Strategies	<u>Market Liquidity Risk</u>	Amongst all the segments of the fixed income market in India, the government securities market demonstrates the highest market liquidity. The liquidity varies from security to security with benchmark securities for the reference tenors like 10 years, 5 years etc. showing relatively higher market liquidity. With time, the benchmark liquidity changes and hence liquidity propagates from one security to the other. The liquidity risk will be managed and/or sought to be addressed by creating a portfolio which has adequate access to liquidity. The Investment Manager will select fixed income securities, which have or are expected to

The credit process ensures that issuer level review is done at inception as well as periodically by taking into consideration the balance sheet and operating strength of the issuer.			
	Rating Migration Risk	The endeavor is to invest in high grade/quality securities. The due diligence performed by the fixed income team before assigning credit limits and the periodic credit review and monitoring should address company-specific issues.			
	Interest rate risk	The Scheme is expected to have duration based on the underlying securities. The interest rate risk cannot be eliminated and it exists as it is the primary feature of the scheme by providing investors access to a higher interest rate risk portfolio, which would benefit in a declining interest rate environment.			
	Re-investment Risk	The Investment Manager will endeavor that besides the tactical and/or strategic interest rate calls, the portfolio is fully invested.			
	TermStructureofInterestRates(TSIR)Risk	The Scheme is expected to have duration based on the underlying securities. As the nature of the scheme is to have higher duration, the Term Structure of Interest Rates (TSIR) Risk cannot be eliminated and it exists as it is the primary feature of the scheme.			
	Risks associated with floating rate securities	There is restricted liquidity in floating rate securities, resulting in lack of price discovery. Hence, incremental investments in floating rate securities are going to be limited.			
	Risk associated with derivatives	The guidelines issued by SEBI / RBI from time to time for forward rate agreements and interest rate swaps and other derivative products would be adhered to.
