SECTION I. INTRODUCTION

A. RISK FACTORS

Standard Risk Factors:

- Investment in mutual fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk, including the possible loss of principal.
- As the price / value / interest rates of the securities in which the Scheme invest fluctuates, the value of your investment in the Scheme may go up or down. In addition to the factors that affect the value of individual investments in the Scheme, the NAV of the Scheme can be expected to fluctuate with movements in the broader equity and bond markets and may be influenced by factors affecting capital and money markets in general, such as, but not limited to, changes in interest rates, currency exchange rates, changes in Governmental policies, taxation, political, economic or other developments and increased volatility in the stock and bond markets.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme.
- The name of the Scheme does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The Sponsors are not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs. 1 lakh made by it towards setting up the Mutual Fund.
- The present Scheme is not a guaranteed or assured return Scheme.

Additional Risk Factors for Foreign Investors:

1. Political Risk

Investments in mutual fund Units in India may be materially adversely impacted by Indian politics and changes in the political scenario in India either at the central, state or local level. Actions of the central government or respective state governments in the future could have a significant effect on the Indian economy, which could affect companies, general business and market conditions, prices and yields of securities in which the Scheme invest.

The occurrence of selective unrest or external tensions could adversely affect the political and economic stability of India and consequently have an impact on the securities in which the Scheme invests. Delays or changes in the development of conducive policy frameworks could also have an impact on the securities in which the Scheme invests.

2. Economic Risk

A slowdown in economic growth or macro-economic imbalances such as the increase in central and state level fiscal deficits may adversely affect investments in the country. The underlying growth in the economy is expected to have a direct impact on the volume of new investments in the country.

3. Foreign Currency Risk

The Scheme is denominated in Indian Rupees (INR) which is different from the home currency for Foreign Investors in the mutual fund Units. The INR value of investments when translated into home currency by Foreign Investors could be lower because of the currency movements. The AMC does not manage currency risk for foreign investors and it is the sole responsibility of the Foreign Investors to manage or reduce currency risk on their own. The Sponsor/Fund/Trustees/AMC are not liable for any loss to Foreign Investors arising from such changes in exchange rates.

4. Convertibility and Transferability Risk

In the event capital and exchange controls are imposed by the government authorities, it would prevent Foreign Investors' ability to convert INR into home currency and/or transfer funds outside India. The convertibility and transferability of INR proceeds into home currency is the responsibility of the Foreign Investors.

Scheme Specific Risk Factors

1. Risks associated with investing in Fixed income securities including fixed rate debt instruments swapped for floating rate return and floating rate debt instruments swapped for fixed rate return

a. Market Liquidity Risk

The liquidity of investments made in the Scheme may be restricted by trading volumes, settlement periods and transfer procedures.

Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. There have been times in the past, when settlements have been unable to keep pace with the volume of securities transactions, making it difficult to conduct further transactions. Delays or other problems in settlement of transactions could result in temporary periods when the assets of the Scheme are uninvested and no return is earned thereon. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. By the same token, the inability to sell securities held in the Scheme's portfolio, due to the absence of a well-developed and liquid secondary market for debt securities, would result at times, in potential losses to the Scheme, should there be a subsequent decline in the value of securities held in the Scheme's portfolio.

Money market securities, while fairly liquid, lack a well-developed secondary market, which may restrict the selling ability of the Scheme and may lead to the Scheme incurring losses till the security is finally sold.

b. Credit Risk

Fixed income securities (government, debt and money market securities) are subject to the risk of an issuer's inability to meet interest and principal payments on its debt obligations. The Investment Manager will endeavour to manage credit risk through in-house credit analysis.

Different types of securities in which the Scheme would invest as given in the SID carry different levels of credit risk. Accordingly, the Scheme's risk may increase or decrease depending upon their investment patterns. E.g. corporate bonds carry a higher amount of risk than Government securities. Further, even among corporate bonds, bonds which are rated AAA are comparatively less risky than bonds which are AA rated.

c. Term Structure of Interest Rates (TSIR) Risk

The NAV of the Scheme's Units, to the extent that the Scheme is invested in fixed income securities, will be affected by changes in the general level of interest rates. When interest rates decline, the value of a portfolio of fixed income securities can be expected to rise. Conversely, when interest rates rise, the value of a portfolio of fixed income securities can be expected to decline.

d. Rating Migration Risk

Fixed income securities are exposed to rating migration risk, which could impact the price on account of change in the credit rating. For example: One notch downgrade of a AAA rated issuer to AA+ will have an adverse impact on the price of the security and vice-versa for an upgrade of a AA+ issuer.

e. Re-investment Risk

The investments made by the Scheme is subject to reinvestment risk. This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk is that the rate at which interim cash flows can be reinvested may be lower than that originally assumed.

f. Pre-payment Risk

Certain fixed income securities give an issuer the right to call back its securities before their maturity date, in periods of declining interest rates. The possibility of such prepayment may force

the fund to reinvest the proceeds of such investments in securities offering lower yields, resulting in lower interest income for the fund.

g. Risk from zero coupon securities

As zero coupon securities do not provide periodic interest payments to the holder of the security, these securities are more sensitive to changes in interest rates. Therefore, the interest rate risk of zero coupon securities is higher. The AMC may choose to invest in zero coupon securities that offer attractive yields. This may increase the risk of the portfolio.

h. Investment in unrated securities

The scheme may invest in unrated securities as permitted under regulation. Investment in unrated securities involve a risk of default or decline in market value higher than rated instruments due to adverse economic and issuer-specific developments. Such investments display increased price sensitivity to changing interest rates and to a deteriorating economic environment. The market values for unrated investments tends to be more volatile and such securities tend to be less liquid than rated debt securities.

i. Investment in unlisted securities

The scheme may invest in unlisted securities as permitted under regulation. Investment in unlisted securities are subject to greater risk related to price fluctuations, less liquidity. Due to lack of secondary market unlisted securities are subject to higher decline in market value than listed instruments in case of any adverse economic and issuer-specific developments. Such investments display increased price sensitivity to changing interest rates and to a deteriorating economic environment. There can be no assurance that the schemes will realise the fair value of the investment due to aforementioned reason. The asset managers will ensure limited exposure and will endeavor to investment in unlisted securities with high rated issuers.

2. Additional risks of investing in floating rate debt instruments or fixed rate debt instruments swapped for floating rate return

- a) Interest rate movement (Basis Risk): As the fund will invest in floating rate instruments, these instruments' coupon will be reset periodically in line with the benchmark index movement. Normally, the interest rate risk of a floating rate instrument compared to a fixed rate instrument is limited. The changes in the prevailing rates of interest will likely affect the value of the Scheme's holdings until the next reset date and thus the value of the Scheme's Units. Increased rates of interest, which frequently accompany inflation and / or a growing economy, are likely to have a negative effect on the value of the Units. The value of securities held by the Scheme generally will vary inversely with changes in prevailing interest rates. The fund could be exposed to the interest rate risk (i) to the extent of time gap in resetting of the benchmark rates, and (ii) to the extent the benchmark index fails to capture the interest rate movement.
- b) Spread Movement (Spread Risk): Though the basis (i.e. benchmark) gets readjusted on a regular basis, the spread (i.e. markup) over benchmark remains constant. This can result in some volatility to the holding period return of floating rate instruments.
- c) Counterparty & Settlement Risk: The floating rate assets may also be created by swapping a fixed return to a floating rate return. In such a swap, there may be an additional risk of counterparty who will pay floating rate return and receive fixed rate return.
- d) Liquidity Risk: There may be increased degree of liquidity risk in the portfolio on account of holding of the floating rate debt instruments as they tend to have lower liquidity in comparison to the fixed rate debt instruments.

3. Risk associated with investments in repo of corporate debt securities

In repo transactions, also known as a repo or sale repurchase agreement, securities are sold with the seller agreeing to buy them back at later date. The repurchase price should be greater than the original sale price, the difference effectively representing interest. A repo is economically similar to a secured loan, with the buyer receiving corporate debt securities as collateral to protect against

default. The Scheme may invest in repo of corporate debt securities which are subject to the below risks. The Scheme may also participate in tri-party repo as per prescribed guidelines of RBI and SEBI

- a) Counterparty Risk: This refers to the inability of the seller to meet the obligation to buy back securities at the contracted price. The Investment Manager will endeavor to manage counterparty risk by dealing only with counterparties having strong credit profiles assessed through in-house credit analysis
- b) Collateral Risk: In the event of default by the repo counterparty, the scheme will have recourse to the corporate debt securities. Collateral risk arises when the market value of the securities is inadequate to meet the repo obligations. This risk is mitigated by restricting participation in repo transactions only in AA and above rated money market and corporate debt securities. In addition, appropriate haircuts will be applied on the market value of the underlying securities to adjust for the illiquidity and interest rate risk on the underlying instrument.

4. Risk associated with investments in debt instruments having Structured Obligations / Credit Enhancements

The Scheme may invest in debt instruments having credit enhancement (backed by assets such as equity shares/real estate or backed by payment mechanisms such as guarantees/ escrows of identified revenue streams). Typically, in such instruments, the profile of the underlying issuer tends to be relatively weaker. The risks with such credit enhanced structures include inability to sell and realise the collateral due to sharp prices moves of the underlying collateral values, erosion in collateral values, illiquidity of collateral. There is a possibility of the guarantor or underlying issuer going insolvent which also can impact the recovery value of exposure. These instruments are typically less liquid in the secondary market which is an additional risk factor. In case of complex payment mechanisms, these may be challenged in legal courts by the unsecured creditors in case of bankruptcy of the underlying obligors which may result in delays or defaults in payments.

5. Risks Associated with Transaction in Units Through Stock Exchange Mechanism

In respect of transactions in Units of the Scheme through NSE and/or BSE or any other recognized stock exchange, allotment and redemption of Units on any Business Day will depend upon the order processing/settlement by NSE, BSE or such other exchange and their respective clearing corporations on which the Mutual Fund has no control. Further, transactions conducted through the stock exchange mechanism shall be governed by the operating guidelines and directives issued by NSE, BSE or such other recognized exchange in this regard.

6. Risks Associated with Derivatives

The Scheme may invest in fixed income derivatives for swap of fixed rate debt instruments swapped to floating rate or floating rate debt instruments swapped to fixed rate, hedging and portfolio rebalancing or any other purposes as may be permitted under regulatory guidelines. The Scheme may use derivative instruments like Interest Rate Swaps, Forward Rate Agreements or other derivative as may be permitted by SEBI / RBI / such other Regulatory Authority from time to time.

The use of derivatives may expose the Scheme to a higher degree of risk. In particular, derivative contracts can be highly volatile, and the amount of initial margin is generally small relative to the size of the contract so that transactions may be leveraged in terms of market exposure. A relatively small market movement may have a potentially larger impact on derivatives than on standard bonds or equities. Leveraged derivative positions can therefore increase Scheme volatility.

Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor. Execution of such strategies depends upon the ability of the fund manager to identify such opportunities. Identification and execution of the strategies to be pursued by the fund manager involve uncertainty and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

Derivatives require the maintenance of adequate controls to monitor the transactions and the embedded market risks that they add to the portfolio. Besides the price of the underlying asset, the volatility, tenor and interest rates affect the pricing of derivatives. Identification and execution of the strategies to be pursued involve uncertainty and decision of the Investment Manager may not

always be profitable. No assurance can be given that the Investment Manager will be able to identify or execute such strategies.

Other risks in using derivatives include but are not limited to:

- a. Counterparty Risk this occurs when a counterparty fails to abide by its contractual obligations and therefore, the Schemes are compelled to negotiate with another counter party, at the then prevailing (possibly unfavourable) market price. For exchange traded derivatives, the risk is mitigated as the exchange provides the guaranteed settlement but one takes the performance risk on the exchange
- b. Market Liquidity risk this occurs where the derivatives cannot be transacted due to limited trading volumes and/or the transaction is completed with a severe price impact.
- c. Model Risk the risk of mispricing or improper valuation of derivatives
- d. Basis Risk arises due to a difference in the price movement of the derivative vis-à-vis that of the security being hedged

7. Risk Factors Associated with Imperfect Hedging using Interest Rate Futures

a. Basis Risk

Risk associated with divergence in the price movement of the portfolio being hedged and the price movement of the derivative serving as the hedge e.g. a loss (gain) in the market value of bonds in the portfolio (or the part thereof that is being hedged), may be accompanied by a disproportionate gain (loss) in the market value of the derivatives being used to serve as the hedge. This imperfect correlation between the two investments creates the potential for excess gains or losses in a hedging strategy, thus adding risk to the position.

b. Mispricing Risk, or improper valuation

Market circumstances may necessitate unwinding the derivative positions at sub-optimal prices during periods of market dislocation triggered by contagion or tumult e.g. if the expected upward trajectory of yields reverses course and begins to spiral downward, most participants with short Interest Rate Futures positions are likely to seek an unwinding, leading to a potential amplification in the adverse price movement, and impact therefrom.

c. Correlation weakening, and consequent risk of regulatory breach

SEBI regulation mandates minimum correlation criteria of 0.9 (calculated on a 90-day basis) between the portfolio being hedged and the derivative serving as the hedge; in cases where this limit is breached (i.e. when the 90-day correlation falls below 0.9), a rebalancing period of 5 working days has been permitted.

Inability to satisfy this requirement within the stipulated period due to difficulties in re-balancing would lead to a lapse of the exemption in gross exposure computation. The entire derivative exposure would then need to be included in gross exposure, which may result in gross exposure in excess of 100% of net asset value; leverage is not permitted as per SEBI guidelines.

8. Risks associated with Securities Lending & Borrowing and Short Selling

Securities Lending and Borrowing ("SLB") is an exchange traded product in India, with trades done on order matching platforms setup by the clearing corporation/house of recognized stock exchanges. In accordance with SEBI guidelines, there is a robust risk management system and safeguards exercised by the clearing corporation/house, which also guarantee financial settlement hence eliminating counterparty risk on borrowers.

The Scheme may participate as a lender in the SLB market and lend securities held in the portfolio for earning fees from such lending to enhance revenue of the Scheme. The key risk to the Scheme is creation of temporary illiquidity due to the inability to sell such lent securities, till the time such securities are returned on the contractual settlement date or on exercise of early recall.

The Scheme may enter into short selling transactions in accordance with the guidelines prescribed by SEBI. The key risk to the Scheme is increase in the price of such securities, requiring the Scheme to

purchase the securities sold short to cover the position even at unreasonable prices resulting in a loss to the Scheme.

9. Risks associated with segregated portfolio

- a. Investor holding units of segregated portfolio may not able to liquidate their holding till the time recovery of money from the issuer.
- b. Security comprises of segregated portfolio may not realise any value.

Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

10. Risk factors associated with investment in Tri-Party Repo

The mutual fund is a member of securities segment and Triparty Repo trade settlement of the Clearing Corporation of India (CCIL). All transactions of the mutual fund in government securities and in Triparty Repo trades are settled centrally through the infrastructure and settlement systems provided by CCIL; thus reducing the settlement and counterparty risks considerably for transactions in the said segments. The members are required to contribute an amount as communicated by CCIL from time to time to the default fund maintained by CCIL as a part of the default waterfall (a loss mitigating measure of CCIL in case of default by any member in settling transactions routed through CCIL). As per the waterfall mechanism, after the defaulter's margins and the defaulter's contribution to the default fund have been appropriated, CCIL's contribution is used to meet the losses. Post utilization of CCIL's contribution if there is a residual loss, it is appropriated from the default fund contributions of the non-defaulting members. Thus the scheme is subject to risk of the initial margin and default fund contribution being invoked in the event of failure of any settlement obligations. In addition, the fund contribution is allowed to be used to meet the residual loss in case of default by the other clearing member (the defaulting member). CCIL shall maintain two separate Default Funds in respect of its Securities Segment, one with a view to meet losses arising out of any default by its members from outright and repo trades and the other for meeting losses arising out of any default by its members from Triparty Repo trades. The mutual fund is exposed to the extent of its contribution to the default fund of CCIL, in the event that the contribution of the mutual fund is called upon to absorb settlement/ default losses of another member by CCIL, as a result the scheme may lose an amount equivalent to its contribution to the default fund.

11. Backstop facility in form of investment in Corporate Debt Market Development Fund (CDMDF):

CDMDF is set up as a scheme of the Trust registered as an Alternative Investment Fund ('AIF') in accordance with the SEBI (Alternative Investment Funds) Regulations, 2012 ("AIF Regulations"). The objective of the CDMDF is to help to develop the corporate debt market by providing backstop facility to instill confidence amongst the market participants in the corporate debt/bond market during times of market dislocation and to enhance the secondary market liquidity. In times of market dislocation, CDMDF shall purchase and hold eligible corporate debt securities from the participating investors (i.e., specified debt-oriented MF schemes to begin with) and sell as markets recover. The CDMDF will thus act as a key enabler for facilitating liquidity in the corporate debt market and to respond quickly in times of market dislocation. The trigger and period for which the backstop facility will be open shall be as decided by SEBI. Thus this backstop facility will help fund managers of the scheme of DSP Mutual Fund to better generate liquidity during market dislocation to help the scheme fulfill liquidity obligations under stress situation.

In accordance with the requirement of regulation 43A of SEBI (Mutual Funds) Regulations, 1996 read with SEBI circular no. SEBI/HO/IMD/PoD2/P/CIR/2023/129 dated July 27, 2023 on Investment by Mutual Fund Schemes in units of Corporate Debt Market Development Fund, the scheme shall invest 25 bps of its AUM as on December 31, 2022 in the units of the Corporate Debt Market Development Fund ('CDMDF'). An incremental contribution to CDMDF shall be made every six months to ensure 25 bps of scheme AUM is invested in units of CDMDF. However, if AUM decreases there shall be no return or redemption from CDMDF. Contribution made to CDMDF, including the appreciations on the same, if any, shall be locked-in till winding up of the CDMDF.

We would further like to bring to the notice of the investors that pursuant to SEBI circular no. SEBI/HO/IMD/PoD2/P/CIR/2023/129 dated July 27, 2023 read with SEBI circular no. SEBI/HO/IMD/PoD2/ P/CIR/ 2023/152 dated September 06, 2023 & any other circulars/ guidelines/ letters issued by SEBI / AMFI from time to time, the calculations of Potential Risk Class (PRC) Matrix, asset allocation limits, Risk-o-meter, Stress testing and Duration for various purposes shall be done after excluding investments in units of CDMDF wherever applicable. Additionally, in terms of aforesaid circular, the investments in CDMDF units shall not be considered as violation while considering maturity restriction as applicable for various purposes.

Investors are requested to read details disclosure on investment of the schemes in the CDMDF as listed in sub- section "C. How will the Scheme allocate its assets?" And sub-section "D. Where will the Scheme Invest?" in Section "Section II- Information about the scheme".

RISK MANAGEMENT STRATEGIES

1. Market Liquidity Risk

The liquidity risk will be managed and/or sought to be addressed by creating a portfolio which has adequate access to liquidity. Market Liquidity Risk will be managed actively within the portfolio liquidity limits. The first access to liquidity is through cash and fixed income securities. Market Liquidity Risk will be managed actively within the portfolio liquidity limits by maintaining mandated asset-liability match to ensure payout of the obligations.

2. Credit Risk

Credit Risk associated with Fixed Income securities will be managed by making investments in securities issued by borrowers, which have a very good credit profile and based on in-depth analysis conducted by the credit research team. Limits are assigned for each of the issuer (other than government of India); these limits are for the amount as well as maximum permissible tenor for each issuer. The credit process ensures that issuer level review is done at inception as well as periodically by taking into consideration the balance sheet and operating strength of the issuer.

3. Term Structure of Interest Rates (TSIR) Risk

The Scheme is expected to have duration based on the investment objective and limits defined in the scheme documents. Depending on the nature of the scheme, the Term Structure of Interest Rates (TSIR) Risk cannot be eliminated and it exists as a primary feature of the scheme.

Since the portfolio will pre-dominantly be invested in floating rate instruments, the TSIR risk is expected to be low.

4. Rating Migration Risk

The endeavor is to invest in well researched issuers. The due diligence performed by the fixed income team before assigning credit limits and the periodic credit review and monitoring should help keep the rating migration risk low for company-specific issues.

5. Re-investment Risk

The Investment Manager will endeavor that besides the tactical and/or strategic interest rate calls, the portfolio is fully invested.

Since it is a floating rate fund, higher re-investment risk is a feature of the scheme.

6. Risk associated with investments in repo of corporate debt securities

The Investment Manager will endeavor to manage counterparty risk in corporate debt repos by dealing only with counterparties having strong credit profiles or through tri-party corporate repos done on the exchange platforms. The collateral risk is mitigated by restricting participation in repo transactions only in AA and above rated money market and corporate debt securities, where potential for downgrade/default is low. In addition, appropriate haircuts are applied on the market value of the underlying securities to adjust for the illiquidity and interest rate risk on the underlying instrument.

7. Risks associated with fixed income Derivative investments:

Investment managers will ensure adherence to the limits and the guidelines as issued by SEBI / RBI from time to time for forward rate agreements and interest rate swaps and other fixed income derivative products.

Investors can refer to the circular 135/ BP/93/ 2021-22 dated July 24, 2021 and subsequent circulars for detail understanding on the Liquidity Risk Management Framework.

- 3. Stress testing the scheme portfolio: The investment manager periodically stress test the scheme portfolio to addresses the asset side risk from an Interest Rate, Credit and Liquidity Risk perspective at an aggregate portfolio level and evaluate the stress in terms of its impact on the NAV of the scheme. The stress test is performed using the methodology and periodicity as mandated by AMFI in consultation to SEBI

Overview of Debt Market in India

The Indian bond market comprises mainly of Government securities; State Development Loans (SDL), bonds issued by Public Sector Undertakings (PSU), Development Financial Institutions (DFI) and Infrastructure-related agencies; debentures and money market instruments issued by corporate sectors and banks. The Government of India routinely issues Government securities and Treasury bills for liquidity and fiscal management. While the Government issues Treasury bills for 91 days, 182 days and 364 days in a discounted form, coupon-bearing Government securities are issued for maturity ranging from 1 year to as high as 50 years. Both Treasury bills and coupon-bearing securities are auctioned by the RBI on behalf of the Government of India. The Indian bond market has also witnessed issuance of bonds from Government-sponsored institutions, DFIs, and infrastructure-related agencies. These bonds are rated by credit rating agencies like CRISIL, ICRA, CARE and India Ratings. They are widely held by market participants because of their liquidity and reduced risk perception due to the government stake in some of them.

The Indian corporate sector has also been frequently raising capital through issuance of non-convertible debentures and commercial papers. These debentures/commercial Papers are mostly rated by rating agencies like CRISIL, ICRA, CARE and India Ratings. There is an active and vibrant secondary market for these debentures/commercial Papers. These normally trade at a marginally higher yield than bonds issued by PSU and other government-sponsored agencies.

Overview of Money Market in India

Money market instruments includes commercial papers, commercial bills, treasury bills, Government securities having an unexpired maturity up to one year, call or notice money, certificate of deposit, usance bills, and any other like instruments as specified by the Reserve Bank of India from time to time. Money market assets are liquid and actively traded segment of fixed income markets.

Treasury bills are issued by the Government of India through regular weekly auctions, while Cash Management Bills are issued on an ad-hoc basis. They are mostly subscribed by banks, state governments, mutual funds and other entities. As on 1 Dec 2023, total outstanding treasury bills are Rs. 8,59,304 crore*.

Certificate of Deposits are issued by scheduled banks for their short-term funding needs. They are normally available for up to 365 days tenor. Certificate of deposits issued by public sector banks are normally rated A1+ (highest short-term rating) by various rating agencies. As on 1 Dec 2023, outstanding Certificate of Deposits are Rs. 3,15,780 crore*. Certificate of deposits currently trade at a spread of around 67 basis points** over comparable treasury bills as on 13 Dec 2023, for a one-year tenor.

Commercial Papers are issued by corporate entities for their short-term cash requirements. Commercial Papers are normally rated A1+ (highest short-term rating). As on 30 Nov 2023, total outstanding Commercial Papers are Rs. 3,94,968 crore*. Commercial papers trade at around 100 basis points** over comparable treasury bills as on 13 Dec 2023, for a one-year tenor.

Call Money, TREPS and CROMS are mainly used by the borrowers to borrow a large sum of money on an over-night basis. While Call Money is an unsecured mode of borrowing, TREPS and CROMS are secured borrowing backed by collaterals approved by the Clearing Corporation of India.

E. WHAT ARE THE INVESTMENT STRATEGIES?

The scheme aims to invest a minimum of 65% in floating rate debt securities and allocation to other debt securities (including money market instruments, cash and cash equivalents & Floating rate debt instruments swapped for Fixed rate returns) would remain between 0% to 35%. Floating rate exposure can also be created synthetically with a combination of fixed rate securities & derivatives like Interest Rate Swaps etc. The scheme intends to use derivatives as permitted by RBI/SEBI for hedging interest rate risk.

The aim of the investment manager will be to allocate assets of the scheme across floating rate securities (including synthetically created floating rate securities) & other debt securities (including money market instruments, cash and cash equivalents & Floating rate debt instruments swapped for Fixed rate returns) with an objective of generating optimal risk adjusted returns. The actual percentage of investments in various floating rate securities (including synthetically created floating rate securities) and other debt securities (including money market instruments, cash and cash

equivalents & Floating rate debt instruments swapped for Fixed rate returns) will be decided based on interest rate direction based on in-house fixed income framework (tracks various domestic and global factors like Fiscal Deficit, Current Account Deficit, Inflation, Growth, Currency, Dollar Index, US interest rates) and after considering other factors like the prevailing political conditions, etc.

Strategy for Fixed Income Securities

The Investment Manager will conduct in-house research in order to identify various investment opportunities. The company-wise analysis will focus, amongst others, on the historical and current financial condition of the company, potential value creation/unlocking of value and its impact on earnings growth, capital structure, business prospects, policy environment, strength of management, responsiveness to business conditions, product profile, brand equity, market share, competitive edge, research, technological knowhow and transparency in corporate governance. The Investment Manager will invest only in those debt securities that are rated investment grade by a domestic credit rating agency such as CRISIL, ICRA, CARE, FITCH etc. or in unrated debt securities which the Investment Manager believes to be of equivalent quality. In the case of unrated debt securities, the approval of the Board of Directors of the AMC and Trustee shall be obtained prior to investment.

Portfolio Turnover

Portfolio turnover is defined as the lower of the aggregate value of purchases or sales as a percentage of the corpus of a scheme during a specified period of time. This will exclude purchases and sales of money market securities. The Scheme is open ended, with subscriptions and redemptions expected on a daily basis, resulting in net inflow/outflow of funds, and on account of the various factors that affect portfolio turnover; it is difficult to give an estimate, with any reasonable amount of accuracy.

Therefore, the Scheme has no specific target relating to portfolio turnover.

Trading in Derivatives

The Mutual Fund may use various derivatives and hedging products/ techniques, in order to seek to generate better returns for the Scheme. Derivatives are financial contracts of pre-determined fixed duration, whose values are derived from the value of an underlying primary financial instrument, commodity or index.

Advantages of Trading in Derivatives

Advantages of derivatives are many. The use of derivatives provides flexibility to the Schemes to hedge whole or part of the portfolio. The following section describes some of the more common derivatives transactions along with their benefits:

Derivatives are financial contracts of pre-determined fixed duration, whose values are derived from the value of an underlying primary financial instrument, commodity or index, such as interest rates, exchange rates, commodities and equities.

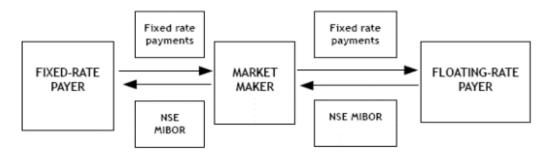

1. Interest Rate Swap (IRS)

Any swap is effectively an exchange of one set of cash-flows for another considered to be of equal value. If the exchange of cash flows is linked to interest rates, it becomes an interest rate swap. An interest rate swap is an agreement between two parties to exchange future payment streams based on a notional amount. Only the interest on the notional amount is swapped, and the principal amount is never exchanged.

In a typical interest rate swap, one party agrees to pay a fixed rate over the term of the agreement and to receive a variable or floating rate of interest. The counterparty receives a stream of fixed rate payments at regular intervals as described in the agreement and pays the floating rate of interest. A fixed/ floating interest rate swap is characterized by:

- 1. Fixed interest rate;
- 2. Variable or floating interest rate, which is periodically reset;
- 3. Notional principal amount upon which total interest payments are based; and
- 4. The terms of the agreement, including a schedule of interest rate reset dates, payment dates and termination date.

The primary reason for engaging in an interest rate swap is to hedge the interest rate exposure. An illustration could be an institution having long-term fixed rate assets (longer tenor securities receiving fixed rate) in a rising interest rate environment; it can hedge the interest rate exposure by purchasing an interest rate swap where the institution receives floating interest rate and pays fixed rate. In this case, an interest rate swap is likely to reduce the duration and interest rate volatility of the fund.

Example:

Terms:

Fixed Interest Rate : 8.50% p.a.

Variable Interest Rate: NSE Over-Night MIBOR reset daily and compounded daily

Notional Principal Amount : Rs.100 Crore

Period of Agreement : 1 year Payment Frequency : Semi-annual

Now, suppose the six-month period from the effective date of the swap to the first payment date comprises 182 days and the daily compounded NSE Over-Night MIBOR is 8.15% p.a. on the first payment date, then the fixed and variable rate payment on the first payment date would be as follows:

Fixed rate payment:

Rs. $4,23,83,562 = (Rs.100,00,00,000) \times (8.50\%) \times (182 Days / 365 Days)$

Variable rate payment:

Rs. $4.06.38,356 = (Rs.100,00,00,000) \times (8.15\%) \times (182 Days / 365 Days)$

Often, a swap agreement will call for only the exchange of net amount between the counterparties. In the above example, the fixed-rate payer will pay the variable-rate payer a net amount of Rs. 17,45,205 = Rs. 4,23,83,562 - Rs. 4,06,38,356.

The second and final payment will depend on the daily NSE MIBOR compounded daily for the remaining 183 days. The fixed rate payment will also change to reflect the change in holding period from 182 days to 183 days.

2. Forward Rate Agreement (FRA)

An FRA is an off balance sheet agreement to pay or receive on an agreed future date, the difference between an agreed interest rate and the interest rate actually prevailing on that future date, calculated on an agreed notional principal amount. It is settled against the actual interest rate prevailing at the beginning of the period to which it relates rather than paid as a gross amount. An FRA is referred to by the beginning and end dates of the period covered. Thus a 5x8 FRA is one that covers a 3-month period beginning in 5-months and ending in 8-months. FRAs are purchased to hedge the interest rate risk; an investor facing uncertainty of the interest rate movements can fix

the interest costs by purchasing an FRA.

An illustration could be a corporation having floating rate debt linked to an index such as say, 3-Month MIBOR. If the existing interest cost is at 8% on Rs.100 Crore for the next three months, the corporation can purchase a 3x6 FRA @ 8.1% on Rs.100 Crore and fix the interest cost for the 3-6 months period. If the actual 3-Month MIBOR after 3-months is at 8.25%, the corporation has saved 15 bps in interest cost. As the settlement is done at the beginning of the period, the savings in interest expense are discounted to a present value using a 3-month rate to calculate the actual settlement amount.

The flows for the institution will be, as follows:
Interest Savings = Rs. 100 Crore * 15 bps * 92/365
(assuming 92 days in the 3 month FRA period and 365 days in the conventional year)
= Rs.3,78,082.19
Settlement Amount = Rs.3,78,082.19/ (1+8.25%*92/365)

Please note that the above examples are hypothetical in nature and the figures are assumed.

3. Interest Rate Futures

An Interest Rate Futures ('IRF') contract is "an agreement to buy or sell a debt instrument at a specified future date at a price that is fixed today." The underlying security for Interest Rate Futures is either Government Bond or T-Bill. Interest Rate Futures are Exchange traded and standardized contracts based on 6 year, 10 year and 13 year Government of India Security and 91-day Government of India Treasury Bill (91DTB). These future contracts are cash settled. These instruments can be used for hedging the underlying cash positions.

The overall gross exposure for a fund is computed as sum of exposure to equity, cash, debt instruments and derivatives (other than for hedging purposes) and it should not be more than 100%. Derivative position is considered to be for hedging purposes only if the following conditions are met:

- 1. Perfect Hedging We hedge the underlying using IRF contract of same underlying
- 2. Imperfect hedging the Underlying being hedged and the IRF contract has a 90 day correlation of closing prices of more than 90%. In case of correlation breaking at any time the derivative position would be counted as an exposure. SEBI allows maximum of 20% imperfect hedging.

For example, assume a portfolio comprising the following structure:

Security	Amount (crs)	Price (Rs)
IGB 6.79% 2027	100	100.40
IGB 6.79% 2029	50	98.35
IGB 7.72% 2025	25	104.55
Cash	25	
Total	200	

Assuming the fund manager intends to hedge the portfolio using IRF and uses contracts on IGB 6.79% 2027 as it is most liquid.

Maximum imperfect hedging allowed, based on SEBI limit of 20% for the above fund is 200*20% = 40 crs

Maximum perfect hedging using 6.79% 2027 is 100 crs (as amount of 6.79% 2027 in the fund is 100 crs) Total hedge the fund can do = 100 crs + 40 crs = 140 crs

Assuming the 90 day historical correlation between the instruments in the portfolio are as follows:

90 day historical correlation	IGB 6.799 2027	IGB 6.79% 2029	IGB 7.72% 2025
IGB 6.79% 2027	1	0.95	0.80
IGB 6.79% 2029	0.95	1	0.75
IGB 7.72% 2025	0.80	0.75	1

Given that we are using IRF on 6.79% 2027, we can hedge 6.79% 2029 using IRFs as correlation is more than 90% upto 40 crs (based on the 20% limit of imperfect hedging).

Since one contract of IRF has a notional of Rs. 2 lakhs, in this example the fund manager sells Rs. 140 crores/2 lakhs = 7000 contracts, to hedge his position.

Hence after hedging the fund is as shown below:

Security	Amount (crs)	Price (Rs)	Comments
IGB 6.79% 2027	100	100.40	100% hedged - Perfect hedging
IGB 6.79% 2029	50	98.35	40% hedged - Imperfect hedging

IGB 7.72% 2025	25	104.55	Unhedged
Cash	25		Unhedged
IRF 6.79% 2027	140	100.35	
Total	200		

At maturity of the Interest Rate Futures

Case 1: bonds close higher than at the time the hedge was entered into

Security	Amount (crs)	Price before hedging(Rs)	Price on maturity of hedge (Rs)	Gain	Net Gain (lakhs)
IGB 6.79% 2027	100	100.4	100.5	0.1	10.00
IGB 6.79% 2029	50	98.35	98.5	0.15	7.50
IGB 7.72% 2025	25	104.55	104.6	0.05	1.25
Cash	25				-
Without IRF					18.75
IRF 6.79% 2027	140	100.35	100.5	-0.15	(21.00)
Total With IRF	200				(2.25)

Case 2: bonds close lower than at the time the hedge was entered into

Security	Amount	Price before	Price on	Gain	Net Gain
	(crs)	hedging	maturity of		(lakhs)
			hedge (Rs)		
IGB 6.79% 2027	100	100.4	100.3	-0.1	(10.00)
IGB 6.79% 2029	50	98.35	98.23	-0.12	(6.00)
IGB 7.72% 2025	25	104.55	104.5	-0.05	(1.25)
Cash	25				-
Without IRF					(17.25)
IRF 6.79% 2027	140	100.35	100.3	0.05	7.00
Total with IRF	200				(10.25)

As can be seen in the cases above, in case yields move higher, IRFs help in reducing the loss to the fund.

Exposure Limits:

With respect to investments made in derivative instruments, the Schemes shall comply with the following exposure limits in line with clause 12.24.1 and clause 12.25 of the SEBI Master Circular read with clause 12.24 of the SEBI Master Circular:

- c. Any derivative instrument used to hedge has the same underlying security as the existing position being hedged.
- d. The quantity of underlying associated with the derivative position taken for hedging purposes does not exceed the quantity of the existing position against which hedge has been taken.
- 5. (a) Mutual Funds may enter into plain vanilla Interest Rate Swaps (IRS) for hedging purposes. The value of the notional principal in such cases must not exceed the value of respective existing assets being hedged by the scheme.
 - (b) In case of participation in IRS is through over the counter transactions, the counter party has to be an entity recognized as a market maker by RBI and exposure to a single counterparty in such transactions should not exceed 10% of the net assets of the scheme. However, if mutual funds are transacting in IRS through an electronic trading platform offered by the Clearing Corporation of India Ltd. (CCIL) and CCIL is the central counterparty for such transactions guaranteeing settlement, the single counterparty limit of 10% shall not be applicable.
- 6. Exposure due to derivative positions taken for hedging purposes in excess of the underlying position against which the hedging position has been taken, shall be treated under the limits mentioned in point 1.
- 7. Definition of Exposure in case of Derivative Positions:

Each position taken in derivatives shall have an associated exposure as defined under. Exposure is the maximum possible loss that may occur on a position. However, certain derivative positions may theoretically have unlimited possible loss. Exposure in derivative positions shall be computed as follows:

Position	Exposure
Long Future	Futures Price * Lot Size * Number of Contracts
Short Future	Futures Price * Lot Size * Number of Contracts

 - Investors subscribing to the scheme will be allotted units only in the main portfolio based on its NAV.
- ii. In case trustees do not approve the proposal of segregated portfolio, subscription and redemption applications will be processed based on the NAV of total portfolio.

TER for the Segregated Portfolio

1) AMC will not charge investment and advisory fees on the segregated portfolio. However, TER (excluding the investment and advisory fees) can be charged, on a pro-rata basis only upon recovery of the investments in segregated portfolio.

- 2) The TER so levied shall not exceed the simple average of such expenses (excluding the investment and advisory fees) charged on daily basis on the main portfolio (in % terms) during the period for which the segregated portfolio was in existence. In addition to the TER mentioned above, the legal charges related to recovery of the investments of the segregated portfolio may be charged to the segregated portfolio as mentioned below.
- 3) The legal charges related to recovery of the investments of the segregated portfolio may be charged to the segregated portfolio in proportion to the amount of recovery. However, the same shall be within the maximum TER limit as applicable to the main portfolio. The legal charges in excess of the TER limits, if any, shall be borne by the AMC.
- 4) The costs related to segregated portfolio shall in no case be charged to the main portfolio.

Explanations:

- 1) The term 'segregated portfolio' means a portfolio, comprising of debt or money market instrument affected by a credit event that has been segregated in a mutual fund scheme.
- 2) The term 'main portfolio' means the scheme portfolio excluding the segregated portfolio.
- 3) The term 'total portfolio' means the scheme portfolio including the securities affected by the credit event.

Risks associated with segregated portfolio

- 1. Investor holding units of segregated portfolio may not able to liquidate their holding till the time recovery of money from the issuer.
- 2. Security comprises of segregated portfolio may not realise any value.
- 3. Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

Disclosure Requirements:

In order to enable the existing as well as the prospective investors to take informed decision, the following shall be adhered to:

- a. A statement of holding indicating the units held by the investors in the segregated portfolio along with the NAV of both segregated portfolio and main portfolio as on the day of the credit event shall be communicated to the investors within 5 working days of creation of the segregated portfolio.
- b. Adequate disclosure of the segregated portfolio shall appear in all scheme related documents, in fortnightly and half-yearly portfolio disclosures and in the annual report of the Mutual Fund and the Scheme.
- c. The Net Asset Value (NAV) of the segregated portfolio shall be declared on daily basis.
- d. The information regarding number of segregated portfolios created in a scheme shall appear prominently under the name of the scheme at all relevant places such as SID, KIM-cum-Application Form, advertisement, AMC and AMFI websites, etc.
- e. The scheme performance required to be disclosed at various places shall include the impact of creation of segregated portfolio. The scheme performance shall clearly reflect the fall in NAV to the extent of the portfolio segregated due to the credit event and the said fall in NAV along with recovery (ies), if any, shall be disclosed as a footnote to the scheme performance.
- f. The disclosures at paragraph 7(d) and 7(e) above regarding the segregated portfolio shall be carried out for a period of at least 3 years after the investments in segregated portfolio are fully recovered/ written-off.
- g. The investors of the segregated portfolio shall be duly informed of the recovery proceedings of the investments of the segregated portfolio. Status update may be provided to the investors at the time of recovery and also at the time of writing-off of the segregated securities.

Monitoring by Trustees:

- a. In order to ensure timely recovery of investments of the segregated portfolio, trustees shall ensure that:
 - i. The AMC puts in sincere efforts to recover the investments of the segregated portfolio.

- ii. Upon recovery of money, whether partial or full, it shall be immediately distributed to the investors in proportion to their holding in the segregated portfolio. Any recovery of amount of the security in the segregated portfolio even after the write off shall be distributed to the investors of the segregated portfolio.
- iii. An Action Taken Report (ATR) on the efforts made by the AMC to recover the investments of the segregated portfolio is placed in every trustee meeting till the investments are fully recovered/ written-off.
- iv. The trustees shall monitor the compliance of this circular and disclose in the half-yearly trustee reports filed with SEBI, the compliance in respect of every segregated portfolio created.
- b. In order to avoid mis-use of segregated portfolio, trustees shall ensure to have a mechanism in place to negatively impact the performance incentives of Fund Managers, Chief Investment Officers (CIOs), etc. involved in the investment process of securities under the segregated portfolio, mirroring the existing mechanism for performance incentives of the AMC, including claw back of such amount to the segregated portfolio of the scheme.

N. SWING PRICING FRAMEWORK

Swing Pricing Framework

SEBI introduced swing pricing framework for open ended debt mutual fund schemes (except overnight funds, Gilt funds and Gilt with 10-year maturity funds) through clause 4.10 of the SEBI Master Circular. The swing pricing is made applicable only for scenarios related to net outflows from the schemes. Further the SEBI Master Circular mandates full swing during market dislocation times for high risk open ended debt schemes.

Pursuant to the SEBI Master Circular the below swing pricing framework will be adapted during the market dislocation times. Currently, Fund has decided not to adopt policy pertaining to swing pricing during normal times.

Meaning of Swing Pricing:

Swing pricing refers to a process of adjusting scheme's net asset value (NAV) to effectively pass on transaction costs stemming from net capital activity (i.e., flows into or out of the fund) to the investors associated with that activity during the life of a fund, excluding ramp-up period or termination. In a liquidity-challenged environment, quoted bid/ask spreads and overall trading cost can widen and may not be representative of the executed prices that can be achieved in the market.

^{*} On the date of credit event i.e. on 31st March 2021, NCD of C Ltd (7.65%) will be segregated as separate portfolio and further it is assumed to be marked down by 25% on the date post segregation, before marking down the security was valued at Rs.98.4570 per unit.

Swing pricing can be a useful mechanism to contribute to protect the interests of existing investors, specifically from the dilution of their holdings and value of the investor's capital and thus contribute to protect the value of the investors capital. Swing pricing mechanism is a tools which can help protect remaining investors during any of the below instances when:

- Any large investors choose to redeem where their actions would have material market impact costs
- More active trading takes place for the scheme or
- Scheme hold illiquid assets.

Market Dislocation:

SEBI will determine 'market dislocation' either based on AMFI's recommendation or suo moto. SEBI shall notify once market dislocation is declared that swing pricing will be applicable for a specified period.

Subsequent to the announcement of market dislocation, the swing pricing framework shall be mandated only for open ended debt schemes (except overnight funds, Gilt funds and Gilt with 10-year maturity funds) in terms of clause 4.10.4.2 of the SEBI Master Circular, which:

a. has High or Very High risk on the risk-o-meter in terms of clause 17.4 of the SEBI Master Circular (as of the most recent period at the time of declaration of market dislocation) and

b. classifies themselves in the cells A-III, B-II, B-III, C-I, C-II and C-III of Potential Risk Class (PRC) Matrix in terms of clause 17.5 of the SEBI Master Circular .

Swing Threshold:

Swing threshold refers to a pre-determined threshold set in terms of percentage of AUM that trigger the adjustment in the NAV (swinging of the NAV). During the market dislocation times swing pricing will be adapted when the scheme has net outflow irrespective of any swing threshold. Swing pricing shall be made applicable to all unitholders at PAN level for (redemptions and subscriptions) except for redemptions up to INR 2 lacs for each mutual fund scheme.

Swing factor:

Swing factor refers to adjustment factor set in terms of percentage by the extent NAV is adjusted / swung. As per clause 17.5 of the SEBI Master Circular, the PRC matrix assigned to DSPBPSF and DSPFF is A-III and hence mandatory swing during market dislocation, in case of net outflow from the schemes, the NAV would be adjusted (swung) downwards by 1 %.

Disclosures pertaining to NAV adjusted for swing factor:

The Scheme performance shall be computed based on Scheme NAV before Swing adjustment i.e. the unswung NAV.

Disclosures pertaining to NAV adjusted for swing factor along with the performance impact shall be made by the AMCs in following format in SIDs and in scheme wise Annual Reports and Abridged summary and the same may be disclosed on website prominently only if swing pricing framework has been made applicable for the said mutual fund scheme.

O. Compliance with Potential Risk Class Matrix norms

In line with clause 17.5 of the SEBI Master Circular, the PRC of the Scheme based on interest rate risk and credit risk of the Scheme is being classified.

Further, the investors are requested to note following in accordance with the SEBI Master Circular read along with the clarification issued by AMFI:

- (i) when PRC cell classification is changed into a cell with either a higher interest rate risk or credit risk, mutual funds shall intimate to all unit holders about the change in the PRC value post completion of the fundamental attribute change (FAC) process. This shall be in addition to the intimation to unit holders about the proposed FAC and the 30-day exit period, prior to the change.
- (ii) the change in the PRC value due to investment actions, price changes, rating changes, etc. shall be determined as part of the day-end post trade compliance check and if the day end PRC value is higher than the maximum risk specified for either of the risks, it shall be rebalanced within a period specified in the Scheme Information Document of the Scheme. Such rebalancing shall be monitored by the Investment Management Committee of the AMC. However, the rule relating to maximum residual maturity of the instrument as per clause 19 of the SEBI Master circular shall be part of pre-trade checks. Further, only a permanent change in the PRC positioning of a scheme into a higher risk cell will be regarded as a FAC.

Options offered under the Scheme

- Growth
- IDCW
 - Payout of Income Distribution cum Capital Withdrawal ('IDCW')
 - Reinvestment of Income Distribution cum Capital Withdrawal ('IDCW')

(i) Growth Option - Option A

The Mutual Fund will not declare any IDCW under this option. The income earned under this Option will remain invested in the option and will be reflected in the NAV. This option is suitable for investors

who are not looking for current income but who have invested with the intention of capital appreciation. Moreover, if Units under this option are held as capital asset for a period of greater than twelve months from the date of acquisition, Unit Holders will get the benefit of long term capital gains tax.

(ii) Income Distribution cum Capital Withdrawal ('IDCW') Option (Option B)

The above Option is suited for investors seeking income through IDCW declared by the Scheme. Only Unit Holders opting for the IDCW Option (Option B) will receive IDCW. The Trustee, in its sole discretion, may also declare interim IDCW.

This Option in turn offers two sub-options i.e. "Payout IDCW" and "Reinvestment IDCW", as under:

Payout IDCW

As per the SEBI (MF) Regulations, the Mutual Fund shall despatch IDCW payments to the Unit Holders within 7 working days from the record date for declaration of the IDCW. IDCW will be paid by cheque, net of taxes, as may be applicable. Unit Holders will also have the option of direct payment of IDCW to the bank account. The cheques will be drawn in the name of the sole/first holder and will be posted to the registered address of the sole/first holder as indicated in the original application form. To safeguard the interest of Unit Holders from loss or theft of IDCW cheques, investor should provide the name of their bank, branch and account number in the Application Form. IDCW cheques will be sent to the Unit Holder after incorporating such information.

Investors may however note that in case the IDCW distributed (net of tax deducted at source, wherever applicable) is for an amount equal to or less than Rs. 100/-, the IDCW, instead of being paid out to the Unit holder will be reinvested by issuing additional Units of the Scheme at the Applicable NAV on the next Business day after the Record Date. The additional Units issued and held as long term capital asset will get the benefit of long-term capital gains tax if sold after being held for greater than twelve months. For this purpose, twelve months will be computed from the date when such additional units are allotted.

Reinvestment of IDCW

Under this sub-option, IDCW are reinvested by way of allotment of additional Units of the Scheme, instead of receiving IDCW payout. Such additional Units by way of reinvestment of IDCW will be at the Applicable NAV on the next Business day after the Record Date. The additional Units issued under this sub-option and held as long term capital asset will get the benefit of long-term capital gains tax if sold after being held for greater than twelve months. For this purpose, twelve months will be computed from the date when such additional units are allotted.

Effect of IDCW: Post declaration of IDCW, the NAV of the Units under the IDCW Option will stand reduced by the amount of IDCW declared and applicable IDCW distribution tax/surcharge/cess/any other statutory levy. Notwithstanding varying rates of statutory levies, the ex-IDCW NAV will remain the same for all categories of investors in the IDCW Option, though the number of additional Units received by Unit Holders may vary depending on the category of each Unit Holder. For details on taxation of IDCW please refer the SAI.

Notes:

- a. The Trustee intends to declare IDCW comprising substantially of net income and net capital gains. It should be noted that the actual distribution of IDCW and frequency of distribution will be entirely at the discretion of the Trustee. To the extent the entire net income and realised gains are not distributed, it will remain invested in the Option and reflected in the NAV.
- b. An investor on record for the purpose of IDCW distributions is an investor who is a Unit Holder as of the Record Date. In order to be a Unit Holder, an investor has to be allocated Units representing receipt of clear funds by the Scheme.
- c. Investors should indicate the name of the Scheme and/or Option, clearly in the application form. In case of valid applications received, without indicating the Scheme and/or Option etc. or where the details regarding Option are not clear or ambiguous, the following defaults will be applied:

If no indication is given under the following	Default
Option - Growth/IDCW	Growth
Sub-option - Payout IDCW/Reinvestment of IDCW	Payout IDCW

Investors shall note that once Units are allotted, AMC shall not entertain requests regarding change of Option, with a retrospective effect. Investors shall also note that any change in IDCW sub-option, due to additional investment or on the basis of a request received from the investor, will be applicable to all existing Units in the IDCW option of the Scheme.

3. Ongoing price for subscription (Purchase Price)/ switch-in from other schemes/ plans by investor

(This is the price you need to pay for purchase/switch-in)

Pursuant to clause 10.4 of the SEBI Master Circular, there is no entry load for purchase of Units of the Scheme. Accordingly, Purchase Price will be equal to Applicable NAV.

The Purchase Price of the Units on an ongoing basis will be calculated as described below, which is based on the Applicable NAV

Example: The applicable NAV of the Scheme is Rs. 11.00 p.u. Since Entry load is not applicable, the purchase / subscription price will be calculated as follows:

```
Purchase Price = Applicable NAV*(1+Entry Load)
= Rs. 11 *(1+0)
= Rs. 11.00*1
= Rs.11.00
```

4. Ongoing price for redemption (sale) /switch outs (to other Schemes/plans of the Mutual Fund)/intra-Plan switching by investors (Redemption Price)

(This is the price you will receive for redemptions/switch outs)

Redemption Price of Units will be calculated on the basis of the Applicable NAV, subject to the Exit Load applicable.

```
Redemption Price = Applicable NAV x (1 - Exit Load)
```

Illustration:

Say, Applicable NAV = Rs. 12.0000 and the Exit Load is 0.50%,

Redemption Price = $12 \times (1-0.005) = Rs. 11.9400$.

For details on load structure please see, Section 'IV. Fees and Expenses, C. Load Structure.'

The Mutual Fund shall ensure that the repurchase price is not lower than 95% of the NAV as provided under SEBI (MF) Regulations.

5. Cut off timing for subscriptions/ redemptions/ switches

Applicable NAV is the Net Asset Value per Unit at the close of the Business Day on which a valid application is accepted and time stamped. A Unit Holder may request redemption of a specified amount or a specified number of Units only. If the redemption request is made for a specified amount and the number of Units is also specified by the Unit Holder, the number of Units specified will be considered for deciding the redemption amount. Unit Holders may also request for redemption of their entire holding and close the account by indicating the same at an appropriate place in the transaction slip/common transaction form.

It may, however, be noted that in the event of death of the Unit Holder, the nominee or legal heir, (subject to production of requisite documentary evidence to the satisfaction of the AMC) as the case may be, shall be able to redeem the investment at any point of time

In case an investor has purchased Units on more than one day (either under the NFO Period or through subsequent purchases) the Units purchased first (i.e. those Units which have been held for the longest period of time), will be deemed to have been redeemed first, i.e. on a First-In-First-Out basis. In case the Units are standing in the names of more than one Unit Holder, where mode of holding is specified as Joint redemption requests will have to be signed by all joint holders. However, in cases of holding specified as 'Anyone or Survivor', any one of the Unit Holders will have the power to make redemption requests, without it being necessary for all the Unit Holders to sign. Effect of Redemption

On redemption, the unit capital and reserves will stand reduced by an amount equivalent to the product of the number of Units redeemed and the Redemption Price as on the date of redemption. Units once redeemed will be extinguished and will not be re-issued.

Fractional Units

Since a request for purchase is generally made in Rupee amounts and not in terms of number of Units of the Scheme, a Unit Holder may be left with fractional Units. Fractional Units will be computed and accounted for up to three decimal places. However, fractional Units will, in no way, affect the Unit Holder's ability to redeem the Units, either in part or in full, standing to his/her/its credit.

The new tax regime would be the default tax regime from FY 2023-24 onwards.

[^]The Finance Act, 2022 has levied the surcharge to be at par with Equity Oriented Scheme with effect from 1 April 2022

^{**}In case company opts for new regime of taxation, then the surcharge would be applicable at the rate of 10% irrespective of the taxable income.

Specified Mutual Fund" means a Mutual Fund by whatever name called, where not more than thirty five per cent. of its total proceeds is invested in the equity shares of domestic companies. Finance Act 2023 has inserted Section 50AA in

the Income Tax Act, 1961. As per the said section, with effect from 1 April 2023, gains/losses from units of Specified Mutual Fund would be deemed to be short term capital gain/loss irrespective of period of holding i.e. the definition of holding for more than 36 months to be considered as long term capital asset is withdrawn. This is applicable for all such units which are acquired on or after Apr 1, 2023.

'The Finance Act 2021 introduced special provisions for higher rate of TDS in case of non-filers of Income tax return (referred to as "specified person"). Specified person does not include a non-resident who does not have permanent establishment in India. Finance Act 2023, with effect from 1st April, 2023, amended the said proviso to also exclude a person who is not required to furnish the return of income for the assessment year relevant to the said previous year and is notified by the Central Government in the Official Gazette in this behalf.

Any person entitled to receive any sum or income or amount, on which tax is deductible under Chapter XVIIB (hereafter referred to as deductee), shall furnish his Permanent Account Number to the person responsible for deducting such tax (hereafter referred to as deductor), failing which tax shall be deducted at the higher of the following rates, namely:

- (i) at the rate specified in the relevant provision of this Act; or
- (ii) at the rate or rates in force; or
- (iii) at the rate of twenty per cent.

The aforesaid provision dealing with higher taxation in the absence of furnishing Permanent Account Number shall not apply to a non-resident with effect from 1st June, 2016 on furnishing the following details and documents by such non-resident:

- (i) name, e-mail id, contact number;
- (ii) address in the country or specified territory outside India of which the non-resident is a resident;
- (iii) a certificate of his being resident in any country or specified territory outside India from the Government of that country or specified territory if the law of that country or specified territory provides for issuance of such certificate; (iv) Tax Identification Number of the non-resident in the country or specified territory of his residence and in case no such number is available, then a unique number on the basis of which the non-resident is identified by the Government of that country or the specified territory of which he claims to be a resident.

In case of investments by NRIs in closed ended funds during NFO, at the time of redemption of units, TDS will be deducted at the applicable rate. However, in respect of those Unit Holders who have acquired the units on the Stock Exchange post listing of units, the Unit Holders would need to provide a certificate from a Chartered Accountant certifying the details of acquisition of units to the Fund within two days of maturity of the Scheme, so as to enable the Fund to deduct TDS at the applicable rates. In the event of such details not being provided, the Fund would deduct TDS on the redemption proceeds at the highest rate of TDS applicable.

For further details on taxation please refer to the clause on Taxation in the SAI.
