an Exit Load or in which an Exit Load is introduced, the Redemption Price will be calculated as under:

Redemption Price = Applicable NAV x (1 - Exit Load)

Illustration:

Say, Applicable NAV = Rs. 12.0000 and the Exit Load is 0.50%,
Redemption Price = 12 x (1-0.005) = Rs. 11.9400.

Investors may note that the Trustee has the right to modify the existing Load Structure in any manner or introduce an Exit Load or a combination of Exit Load and/or any other Load subject to a maximum as prescribed under the SEBI (MF) Regulations. Should the Trustee on any date, impose or enhance any load, such imposition or enhancement shall be applicable on prospective investment only.

The Mutual Fund shall ensure that the Redemption Price is not lower than 95% of the NAV.

For details on load structure please see, Section ' Fees and Expenses, C. Load Structure.'

16. Transactions through Channel Distributors

Investors may enter into an agreement with certain distributors (with whom AMC also has a tie up) referred to as "Channel Distributors" who provide the facility to investors to transact in units of mutual funds through various modes such as their website / other electronic means or through Power of Attorney in favour of the Channel Distributor, as the case may be.

Under such arrangement, the Channel Distributors will aggregate the details of transactions (viz. subscriptions/ redemptions/switches) of their various investors and forward the same electronically to the AMC / RTA for processing on daily basis as per the cut-off timings applicable to the relevant schemes. The Channel Distributor is required to send copy of investors' KYC and agreement entered into between the investor & distributor to the RTA (one time for central record keeping) as also the transaction documents / proof of transaction authorization as the case may be, to the AMC / RTA as per agreed timelines.

Normally, the subscription proceeds, when invested through this mode, are by way of direct credits to the specified bank account of DSP Mutual Fund. The redemption proceeds (subject to deduction of tax at source, if any) and IDCW payouts, if any, are paid by the AMC to the investor directly through direct credit in the bank account of the investor specified by the distributor or through issuance of payment instrument, as applicable.

In case KYC and other necessary documents are not furnished within the stipulated timeline, the transaction request shall be liable to be rejected or the folio will be locked for future subscriptions/ switches. The Mutual Fund, the AMC, the Trustee, along with their directors, employees and representatives shall not be liable for any errors, damages or losses arising out of or in connection with the transactions undertaken by investors or as provided by the distributors through the above mode.

It may be noted that investors investing through this mode may also approach the AMC / ISC directly with their transaction requests (financial / non-financial) or avail of the online transaction facilities offered by the AMC.

17. Subscription of Units through Electronic Mode

Subject to the investor fulfilling certain terms and conditions as stipulated by AMC from time to time, the AMC, Mutual Fund, Registrar or any other agent or representative of the AMC, Mutual Fund, the Registrar ("Recipient") may accept transactions through any electronic mode (fax/web/electronic transactions) ("Electronic Transactions"). The acceptance of Electronic Transactions will be solely at

the risk of the investor and the Recipient shall not in any way be liable or responsible for any loss, damage caused to the investor directly or indirectly, as a result of the investor sending or purporting to send such transactions including where such transaction sent / purported to be sent is not processed on account of the fact that it was not received by the Recipient.

The investor acknowledges that Electronic Transaction is not a secure means of giving instructions / transactions requests and that the investor is aware of the risks involved including those arising out of such transmission being inaccurate, imperfect, ineffective, illegible, having a lack of quality or clarity, garbled, altered, distorted, not timely etc. The investor's request to the Recipient to act on Electronic Transaction is for the investor's convenience and the Recipient is not obliged or bound to act on the same. The investor authorizes the recipient to accept and act on any Electronic Transaction which the recipient believes in good faith to be given by the investor and the recipient may at its discretion treat any such transaction as if the same was given to the recipient under the investor's original signature.

In case there is any difference between the particulars mentioned in the fax/ web/ electronic transmission received as against the original document which may be received thereafter, the Recipient shall not be liable for any consequences arising therefrom.

The investor agrees that the recipient may adopt additional security measures including signature verification, telephone call backs or a combination of the same, which may be recorded and the investor consents to such recording and agrees to co-operate with the recipient to enable confirmation of such transaction requests. In consideration of the Recipient from time to time accepting and at its sole discretion (including but not limited to the AMC extending / discontinuing such facilities from time to time) acting on any Electronic Transaction request received / purporting to be received from the investor, the investor agrees to indemnify and keep indemnified the AMC, Directors, employees, agents, representatives of the AMC, Mutual Fund and Trustees from and against all actions, claims, demands, liabilities, obligations, losses, damages, costs and expenses of whatever nature (whether actual or contingent) directly or indirectly suffered or incurred, sustained by or threatened against the indemnified parties whatsoever arising from or in connection with or any way relating to the indemnified parties in good faith accepting and acting on Electronic Transaction requests including relying upon such transaction requests purporting to come from the investor even though it may not come from the Investor. The AMC reserves the right to modify the terms and conditions or to discontinue the facility at any point of time.

18. Redemption

Units can be redeemed (sold back to the Mutual Fund) at the relevant Redemption Price. The redemption requests can be made on the pre-printed forms (transaction slip/common transaction form) or by using the form at the bottom of the account statement.

The redemption request can be submitted at any of the Official Points of Acceptance of transaction, the details of which are mentioned at the end of this SID. As all allotments are provisional, subject to realization of payment instrument and subject to the AMC having been reasonably satisfied that the Mutual Fund has received clear funds, any redemption or switch out transaction in the interim is liable to be rejected at the sole discretion of the AMC.

A unit Holder may request redemption of a specified amount or a specified number of Units only. If the redemption request is made for a specified amount and the number of Units is also specified by the Unit Holder, the number of Units specified will be considered for deciding the redemption amount. Unit Holders may also request for redemption of their entire holding and close the account by indicating the same at an appropriate place in the transaction slip/common transaction slip.

It may, however, be noted that in the event of death of the Unit Holder, the nominee or legal heir, (subject to production of requisite documentary evidence to the satisfaction of the AMC) as the case may be, shall be able to redeem the investment at any point of time.

In case an investor has purchased Units on more than one day (either under the NFO period or through subsequent purchase) the Units purchased first (i.e. those Units which have been held for the longest period of time), will be deemed to have been redeemed first, i.e. on a First-In-First-Out basis.

In case the Units are standing in the names of more than one Unit Holder, where mode of holding is specified as 'Joint', redemption requests will have to be signed by all joint holders. However, in cases of holding specified as 'Anyone or Survivor', any one of the Units Holders will have the power to make redemption requests, without it being necessary for all the Unit Holders to sign. However, in all cases, the proceeds of the redemption will be paid to the first-named holder only.

Redemption or repurchase proceeds shall be dispatched to Unit Holders within 10 working days from the date of redemption or repurchase. However, under normal circumstances, the Mutual Fund will endeavour to despatch the redemption proceeds, by courier, where such facilities are available, within 5 Business Day from the date of acceptance of the redemption request at any of the official points of acceptance of transaction. Unit holders are advised to submit their requests for change in bank mandate atleast 10 days prior to date of redemption/IDCW payment, if any. The AMC reserves the right to extend/modify the timelines on a case to case basis

The redemption cheque will be issued in favour of the sole/first Unit Holder's registered name and bank account number, if provided, and will be sent to the registered address of the sole/first Holder as registered with the Registrar. The redemption cheque/demand draft will be payable at par at all the places where the official points of acceptance of transaction are located. Bank charges for collection of cheques at all other places will be borne by the Unit Holder. With a view to safeguarding their interest, it is desirable that Unit Holders indicate their Bank Account No., name of the bank and branch in the application for purchasing Units of the Scheme. A fresh account statement will also be sent/emailed to redeeming investors, indicating the new balance to the credit in the account, along with the redemption cheque.

The Mutual Fund may, at its discretion and without any notice, redeem the balance Units in the Scheme (in a particular folio) if the value of the balance Units in the Scheme (in a particular folio) falls below Rs. 500/- and at least 6 months have elapsed since his/her/its first investment in the Scheme. The Investment Manager may change the rules relating to this facility from time to time.

Unit holders are requested to note that application for redemption or switch out for units for which funds are not realized via purchase or switch-in in the Scheme of the Fund shall be liable to be rejected. In other words, redemption of units will be processed only if the funds for such units are realized in the Scheme by a way of payment instructions/transfer or switch-in funding process.

The proceeds towards redemptions and IDCWs will be dispatched by a reasonable mode of despatch like courier, post, etc. in case of cheque/demand draft or directly credited to the bank account (as per the details mentioned by the investor) in case of direct credit facility, entirely and solely at the risk of the investor. The Mutual Fund will endeavour to remit redemption proceeds via electronic means, as made available by RBI. Where such electronic means are not available or feasible under any circumstances, the Mutual Fund will remit the redemption proceeds by way of cheques. The investor will not hold the Mutual Fund or the AMC or the Registrar responsible for any non-receipt or delay of receipt of redemption & IDCW proceeds due to any negligence or deficiency in service by the courier company, postal authorities or the bank executing direct credits, or due to incorrect bank account details provided by the investor.

In case of redemptions, Unit holders should note that Two Factor Authentication [2FA] is mandatory for all redemption / switches including STP/SWP submitted through electronic mode. OTP will be sent to either email id or mobile number registered in the folio and the Unit holder have to confirm on the OTP received. On successful validation only, the redemptions will be accepted and processed.

- **Redemption by NRIs and FPIs**

Credit balances in the account of an NRI/FPI investor may be redeemed by such investors in accordance with the procedure described above and subject to the procedures laid down by RBI, if any. Such redemption proceeds will be paid by means of a Rupee cheque payable to the NRI's/FPIs or by a foreign currency draft drawn at the then rates of exchange less bank charges, subject to RBI procedures and approvals.

- **Effect of Redemption**

On redemption, the unit capital and reserves will stand reduced by an amount equivalent to the product of the number of Units redeemed and the Redemption Price as on the date of redemption. Units once redeemed will be extinguished and will not be re-issued.

- **Fractional Units**

Since a request for purchase is generally made in Rupee amounts and not in terms of number of Units of the Scheme, a Unit Holder may be left with fractional Units. Fractional Units will be computed and accounted for up to three decimal places. However, fractional Units will, in no way, affect the Unit Holder's ability to redeem the Units, either in part or in full, standing to his/her/its credit.

- **Redemption by investors transacting through the Stock Exchange mechanism**

Investors who wish to transact through the stock exchange shall place orders for redemptions as currently practiced for secondary market activities. Investors must submit the Delivery Instruction Slip to their Depository Participant on the same day of submission of redemption request, within such stipulated time as may be specified by NSE/BSE, failing which the transaction will be rejected. Investors shall seek redemption requests in terms of number of Units only and not in Rupee amounts. Redemption amounts shall be paid by the AMC to the bank mandate registered with the Depository Participant.

- **Redemption by investors who hold Units in dematerialized form**

Redemption request for Units held in demat mode shall not be accepted at the offices of the Mutual Fund/AMC/Registrar. Unit holders shall submit such request only through their respective Depository Participant or through Stock Exchange mechanism platform.

- **Delay in payment of redemption / repurchase proceeds**

As per SEBI (MF) Regulations, the Mutual Fund shall despatch the redemption proceeds within 10 Business Days from the date of acceptance of redemption request. In the event of delay/failure to despatch the redemption/repurchase proceeds within the aforesaid 10 Business Days, the AMC will be liable to pay interest to the Unit Holders at such rate as may be specified by SEBI for the period of such delay (currently @ 15% per annum).

19. IDCW Warrants

IDCW warrants shall be dispatched to the Unit Holders within 15 days of the date of record date of IDCW. In the event of delay/failure to despatch the IDCW warrants within the aforesaid 15 days, the AMC will be liable to pay interest to the Unit Holders at such rate as may be specified by SEBI for the period of such delay (currently @ 15% per annum).

20. Minimum balance to be maintained and consequences of non-maintenance

The minimum balance to be maintained at all times in the Scheme shall be Rs. 500/-.

If an investor makes a redemption request immediately after purchase of Units, the Mutual Fund shall have the right to withhold the redemption request until such time as the Mutual Fund ensures that the amount remitted by the investor (for purchase of Units) is realized and that the proceeds have been credited to the Scheme's Account. However, this is only applicable if the value of redemption is such that some or all of the freshly purchased Units may have to be redeemed to effect the full redemption.

21. Suspension/Restriction on Redemption of Units of the Scheme

Subject to the approval of the Boards of the AMC and of the Trustee and subject also to necessary communication of the same to SEBI, the redemption of / switch-out of Units of Scheme(s) of the Fund, may be temporarily suspended/ restricted. In accordance with SEBI circular ref. no. SEBI/HO/IMD/DF2/CIR/P/2016/57 dated May 31, 2016 and subject to prevailing regulations, restriction on/suspension of redemptions / switch-out of Units of the Scheme(s) of the Fund, may be imposed

When restriction on / suspension of redemption of Units of the Scheme(s) is imposed, the following procedure shall be applied:

- i. No redemption / switch-out requests upto Rs. 2 lakhs shall be subject to such restriction.
- ii. Where redemption / switch-out requests are above Rs. 2 lakhs, the AMC shall redeem the first Rs. 2 lakhs without such restriction and remaining part over and above Rs. 2 lakhs shall be subject to such restriction.

22. Restrictions, if any, on the right to freely retain or dispose off Units being offered

Any Units, which by virtue of these limitations are not redeemed on a particular Business Day, will be carried forward for redemption to the next Business Day, in order of receipt. Redemptions so carried forward will be priced on the basis of the Redemption Price of the Business Day or Non Business Day (if and as applicable) on which redemption is made. Under such circumstances, to the extent multiple redemption requests are received at the same time on a single Business Day, redemptions will be made on pro-rata basis, based on the size of each redemption request, the balance amount being carried forward for redemption to the next Business Day(s).

Also, in the event of an order being received from any regulatory authority/body, directing attachment of the Units of any investor, redemption of Units will be restricted in due compliance of such order.

29. Facility to transact in units of the Schemes through MF Utility portal & MFUI Points of Services pursuant to appointment of MF Utilities India Private Limited.

The AMC has entered into an Agreement with MFUI, for usage of MF Utility (“MFU”) - a shared services initiative of various Asset Management Companies, which acts as a transaction aggregation portal for transacting in multiple schemes of various Mutual Funds with a single form and a single payment instrument.

Investors can execute financial and non-financial transactions pertaining to Schemes of the Fund electronically on the MFU portal i.e. www.mfuonline.com as and when such a facility is made available by MFUI. The MFU portal i.e. www.mfuonline.com will be considered as Official Point of Acceptance for such transactions.

The Points of Service (“POS”) of MFUI with effect from the respective dates as published on MFUI website i.e. www.mfuindia.com against the POS locations will be considered as Official Point of Acceptance/ Investor Services Centre where application for financial transactions in schemes of the Fund will be accepted on an ongoing basis. Further, investors can also submit their non-financial transaction requests at the POS.

The salient features of the facility to transact in units of the Schemes through MFU are given below:

1. **Common Account Number (“CAN”)**: Investors are required to submit duly filled in CAN Registration Form (“CRF”) and prescribed documents at the MFUI POS to obtain CAN. The CRF can be downloaded from MFUI website i.e. www.mfuindia.com or can be obtained from MFUI POS.

CAN is a single reference number for all investments in the Mutual Fund industry, for transacting in multiple schemes of various Mutual Funds through MFU and to map existing investments, if any.

MFU will map the existing folios of investors in various schemes of Mutual Funds to the CAN to enable transacting across schemes of Mutual Funds through MFU. The AMC and / or its Registrar and Transfer Agent (RTA) shall provide necessary details to MFUI as may be needed for providing the required services to investors / distributors through MFU.

CAN registered investors can transact in physical mode through MFUI POS by submitting relevant Common Transaction Form prescribed by MFUI.

2. CAN registered investors can transact through electronic mode through MFU portal i.e. www.mfuonline.com as and when such a facility is made available to them by MFUI. The time of transaction submission done through MFU portal i.e. www.mfuonline.com and the successful receipt of the same in the servers of MFUI would be the time-stamp for the transaction.
3. Investors not registered with MFUI can also submit their financial & non-financial transactions request at MFUI POS by giving reference of their existing folio number allotted by the Fund.

4. The transactions on the MFU portal shall be subject to the terms & conditions as may be stipulated by MFUI / Mutual Fund / the AMC from time to time.
5. All other terms and conditions of offering of the Scheme as specified in the SID, KIM and SAI shall be applicable to transaction through MFUI.

30. KYC Requirements

Investor are requested to take note that it is mandatory to complete the KYC requirements (including updation of Permanent Account Number) for all unit holders, including for all joint holders and the guardian in case of folio of a minor investor. Accordingly, financial transactions (including redemptions, switches and all types of systematic plans) and non-financial requests are liable to be rejected, if the unit holders have not completed the KYC requirements.

Notwithstanding in the above cases, the AMC reserves the right to ask for any requisite documents before processing of financial and non-financial transactions or freeze the folios as appropriate. Unit holders are advised to use the applicable KYC Form for completing the KYC requirements and submit the form at the point of acceptance. Further, upon updation of PAN details with the KRA (KRA-KYC)/ CERSAI (CKYC), the unit holders are requested to intimate us/our Registrar and Transfer Agent their PAN information along with the folio details for updation in our records.

31. Facility to transact in units of the Schemes through MFCentral

MFCentral is created with an intent to be a one stop portal / mobile app for all Mutual fund investments and service-related needs that significantly reduces the need for submission of physical documents by enabling various digital / physical services to Mutual fund investors across fund houses subject to applicable Terms & Conditions of the Platform from time to time. MFCentral will be enabling various features and services in a phased manner. MFCentral may be accessed using <https://mfcentral.com/> and a Mobile App in future.

DSP Mutual fund designates MFCentral as its Official point of acceptance (DISC - Designated investor Service Centre) with effect from 23rd September 2021.

I. USA securities

1. General US Taxation Rules with Respect to Foreign Persons

Generally, US imposes tax on foreign person either on gross basis or on net basis. Foreign persons who are not engaged in a trade or business in the US are subject to US gross withholding tax on US source income which is fixed determinable annual or periodical generally called as FDAP income. A foreign person that is engaged in a US trade or business will be subject to US taxation on effectively connected taxable income (ECTI). In addition to the income tax imposed on ECTI, the US also imposes a branch profits tax on foreign corporations that has branch or permanent establishment in US. The branch profit tax is imposed on deemed remittances of after-tax effectively connected earnings and profits of foreign corporation's US branch or permanent establishment. One can claim reduced tax rate or exemption from tax under US income tax treaty. The below discussion is based on the understanding that the Scheme would be treated as a corporation for US tax purposes. and the investors in the Mutual Fund Scheme are not tax resident of the USA or based in the USA. Thus, as long as the Scheme is treated as a corporation for US tax purposes, the investors in the Scheme should not directly be subject to US tax. For purposes of this discussion, a foreign person is a person who is not a US citizen or US resident for tax purposes and includes a foreign entity that is classified as a corporation for US tax purposes.

2. Investment in US listed companies

a) US Taxation on Disposition of Shares of US listed Companies

Subject to the discussion below concerning the taxation of ECTI, generally income from the sale of personal property by a foreign person is not US source income and should not be subject to US taxation. Thus, capital gains received by the Scheme on the disposition of shares of US listed companies, should not be subject to taxation in the US.

Trading in stock or securities is generally not considered US trade or business unless taxpayer is a dealer in stock or securities and effects the trade through US offices directly or through US office of its agent other than independent agent.

However if the Scheme invests in any entities that are treated as partnership for U.S federal income tax purposes and if these partnerships are engaged in a U.S. trade or business, then the Scheme itself would be treated as engaged in such a U.S. trade or business and would likely be required to file a U.S. income tax return and potentially pay U.S. tax on its distributive share of partnership income. It may also be subject to potential withholding tax with respect to sales of an interest in such partnership.

Gain derived by a non-U.S resident from the disposition of a U.S Real Property Interest (USRPI) may be treated as income that is effectively connected with the conduct of a U.S trade of business and thus subject to U.S federal income tax (and to a requirement to file a U.S. income tax return) under the Foreign Investment in Real Property Tax Act (FIRPTA). A USRPI includes an interest in a US Real Property Holding Company (USRPHC) which generally is defined as a US company whose assets, measured by fair market value, consist of 50% or more of USRPIs at any time during a five-year period. Such income is considered to be ECTI with the conduct of a U.S trade of business and is subject to US taxation. A foreign person who disposes of a USRPI will be subject to a 15% (w.e.f. 16 February 2016) withholding tax on the gross proceeds received and will be required to file a US federal income tax return. The final tax liability on the recognized gain on disposition of the USRPI will be set off by the 15% withholding tax on gross proceeds.

There is an exception that applies to FIRPTA for publicly traded shares of a - Qualified Investment Entity (QIE). The exception provides that if the stock of a QIE is regularly traded on an established securities market located in the USA (e.g., the NYSE), the stock will be treated as a USRPI only in the case of a more than 5% holder (over the course of a 5 year look-back period). The 5% holding is increased to 10% for publicly traded real estate investment trust (REIT). Such exception also applies to the disposition of an interest in a publicly traded partnership (PTP).

Thus, capital gains derived by the Scheme from the sale of regularly traded listed US equities should not be subject to tax in the US provided the Scheme holds an interest of 5% (10% for publicly traded REIT) or less of any class of stock. In cases where the Scheme has held, at any time within the 5-year period ending on the date of disposition, more than 5% (10% for publicly traded REIT) of the shares of a publicly-traded company that is also a USRPI, gain from disposition of such interest is subject to US federal corporate income tax.

If a partnership (including a PTP), is engaged in a U.S. trade or business, and if a non-U.S. partner disposes of the partnership interest, a portion of gain or loss is treated as connected with the conduct of a U.S. trade or business, and is therefore subject to U.S. tax. Such income also generates a requirement to file a U.S. tax return. This provision is not subject to 5% exception as mentioned above for PTPs that are USRPI. US requires 10% withholding if non-U.S. partner disposes of an interest in the partnership. Such tax withheld can be set off against the final tax liability of the partner who sold its interest.

b) Dividend Income

US source non-effectively connected dividend income received by a foreign person is subject to a 30% withholding tax. Thus US source dividends received by the Scheme from investments in US listed companies should be subject to withholding tax of 30%. Such dividend withholding tax can be reduced pursuant to a double tax treaty as discussed further below.

3. Investment in US Mutual Funds (US MF) or Exchange Traded Funds (US ETF)

a) US Taxation on Disposition of Units of US MF or US ETF

As discussed above in point 1, generally income from the sale of personal property by a foreign person is not US source income and should not be subject to US taxation. Thus, capital gains received by the Scheme on the disposition of interests in mutual funds and exchange traded funds (ETF), should not be subject to taxation in the US.

However, if the mutual fund or ETF that is sold is a USRPHC, then the gain is considered to be effectively connected with a U.S. trade or business and thus subject to U.S taxation, unless the mutual fund or ETF whose shares are sold is (a) publicly traded and the investor held an interest of 5% or less in the mutual fund or ETF at all times during the year preceding the sale or (b) the mutual fund is a domestically controlled qualified investment entity.

b) US Taxation on Income Distribution by US MF or US ETF

US source non-effectively connected dividend income received by a foreign person is subject to a 30% withholding tax. A mutual fund or ETF that is not subject to the USRPHC - related rules described above may distribute ordinary dividends which should be subject to 30% withholding tax. Dividends designated by a Regulated Investment Company (RIC) (e.g. a mutual fund) as capital gain dividends are treated as long term capital gains in the hands of the shareholders. Except as described above for mutual funds or ETFs that otherwise qualify as USRPHCs, because long-term capital gains are sourced to the domicile of the recipient, such capital gain dividends should not be U.S source if the recipient is a non-U.S person, and thus would not be subject to U.S taxation.

A foreign person or other qualified investment entity by a qualified investment entity to the extent attributable to gain from sales or exchanges by the qualified investment entity of USRPIs, is treated as gain from the sale or exchange of a USRPI by the foreign person unless such distribution is with respect to stock that is publicly traded on a U.S exchange and the foreign person did not own more than 5% (or no more than 10% in the case of a REIT) of such class of stock at any time during the 1-year period ending on the date of distribution. Where the

distribution is treated as gain from the sale or exchange of a USRPI, the distribution is treated as income effectively connected to a U.S trade or business, subject to tax at U.S corporate tax rates and withheld on at a rate of 21% of the distribution. The total amount in tax paid should not exceed the liability as determined by applying the U.S corporate rate.

Where distributions from the mutual fund or ETF are characterized as gain from the sale of a USRPI as discussed above, the income is considered effectively connected with the conduct of a U.S trade or business such that the branch profits tax provisions must be considered. The dividend equivalent amounts are subject to withholding tax at a rate of 30%. The dividend equivalent amount is generally equal to a foreign corporation's effectively connected earnings and profits. Generally, gain on disposition of an interest in a USRPHC is excluded from the definition of effectively connected earnings and profits.

4. Treaty Benefits to the Mutual Fund or ETF:

It is likely that the Scheme should be considered as a Person under Indian tax laws and so a tax resident of India and so is likely to be eligible to claim the Double Taxation Avoidance Agreement ('the DTAA' or 'the Treaty') benefits between India and the US on the income earned and tax, if any, payable in the US subject to completion of necessary documentations and the Scheme obtaining a tax residence certificate from the Indian tax authorities. As long as the Scheme is treated as a corporation for US tax purposes, the investors in the Scheme should not directly be subject to US tax. The main benefit of the DTAA is that it reduces the US withholding tax amount with respect to certain U.S. source FDAP payments and may exempt ECTI if it is not attributable to a U.S. permanent establishment.

As per the Treaty:

- i. The Business income earned by the Scheme in the US should not be taxable in the US if the Fund does not have a permanent establishment in the US; If the Scheme has a permanent establishment in the US, then it will be subject to US tax on profits that are attributable to that permanent establishment. US attributes business profits to U.S. permanent establishments of Indian resident corporations under the same ECTI rules applicable to non-treaty residents with respect to the assets and activities conducted in the permanent establishment. A more limited force of attraction rule is also applicable.; The Scheme could be considered to have a permanent establishment in the US if it invests in a partnership that is engaged in a trade or business in the US;
- ii. Capital gains arising on disposition of USRPIs is taxable in the US as per the US tax laws. There is no exception in the DTAA for US taxation of disposition of USRPIs under the FIRPTA rules;
- iii. In general, dividend income beneficially earned by the Scheme in the US should be taxable at the rate of 25% for portfolio ownership interests below 10%;
- iv. Interest income beneficially earned by the Scheme in the US should be subject to withholding tax at the rate of 15% (to the extent not otherwise exempt under US internal rules such as the portfolio interest exception); and
- v. Any other income should be taxable in the US as per US tax laws.

II. Luxembourg securities

Taxation on investment in Luxembourg investment funds

There are no withholding taxes on dividends paid by Luxembourg investment funds.

The fund being Non-residing investors (individuals or corporations) are exempt from taxation in Luxembourg on capital gains realized upon sale of their shares in a Luxembourg corporate investment fund (even in cases where they held a substantial shareholding of more than 10%).

III. Ireland securities

Taxation on investment in an Irish Fund

Where a Shareholder is not resident (or ordinarily resident) in Ireland for Irish tax purposes, an Irish Fund should not deduct any Irish tax in respect of the Shareholder's Shares. In order for the non-Irish resident shareholder to be exempt from Irish Investment Undertaking Tax ("IUT"), it

must complete the relevant non-resident declaration and provide a copy of that declaration to the Irish Fund. The declaration may also be provided by an Intermediary who holds Shares on behalf of non-Irish Resident Shareholders provided that, to the best of the Intermediary's knowledge, the Shareholders are not resident (or ordinarily resident) in Ireland.

If this declaration is not received by an Irish Fund (and in the absence of written notice of approval from Revenue Commissioners being obtained by the Irish Fund dispensing with the requirement to provide such a declaration), an Irish Fund should deduct Irish tax in respect of the shares held by the non-Irish Resident Shareholder. An Irish Fund should also deduct Irish tax if the Irish Fund has information which reasonably suggests that a Shareholder's declaration is incorrect. A Shareholder will generally have no entitlement to recover such Irish tax. An Irish Fund must be informed if a Shareholder becomes Irish tax resident.

Generally, Shareholders who are not Irish tax resident will have no other Irish tax liability with respect to their Shares. However, if a Shareholder is a company which holds its Shares through an Irish branch or agency, the Shareholder may be liable to Irish corporation tax in respect of profits and gains arising in respect of the Shares (on a self-assessment basis).

In case if the fund is deemed to be a Non-Exempt Shareholders then a Shareholder is subject to tax (e.g. because it has not provided the required non-resident declaration), an Irish Fund should deduct Irish tax on distributions, redemptions and transfers and, additionally, on 'eighth anniversary' events, as described below.

Distributions from an Irish Fund

If an Irish Fund pays a distribution to a non-exempt Shareholder, an Irish Fund should deduct Irish tax from the distribution. The amount of Irish tax deducted will be:

1. 25% of the distribution; where the distribution is paid to a shareholder who is an Irish resident company which has made the relevant declaration for the 25% rate to apply.
2. 41% of the distribution in all other cases.

Redemptions and transfer of shares

If an Irish Fund redeems Shares held by a non-exempt Shareholder, an Irish Fund should deduct Irish tax from the redemption payment made to the Shareholder. Similarly, if a non-exempt Shareholder transfers (by sale or otherwise) an entitlement to Shares, an Irish Fund will account for Irish Investment Undertaking tax in respect of that transfer. The amount of Irish tax deducted or accounted for will be calculated by reference to the gain (if any) which has accrued to the Shareholder on the Shares being redeemed or transferred and will be equal to:

1. 25% of such gain; where the shareholder is an Irish resident company which has made the appropriate declaration for the 25% rate to apply;
2. 41% of the gain in all other cases.

If Shares are not denominated in euro, a Shareholder may be liable (on a self-assessment basis) to Irish capital gains taxation on any currency gain arising on the redemption or transfer of the Shares.

"Eighth Anniversary" Events

If a non-exempt Shareholder does not dispose of Shares within eight years of acquiring them, the Shareholder will be deemed for Irish tax purposes to have disposed of the Shares on the eighth anniversary of their acquisition (and any subsequent eighth anniversary). On such deemed disposal, an Irish Fund will account for Irish tax in respect of the increase in value (if any) of those Shares over that eight-year period. The amount of Irish tax accounted for will be equal to:

1. 25% of the increase in value of the shares where the Shareholder is a company which has made the appropriate declaration for the 25% rate to apply;
2. 41% of the increase in value in all other cases.

Any Irish tax paid in respect of the increase in value of Shares over the eight-year period may be set off on a proportionate basis against any future Irish tax which would otherwise be payable in respect of those Shares and any excess may be recovered on an ultimate disposal of the Shares.

Share Exchanges

Where a Shareholder Exchanges Shares on arm's length terms for other Shares in the Irish Fund and no payment is received by the Shareholder, an Irish Fund should not deduct Irish tax in respect of the exchange.

Stamp Duty on transacting in shares

No Irish stamp duty (or other Irish transfer tax) will apply to the issue, transfer or redemption of Shares. If a Shareholder receives a distribution in specie of assets from the ICAV, a charge to Irish stamp duty could potentially arise.

Taxation on investment in Irish Exchange Traded Funds (ETFs)

Similar to active funds, ETFs are exempt from Irish tax on income and gains derived from their investments and are not subject to Irish tax on their net asset value. As such income and gains arising to an ETF are allowed to accumulate gross of Irish tax.

Non-Irish Resident Shareholders do not suffer any Irish tax on the occurrence of a chargeable event (e.g. distribution or redemption) provided that the relevant non-resident declaration has been provided to the fund. If the relevant declaration is not in place the ETF may be obliged to withhold tax at the appropriate rate. However, withholding tax does not need to be applied in the event that shares are held in a recognized clearing system (regardless of whether or not there is a declaration in place).

D. COMPUTATION OF NAV

NAV of Units under the Scheme/Plan may be calculated by either of the following methods shown below:

$$\begin{aligned} \text{NAV (Rs.)} &= \frac{\text{Market or Fair Value of Scheme/Plan's investments} + \text{Current Assets} - \text{Current Liabilities and Provisions}}{\text{No. of Units outstanding under the Scheme/Plan}} \\ \text{Or} & \\ \text{NAV (Rs.)} &= \frac{\text{Unit Capital} + \text{Reserves and Surplus}}{\text{No. of Units outstanding under the Scheme/Plan}} \end{aligned}$$

N.B.: The aforesaid provisions pertaining to “Calculation of NAV”, shall apply in respect of each plan. The NAV will be calculated as of the close of every Business Day.

NAVs will be rounded off to four decimal places for the scheme. The valuation of the Schemes’ assets and calculation of the Schemes’ NAVs shall be subject to audit on an annual basis and such regulations as may be prescribed by SEBI from time to time. NAV is calculated and announced on each Business Day.

Note: The Scheme has Growth and IDCW Option; therefore there will be more than one NAV, one for each Option.
