SECTION I. INTRODUCTION

A. RISK FACTORS

Standard Risk Factors:

- Investment in mutual fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk, including the possible loss of principal.
- As the price / value / interest rates of the securities in which the Scheme invest fluctuates, the value of your investment in the Scheme may go up or down. In addition to the factors that affect the value of individual investments in the Scheme, the NAV of the Scheme can be expected to fluctuate with movements in the broader equity and bond markets and may be influenced by factors affecting capital and money markets in general, such as, but not limited to, changes in interest rates, currency exchange rates, changes in Governmental policies, taxation, political, economic or other developments and increased volatility in the stock and bond markets.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme.
- The name of the Scheme does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The Sponsors are not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs. 1 lakh made by it towards setting up the Mutual Fund.
- The present Scheme is not a guaranteed or assured return Scheme.

Additional Risk Factors for Foreign Investors:

i. Political Risk

Investments in mutual fund Units in India may be materially adversely impacted by Indian politics and changes in the political scenario in India either at the central, state or local level. Actions of the central government or respective state governments in the future could have a significant effect on the Indian economy, which could affect companies, general business and market conditions, prices and yields of securities in which the Scheme invest.

The occurrence of selective unrest or external tensions could adversely affect the political and economic stability of India and consequently have an impact on the securities in which the Scheme invests. Delays or changes in the development of conducive policy frameworks could also have an impact on the securities in which the Scheme invests.

ii. Economic Risk

A slowdown in economic growth or macro-economic imbalances such as the increase in central and state level fiscal deficits may adversely affect investments in the country. The underlying growth in the economy is expected to have a direct impact on the volume of new investments in the country.

iii. Foreign Currency Risk

The Scheme is denominated in Indian Rupees (INR) which is different from the home currency for Foreign Investors in the mutual fund Units. The INR value of investments when translated into home currency by Foreign Investors could be lower because of the currency movements. The AMC does not manage currency risk for foreign investors and it is the sole responsibility of the Foreign Investors to manage or reduce currency risk on their own. The Sponsor/Fund/Trustees/AMC are not liable for any loss to Foreign Investors arising from such changes in exchange rates.

iv. Convertibility and Transferability Risk

In the event capital and exchange controls are imposed by the government authorities, it would prevent Foreign Investors' ability to convert INR into home currency and/or transfer funds outside India. The convertibility and transferability of INR proceeds into home currency is the responsibility of the Foreign Investors.

1) Risk Factors associated with Exchange traded schemes:

a. Passive Investments:

As the scheme proposes to invest not less than 95% of the net assets in the securities of the benchmark Index, the Scheme will not be actively managed. The Scheme may be affected by a general decline in the Indian markets relating to its Underlying Index. The Scheme invests in the securities included in its underlying index regardless of their investment merit. The AMC does not attempt to individually select stocks or to take defensive positions in declining markets. The value of the Scheme's investments, may be affected generally by factors affecting equity markets, such as price and volume volatility in the capital markets, interest rates, currency exchange rates, changes in policies of the Government, taxation laws or any other appropriate authority policies and other political and economic developments which may have an adverse bearing on individual securities, a specific sector or all sectors. Consequently, the NAV of the Units of the Scheme may fluctuate and can go up or down

b. Tracking Error and Tracking Difference Risk:

The Fund Manager would not be able to invest the entire corpus exactly in the same proportion as in the underlying index due to certain factors such as the fees and expenses of the respective scheme, corporate actions, cash balance, changes to the underlying index and regulatory policies which may affect AMC's ability to achieve close correlation with the underlying index of the scheme. The scheme's returns may therefore deviate from those of its underlying index. "Tracking Error" is defined as the standard deviation of the difference between daily returns of the underlying index and the NAV of the respective scheme. "Tracking Difference" is the annualized difference of daily returns between the Index and the NAV of the scheme (difference between fund return and the index return). Tracking Error and Tracking Difference may arise including but not limited to the following reasons:

- i. Expenditure incurred by the fund.
- ii. The holding of a cash position and accrued income prior to distribution of income and payment of accrued expenses. The fund may not be invested at all time as it may keep a portion of the funds in cash to meet redemptions or for corporate actions.
- iii. Securities trading may halt temporarily due to circuit filters.
- iv. Corporate actions such as debenture or warrant conversion, rights, merger, change in constituents etc.
- v. Rounding off of quantity of shares in underlying index.
- vi. Dividend payout.
- vii. Disinvestments to meet redemptions, recurring expenses, IDCW payouts etc.
- viii. Execution of large buys / sell orders
- ix. Transaction cost (including taxes and insurance premium) and recurring expenses
- x. Realization of Unit holders funds
- xi. Index providers may either exclude or include new scrips in their periodic review of the scrips that comprise the underlying index. In such an event, the Fund will try to reallocate its portfolio but the available investment/reinvestment opportunity may not permit absolute mirroring immediately.

SEBI Regulations (if any) may impose restrictions on the investment and/or divestment activities of the Scheme. Such restrictions are typically outside the control of the AMC and may cause or exacerbate the Tracking Error.

It will be the endeavor of the fund manager to keep the tracking error as low as possible. However, in case of events like, dividend received from underlying securities, rights issue from underlying securities, and market volatility during rebalancing of the portfolio following the rebalancing of the underlying index, etc. or in abnormal market circumstances may result in tracking error. There can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the Index.

2) Risks pertaining to transaction in units:

a) Absence of Prior Active Market: Although the Scheme is listed on Stock Exchange, there can be no assurance that an active secondary market will develop or be maintained. Hence there would be time when trading in the Units of the Scheme would be infrequent.

- b) Trading in Units may be Halted: Trading in the Units of the Schemes on Stock Exchange may be halted because of market conditions or for reasons that in view of Stock Exchange or SEBI, trading in the Units of the Schemes are not advisable. In addition, trading of the Units of the Scheme are subject to trading halts caused by extraordinary market volatility and pursuant to Stock Exchange and SEBI circuit filter rules. There can be no assurance that the requirements of Stock Exchange necessary to maintain the listing of the Units of the Schemes will continue to be met or will remain unchanged.
- c) Lack of Market Liquidity: The Schemes may not be able to immediately sell certain types of illiquid Securities. The purchase price and subsequent valuation of restricted and illiquid Securities may reflect a discount, which may be significant, from the market price of comparable Securities for which a liquid market exists.
- d) Units of the Schemes May Trade at Prices Other than NAV: The Units of the Schemes may trade above or below their NAV. The NAV of the Schemes will fluctuate with changes in the market value of the holdings of the Schemes. The trading prices of the Units of the Schemes will fluctuate in accordance with changes in their NAV as well as market supply and demand for the Units of the Schemes. However, given that Units of the Schemes can be created and redeemed in Creation Units directly with the Fund, it is expected that large discounts or premiums to the NAV of Units of the Schemes will not sustain due to arbitrage opportunity available.
- e) The units will be issued only in dematerialized form through depositories. The records of the depository are final with respect to the number of units available to the credit of unit holder. Settlement of trades, repurchase of units by the mutual fund during the liquidity window depend upon the confirmations to be received from depository (ies) on which the mutual fund has no control.
- f) Investors may note that even though this is an open-ended scheme, the scheme would only in case of Market Makers and eligible investors repurchase units and that too only in Creation Unit Size. Thus unit holdings less than the Creation Unit Size can only be sold through the secondary market on the exchange
- g) Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the Scheme. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities. The NAV of the Scheme(s) can go up and down because of various factors that affect the capital markets in general.
- h) The trading mechanism introduced by the stock exchange(s) is configured to accept and process transactions for mutual fund units in both Physical and Demat Form. The allotment and/or redemption of Units through NSE and/or BSE or any other recognised stock exchange(s), on any Business Day will depend upon the modalities of processing viz. collection of application form, order processing/settlement, etc. upon which the Fund has no control. However, units of the Scheme can only be subscribed in demat mode. Moreover, transactions conducted through the stock exchange mechanism shall be governed by the operating guidelines and directives issued by respective recognized stock exchange(s).
- i) **Regulatory Risk:** Any changes in trading regulations by Stock Exchange or SEBI may affect the ability of market maker to arbitrage resulting into wider premium/discount to NAV.
- 3) Risk of Substantial Redemptions: Substantial Redemptions of Units within a limited period of time could require the Schemes to liquidate positions more rapidly than would otherwise be desirable, which could adversely affect the value of both the Units being Redeemed and that of the outstanding Units of the Schemes. The risk of a substantial Redemption of the Units may be exacerbated where an investment is made in the Schemes as part of a structured product with a fixed life. Please also refer to the sections on 'right to limit Redemptions' and 'suspension of Purchase / Redemption / switch of Units' in the Statement of Additional Information. Regardless of the period of time in which Redemptions occur, the resulting reduction in the NAV of the Schemes could also make it more

difficult for the Schemes to generate profits or recover losses. The Trustee, in the general interest of the Unit holders of the Schemes offered under this SID and keeping in view of the unforeseen circumstances/unusual market conditions, may limit the total number of Units which can be redeemed on any Working Day depending on the total "Saleable Underlying Stock" available with the Fund.

4) Risk associated with use of derivatives: The Scheme may periodically invest in derivative securities e.g. when a stock(s) is entering/exiting the benchmark index. However, the Scheme will not use derivative instruments for speculative purposes or to leverage its net assets. There may be a cost attached to buying index futures or other derivative instrument. Further there could be an element of settlement risk, which could be different from the risk in settling physical shares

Derivatives require the maintenance of adequate controls to monitor the transactions and the embedded market risks that they add to the portfolio. Besides the price of the underlying asset, the volatility, tenor and interest rates affect the pricing of derivatives. Other risks in using derivatives include but are not limited to:

- Counterparty Risk this occurs when a counterparty fails to abide by its contractual obligations
 and therefore, the Scheme are compelled to negotiate with another counter party, at the then
 prevailing (possibly unfavourable) market price. For exchange traded derivatives, the risk is
 mitigated as the exchange provides the guaranteed settlement but one takes the performance
 risk on the exchange.
- Market Liquidity Risk this occurs where the derivatives cannot be transacted due to limited trading volumes and/or the transaction is completed with a severe price impact.
- Model Risk the risk of mis-pricing or improper valuation of derivatives.
- Basis Risk arises due to a difference in the price movement of the derivative vis-à-vis that of the security being hedged.

Derivative trades involve execution risks, whereby the rates seen on the screen may not be the rate at which ultimate execution takes place.

- The option buyer's risk is limited to the premium paid
- Investments in index/stock futures face the similar risk as the investments in the underlying stock or index.
- Risk of loss in trading in futures contracts can be substantial, because of the low margin deposits required, the extremely high degree of leverage involved in futures pricing and potentially high volatility of the futures markets.
- The derivatives market may not have the volumes that may be seen in other developed markets, which may result in volatility in the values.
- The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

5) Risks associated with Debt & Money Market Instruments:

- a) Price-Risk or Interest-Rate Risk: Fixed income securities such as bonds, debentures and money market instruments run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates.
- b) **Reinvestment Risk:** Investments in fixed income securities may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.
- c) Credit Risk: In simple terms this risk means that the issuer of a debenture/bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. Even where no default occurs, the price of a security may go down because the credit rating of an issuer goes down.

- d) **Liquidity Risk:** Due to the evolving nature of the floating rate market, there may be an increased risk of liquidity risk in the portfolio from time to time.
- 6) Risks associated with Equity Investments: Equity and equity related securities are volatile and prone to price fluctuations on a daily basis. The liquidity of investments made in the Scheme may be restricted by trading volumes and settlement periods. Settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme portfolio would result at times, in potential losses to the Scheme, should there be a subsequent decline in the value of securities held in the Scheme portfolio. Also, the value of the Scheme investments may be affected by interest rates, changes in law/ policies of the government, taxation laws and political, economic or other developments which may have an adverse bearing on individual Securities, a specific sector or all sectors. Investments in equity and equity related securities involve a degree of risk and investors should not invest in the equity Schemes unless they can afford to take the risk of losing their investment.
- 7) Liquidity risks: Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the Scheme. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities. The NAV of the Scheme(s) can go up and down because of various factors that affect the capital markets in general.
- **8) Risk associated with Securities Lending & Borrowing and Short Selling:** Securities Lending and Borrowing ("SLB") is an exchange traded product in India, with trades done on order matching platforms setup by the clearing corporation/house of recognized stock exchanges. In accordance with SEBI guidelines, there is a robust risk management system and safeguards exercised by the clearing corporation/house, which also guarantee financial settlement hence eliminating counterparty risk on borrowers.

The Scheme may participate as a lender in the SLB market and lend securities held in the portfolio for earning fees from such lending to enhance revenue of the Scheme. The key risk to the Scheme is creation of temporary illiquidity due to the inability to sell such lent securities, till the time such securities are returned on the contractual settlement date or on exercise of early recall. The Scheme may enter into short selling transactions in accordance with the guidelines prescribed by SEBI. The key risk to the Scheme is increase in the price of such securities, requiring the Scheme to purchase the securities sold short to cover the position even at unreasonable prices resulting in a loss to the Scheme.

9) Risks associated with segregated portfolio

- a) Investor holding units of segregated portfolio may not able to liquidate their holding till the time recovery of money from the issuer.
- b) Security comprises of segregated portfolio may not realise any value. Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

C. SPECIAL CONSIDERATIONS

Subject to the SEBI (MF) Regulations, funds managed by the associates of the Sponsors may invest
either directly or indirectly in the Scheme and may acquire a substantial portion of the Scheme
Units and collectively constitute a majority investor in the Scheme. Accordingly, redemption of

Units held by such funds may have an adverse impact on the value of the Units of the Scheme because of the timing of any such redemption and may impact the ability of other Unit Holders to redeem their respective Units.

- As the liquidity of the Scheme investments may sometimes be restricted by trading volumes and settlement periods, the time taken by the Mutual Fund for redemption of Units may be significant in the event of an inordinately large number of redemption requests or of a restructuring of the Scheme portfolios. SECTION II - INFORMATION ABOUT THE SCHEME

A. TYPE OF THE SCHEME

An open ended scheme replicating/ tracking NIFTY 50 Equal Weight TRI

B. WHAT IS THE INVESTMENT OBJECTIVE OF THE SCHEME?

The Scheme seeks to provide returns that, before expenses, closely correspond to the total return of the underlying index, subject to tracking errors.

There is no assurance that the investment objective of the Scheme will be realized.

C. HOW WILL THE SCHEME ALLOCATE ITS ASSETS?

Under normal circumstances, it is anticipated that the asset allocation of the Scheme shall be as follows:

| Instruments | | allocations al assets) | Risk Profile | |
|-----------------------------------------------------------------------------------------------------------------|---------|---------------------------|----------------|--|
| | Minimum | Maximum | | |
| Equity and Equity Related Securities of companies constituting NIFTY50 Equal Weight Index, the Underlying Index | 95% | 100% | Medium to High | |
| Cash and Cash Equivalents / Money Market Instruments* with residual maturity not exceeding 91 days | 0% | 5% | Low to Medium | |

*Money Market Instruments will include TREPS, Commercial Paper, Certificates of Deposit, Treasury Bills, Bills Rediscounting, Repos, short-term Government securities and any other such short-term instruments as may be allowed under the regulations prevailing from time to time.

The Scheme retains the flexibility to invest across all the securities in money market instruments as permitted by SEBI/RBI from time to time, including Liquid/Money Market schemes of mutual funds.

The net assets of the scheme will be invested in stocks constituting the NIFTY50 Equal Weight Index. This would be done by investing in all the stocks comprising the NIFTY50 Equal Weight Index in the same weightage that they represent in the NIFTY50 Equal Weight Index. A small portion of the net assets will be invested in TREPS/money market instruments permitted by SEBI/RBI.

Exposure to equity derivatives of the index itself or its constituent stocks may be undertaken when equity shares are unavailable, insufficient or for rebalancing in case of corporate actions for a temporary period. Index futures/options are meant to be an efficient way of buying/selling an index compared to buying/selling a portfolio of physical shares representing an index for ease of execution and settlement. It can help in reducing the Tracking Error in the Scheme. Index futures/options may avoid the need for trading in individual components of the index, which may not be possible at times, keeping in mind the circuit filter system and the liquidity in some of the individual stocks. Index futures/options can also be helpful in reducing the transaction costs and the processing costs on account of ease of execution of one trade compared to several trades of shares comprising the underlying index and will be easy to settle compared to physical portfolio of shares representing the underlying index. In case of investments in index futures/options, the risk/reward would be the same as investments in portfolio of shares representing an index. However, there may be a cost attached to buying an index future/option. The Scheme will not maintain any leveraged or trading positions. Exposure to such derivatives will be restricted to 20% of net assets of the scheme. The Scheme shall rebalance the portfolio in case of any deviation to the asset allocation. Such rebalancing shall be done within 7 days from the date of such deviation.

The Scheme will not lend more than 50% of its corpus. The Scheme will enter into securities lending in accordance with the framework specified by SEBI in this regard.

The Scheme will not invest in foreign securities. The Scheme will not invest in equity linked debentures. The Scheme will not invest in Securitized Debt. The Scheme will not participate in repo of money market and corporate debt securities.

The Scheme will not make any investment in debt instruments having structured obligations and credit enhancements. The Scheme may enter into short selling transactions in accordance with the guidelines prescribed by SEBI.

In the event of involuntary corporate action, the Scheme shall endeavor to dispose the security not forming part of the Underlying index within 7 business days from the date of listing, subject to availability of adequate liquidity for the security.

Portfolio rebalancing:

The Scheme shall rebalance the portfolio in case of any deviation to the asset allocation. Such rebalancing shall be done within 7 days from the date of occurrence of deviation. Where the portfolio is not rebalanced within 7 days, justification for the same shall be placed before the Investment Committee and reasons for the same shall be recorded in writing. The Investment committee shall then decide on the course of action. However, at all times the portfolio will adhere to the overall investment objectives of the Schemes. Any alteration in the investment pattern will be for a short term on defensive considerations as per SEBI Circular no. SEBI/HO/IMD/DF2/CIR/P/2021/024 dated March 4, 2021; the intention being at all times to protect the interests of the Unit Holders.

It may be noted that no prior intimation/indication will be given to investors when the composition/asset allocation pattern under the Scheme undergoes changes within the permitted band as indicated above.

In line with SEBI Circular no. SEBI/HO/IMD/DOF2/P/CIR/2022/69 dated May 23, 2022, in case of change in constituents of the index due to periodic review, the portfolio of Scheme shall be rebalanced within 7 calendar days.

Further, any transactions undertaken in the portfolio of the Schemes in order to meet the redemption and subscription obligations shall be done while ensuring that post such transactions replication of the portfolio with the index is maintained at all points of time.

CHANGE IN INVESTMENT PATTERN

The Scheme, in general, will hold all the securities that comprise the underlying Index in the same proportion as the index.

Expectation is that, over a period of time, the tracking error of the Scheme relative to the performance of the Underlying Index will be relatively low. The AMC would monitor the tracking error of the Scheme on an ongoing basis and would seek to minimize tracking error to the maximum extent possible. Under normal market circumstances, such tracking error is not expected to exceed by 2% p.a. for daily 12 month rolling return. However, in case of events like, dividend issuance by constituent members, rights issuance by constituent members, and market volatility during rebalancing of the portfolio following the rebalancing of the Underlying Basket, etc. or in abnormal market circumstances, the tracking error may exceed the above limits. Since the scheme is an exchange traded fund, it will endeavor that at no point of time the scheme will deviate from the index. In the event of the asset allocation falling outside the limits specified in the asset allocation table, the Fund Manager will rebalance the same within 7 days.

In the interest of investors, the AMC reserves the right to change the above asset allocation pattern due to corporate action activity undertaken in the underlying securities. The Scheme shall rebalance the portfolio in case of any deviation to the asset allocation. Such rebalancing shall be done within 7 days from the date of such deviation.

D. Where will the Scheme invest?

The corpus of the Scheme will invest in Securities which are constituents of NIFTY50 Equal Weight Index and in Money Market Instruments.

The corpus of the Scheme will be invested in various types of securities (including but not limited to) such as:

- 1. Equity and Equity related Securities of companies constituting NIFTY50 Equal Weight Index
- 2. Stock futures / index futures and such other permitted derivative instruments.
- 3. TREPS, Treasury Bills, Cash Management Bills, Certificate of Deposits (CDs), Commercial Paper (CPs), Bills Rediscounting, and other Money Market Instruments as may be permitted by SEBI / RBI from time to time, subject to regulatory approvals, if any.
- 4. Derivatives only for hedging and portfolio balancing.

The scheme may invest the funds of the scheme in short term deposits of scheduled commercial banks as permitted under extant regulations.

Pending deployment of funds of the Scheme, the AMC may invest funds of the Scheme in short-term deposits of scheduled commercial banks, subject to the following conditions issued by SEBI vide its circular SEBI/IMD/CIR No. 1/91171 /07 dated April 16, 2007, SEBI/HO/IMD/DF4/CIR/P/2019/093 dated August 16, 2019 and SEBI/HO/IMD/DF2/CIR/P/2019/101 dated September 20, 2019

- i. "Short Term" for parking of funds shall be treated as a period not exceeding 91 days.
- ii. Such short-term deposits shall be held in the name of the Scheme.
- iii. The Scheme shall not park more than 15% of their net assets in the short term deposit(s) of all the scheduled commercial banks put together. However, it may be raised to 20% with the prior approval of the Trustee. Also, parking of funds in short term deposits of associate and sponsor scheduled commercial banks together shall not exceed 20% of total deployment by the Mutual Fund in short term deposits.
- iv. The Scheme shall not park more than 10% of their net assets in short term deposit(s) with any one scheduled commercial bank including its subsidiaries.
- v. The Trustee shall ensure that the funds of the Scheme are not parked in the short term deposits of a bank which has invested in the Scheme.
- vi. The Trustee shall also ensure that the bank in which a scheme has short term deposits do not invest in the scheme until the scheme has short term deposits with such bank.
- vii. AMC will not charge any investment management and advisory fees for parking of funds in short term deposits of scheduled commercial banks.

The above provisions do not apply to term deposits placed as margins for trading in cash and derivative market.

Further, due to corporate action in companies comprising of the index, the scheme may be allocated/allotted securities which are not part of the index. For example, the Fund may invest in stocks not included in the relevant underlying index in order to reflect various corporate actions (such as mergers) and other changes in the relevant underlying index (such as reconstitutions, additions, deletions and these holdings will be in anticipation and in the direction of impending changes in the underlying index)

For the purpose of liquidity, the Scheme may invest in Liquid/Money market Scheme managed by the same AMC or by the AMC of any other Mutual Fund without charging any fees on such investments, provided that aggregate inter-scheme investment made by all schemes managed by the same AMC or by the AMC of any other Mutual Fund shall not exceed 5% of the net asset value of the Fund.

Investments in Derivative Instruments

As part of the Fund Management process, the Scheme may use Derivative instruments such as index futures and options, stock futures and options contracts, warrants, convertible Securities, swap agreements or any other Derivative instruments that are permissible or may be permissible in future under applicable regulations and such investments shall be in accordance with the investment objectives of the Scheme.

Index futures/options are meant to be an efficient way of buying/selling an index compared to buying/selling a portfolio of physical shares representing an index for ease of execution and settlement. Index futures/options can be an efficient way of achieving the Scheme's investment

objective. Notwithstanding the pricing, they can help in reducing the Tracking Error in the Scheme. Index futures/options may avoid the need for trading in individual components of the index, which may not be possible at times, keeping in mind the circuit filter system and the liquidity in some of the individual stocks. Index futures/options can also be helpful in reducing the transaction costs and the processing costs on account of ease of execution of one trade compared to several trades of shares comprising the underlying index and will be easy to settle compared to physical portfolio of shares representing the underlying index.

In case of investments in index futures/options, the risk/reward would be the same as investments in portfolio of shares representing an index. However, there may be a cost attached to buying an index future/option. The Scheme will not maintain any leveraged or trading positions.

Purpose of investment in Derivatives

- a) The Scheme shall fully cover its positions in the Derivatives market by holding underlying Securities/cash or cash equivalents/option and/or obligation for acquiring underlying assets to honour the obligations contracted in the Derivatives market.
- b) The Securities held would be marked to market by the AMC to ensure full coverage of investments made in Derivative products at all times.

Trading in Derivatives

The Mutual Fund may use various derivatives and hedging products/ techniques, in order to seek to generate better returns for the Scheme. Derivatives are financial contracts of pre-determined fixed duration, whose values are derived from the value of an underlying primary financial instrument, commodity or index. The Scheme while investing in equities shall transact in exchange traded equity derivatives only and these instruments may take the form of Index Futures, Index Options, Futures and Options on individual equities/securities and such other derivative instruments as may be appropriate and permitted under the SEBI Regulations and guidelines from time to time.

Key features of Trading in Derivatives

The use of derivatives provides flexibility to the Schemes to hedge whole or part of the portfolio. The following section describes some of the more common derivatives transactions with illustrations.

Derivatives are financial contracts of pre-determined fixed duration, whose values are derived from the value of an underlying primary financial instrument, commodity or index, such as interest rates, exchange rates, commodities and equities.

1. Futures

A futures contract is a standardized contract between two parties where one of the parties commits to sell, and the other to buy, a stipulated quantity of a security at an agreed price on or before a given date in future.

Currently, futures contracts have a maximum expiration cycle of 3 months. Three contracts are available for trading, with 1 month, 2 months and 3 months expiry respectively. A new contract is introduced on the next trading day following the expiry of the relevant monthly contract. Futures contracts typically expire on the last Thursday of the month. For example a contract with the December 2021 expiration expires on the last Thursday of December 2021 (December 31, 2021).

Basic Structure of an Index Future

The Stock Index futures are instruments designed to give exposure to the equity markets indices. The Stock Exchange, Mumbai (BSE) and The National Stock Exchange (NSE) have trading in index futures of 1, 2 and 3 month maturities. The pricing of an index future is the function of the underlying index and short-term interest rates. Index futures are cash settled, there is no delivery of the underlying stocks.

Example using hypothetical figures: 1 month ABC Index Future

If the Scheme buys 2,000 futures contracts, each contract value is 50 times the futures index price.

Purchase Date : December 01, 2021

Spot Index : 13800.00 Future Price : 13900.00

Date of Expiry : December 31, 2021

Margin: 10%

Assuming the exchange imposes a total margin of 10%, the Investment Manager will be required to provide a total margin of approx. Rs. 1390,000,000 (i.e. 10%*13900*2000*50) through eligible securities and cash.

Assuming on the date of expiry, i.e. December 31, 2021, ABC Index closes at 13950, the net impact will be a profit of Rs. 5,000,000 for the Scheme, i.e. (13950-13900) * 2000 * 50 (Futures price = Closing spot price = Rs. 13950.00)

Profits for the Scheme = (13950-13900) * 2000*50 = Rs. 5,000,000.

Please note that the above example is given for illustration purposes only. Some assumptions have been made for the sake of simplicity.

The net impact for the Scheme will be in terms of the difference of the closing price of the index and cost price. Thus, it is clear from the above example that the profit or loss for the Scheme will be the difference between the closing price (which can be higher or lower than the purchase price) and the purchase price. The risks associated with index futures are similar to those associated with equity investments. Additional risks could be on account of illiquidity and potential mispricing of the futures.

Basic Structure of a Stock Future

A futures contract on a stock gives its owner the right and obligation to buy or sell stocks. Single Stock Futures traded on NSE (National Stock Exchange) are physically settled; on the expiration day, depending upon the side of the trade, security is either delivered or received against the payment. A purchase or sale of futures on a security gives the trader essentially the same price exposure as a purchase or sale of the security itself. In this regard, trading stock futures is no different from trading the security itself.

Example using hypothetical figures:

The Scheme holds shares of XYZ Ltd., the current price of which is Rs. 500 per share. The Scheme sells one month futures on the shares of XYZ Ltd. at the rate of Rs. 540.

If the price of the stock falls, the Mutual Fund will suffer losses on the stock position held. However, in such a scenario, there will be a profit on the short futures position.

At the end of the period, the price of the stock falls to Rs. 450 and this fall in the price of the stock results in a fall in the price of futures to Rs. 470. There will be a loss of Rs. 50 per share (Rs. 500 - Rs. 450) on the holding of the stock, which will be offset by the profits of Rs. 70 (Rs. 540 - Rs. 470) made on the short futures position.

Please note that the above example is given for illustration purposes only. Some assumptions have been made for the sake of simplicity. Certain factors like margins and other related costs have been ignored. The risks associated with stock futures are similar to those associated with equity investments. Additional risks could be on account of illiquidity and potential mis-pricing of the futures.

2. Options

An option gives a person the right but not an obligation to buy or sell something. An option is a contract between two parties wherein the buyer receives a privilege for which he pays a fee (premium) and the seller accepts an obligation for which he receives a fee. The premium is the

price negotiated and set when the option is bought or sold. A person who buys an option is said to be long in the option. A person who sells (or writes) an option is said to be short in the option.

An option contract may be of two kinds:

1) Call option

An option that provides the buyer the right to buy is a call option. The buyer of the call option can call upon the seller of the option and buy from him the underlying asset at the agreed price. The seller of the option has to fulfill the obligation upon exercise of the option.

2) Put option

The right to sell is called a put option. Here, the buyer of the option can exercise his right to sell the underlying asset to the seller of the option at the agreed price.

Option contracts are classified into two styles:

- (a) European Style
 - In a European option, the holder of the option can only exercise his right on the date of expiration only.
- (b) American Style

In an American option, the holder can exercise his right anytime between the purchase date and the expiration date.

Basic Structure of an Equity Option

In India, options contracts on indices and stocks are European style and physically settled

Example using hypothetical figures:

Market type : N
Instrument Type : OPTSTK
Underlying : XYZ Ltd. (XYZ)
Purchase date : December 1, 2021
Expiry date : December 31, 2021
Option Type : Put Option (Purchased)

 Strike Price
 : Rs. 5,750.00

 Spot Price
 : Rs. 5,800.00

 Premium
 : Rs. 200.00

 Lot Size
 : 100

No. of Contracts : 50

Say, the Mutual Fund purchases on December 1, 2021, 1 month Put Options on XYZ Ltd. (XYZ) on the NSE i.e. put options on 5000 shares (50 contracts of 100 shares each) of XYZ.

If the share price of XYZ Ltd. falls to Rs. 5,500 /- on December 31, 2021 and the Investment Manager decides to exercise the option, the impact will be as Follows:

Premium Expense = Rs. 200 * 50 * 100 = Rs. 10, 00,000/-

Stocks to be given at = Rs. 5,750/-

Profits for the Mutual Fund = (5,750.00-5,500.00)*50*100

= Rs. 12, 50,000/-

Net Profit = Rs. 12, 50,000 - Rs. 10,00,000 = Rs. 2,50,000/-

In the above example, the Investment Manager hedged the market risk on 5000 shares of XYZ Ltd. by purchasing put options.

Please note that the above example is given for illustration purposes only. Some assumptions have been made for the sake of simplicity. Certain factors like margins have been ignored. The purchase of Put Options does not increase the market risk in the Mutual Fund as the risk is already in the Mutual Fund's portfolio on account of the underlying asset position (in his example shares of XYZ Ltd.). The Premium paid for the option is treated as an expense and added to the holding cost of

the relevant security. Additional risks could be on account of illiquidity and potential mis-pricing of the options.

Exposure to Equity Derivatives

i. Position limit for the Mutual Fund in index options contracts:

- a. The Mutual Fund position limit in all index options contracts on a particular underlying index shall be Rs. 500 crore or 15% of the total open interest in the market in index options, whichever is higher, per Stock Exchange.
- b. This limit would be applicable on open positions in all options contracts on a particular underlying index.

ii. Position limit for the Mutual Fund in index futures contracts:

- a. The Mutual Fund position limit in all index futures contracts on a particular underlying index shall be Rs. 500 crore or 15% of the total open interest in the market in index futures, whichever is higher, per Stock Exchange.
- b. This limit would be applicable on open positions in all futures contracts on a particular underlying index.

iii. Additional position limit for hedging:

In addition to the position limits at point (i) and (ii) above, Fund may take exposure in equity index derivatives subject to the following limits:

- a. Short positions in index derivatives (short futures, short calls and long puts) shall not exceed (in notional value) the Mutual Fund's holding of stocks.
- b. Long positions in index derivatives (long futures, long calls and short puts) shall not exceed (in notional value) the Mutual Fund's holding of cash, government securities, T-Bills and similar instruments.

iv. Position limit for the Mutual Fund for stock based derivative contracts:

The combined futures and options position limit shall be 20% of the applicable Market Wide Position Limit (MWPL).

v. Position limit for the Scheme:

The position limits for the Scheme and disclosure requirements are as follows:

- a. For stock option and stock futures contracts, the gross open position across all derivative contracts on a particular underlying stock of a scheme of a Fund shall not exceed the higher of 1% of free float market capitalization (in terms of number of shares).
 Or
 - 5% of the open interest in the derivative contracts on a particular underlying stock (in terms of number of contracts).
- b. This position limit shall be applicable on the combined position in all derivative contracts on a underlying stock at a Stock Exchange.
- c. For index based contracts, the Mutual Fund shall disclose the total open interest held by its scheme or all schemes put together in a particular underlying index, if such open interest equals to or exceeds 15% of the open interest of all derivative contracts on that underlying index.

As and when SEBI notifies amended limits in position limits for exchange traded derivative contracts in future, the aforesaid position limits, to the extent relevant, shall be read as if they were substituted with the SEBI amended limits.

Exposure Limits:

With respect to investments made in derivative instruments, the Schemes shall comply with the following exposure limits in line with SEBI Circular Cir/IMD/DF/11/2010 dated August 18, 2010:

- 1. However, the following shall not be considered while calculating the gross exposure:
 - a. Security-wise hedged position and
 - b. Exposure in cash or cash equivalents with residual maturity of less than 91 days

- 2. The total exposure related to option premium must not exceed 20% of the net assets of the Scheme.
- 3. The Mutual Fund shall not write options or purchase instruments with embedded written options.
- 4. Exposure due to hedging positions may not be included in the above mentioned limits subject to the following:
 - a. Hedging positions are the derivative positions that reduce possible losses on an existing position in securities and till the existing position remains.
 - b. Hedging positions cannot be taken for existing derivative positions. Exposure due to such positions shall have to be added and treated under limits mentioned in Point 1.
 - c. Any derivative instrument used to hedge has the same underlying security as the existing position being hedged.
 - d. The quantity of underlying associated with the derivative position taken for hedging purposes does not exceed the quantity of the existing position against which hedge has been taken.
- 5. The Mutual Fund may enter into plain vanilla interest rate swaps for hedging purposes. The counter party in such transactions has to be an entity recognized as a market maker by RBI. Further, the value of the notional principal in such cases must not exceed the value of respective existing assets being hedged by the scheme. Exposure to a single counterparty in such transactions should not exceed 10% of the net assets of the scheme.
- 6. Exposure due to derivative positions taken for hedging purposes in excess of the underlying position against which the hedging position has been taken, shall be treated under the limits mentioned in point 1.
- 7. Definition of Exposure in case of Derivative Positions:
 Each position taken in derivatives shall have an associated exposure as defined under.
 Exposure is the maximum possible loss that may occur on a position. However, certain derivative positions may theoretically have unlimited possible loss. Exposure in derivative positions shall be computed as follows:

| Position | Exposure | | |
|---------------|------------------------------------------------------|--|--|
| Long Future | Futures Price * Lot Size * Number of Contracts | | |
| Short Future | Futures Price * Lot Size * Number of Contracts | | |
| Option Bought | Option Premium Paid * Lot Size * Number of Contracts | | |

E. WHAT IS THE INVESTMENT STRATEGY?

The Scheme will track its Underlying Index and will use a "passive" or indexing approach to endeavor to achieve scheme's investment objective. The scheme will neither try to beat the index it tracks nor take active approach in times when markets seem to be over/under valued. The AMC does not make any judgments about the investment merit of a particular stock or a particular industry segment nor will it attempt to apply any economic, financial or market analysis. Since the scheme is an exchange traded fund, the scheme will only invest in the security constituting the underlying index.

Since the scheme is an exchange traded fund, it will endeavor that at no point of time the scheme will deviate from the index.

PORTFOLIO TURNOVER

Portfolio Turnover measures the volume of trading that occurs in a Scheme's portfolio during a given time period. The Scheme is an open-ended Exchange Traded Fund and it is expected that there may be a number of subscriptions and repurchases on a daily basis through Stock Exchange(s) or Market Makers and Large Investors. Generally, turnover will depend upon the extent of purchase and redemption of units and the need to rebalance the portfolio on account of change in the composition, if any, and corporate actions of securities included in NIFTY50 Equal Weight Index. However, it will be the endeavor of the Fund Manager to maintain an optimal portfolio turnover rate commensurate

with the investment objective of the Scheme and the purchase/ redemption transactions on an ongoing basis in the Scheme.

TRACKING ERROR & TRACKING DIFFERENCE

Tracking Error may arise due to reasons including but not limited to the following: -

- a. Expenditure incurred by the fund.
- b. The holding of a cash position and accrued income prior to distribution of income and payment of accrued expenses. The fund may not be invested at all times as it may keep a portion of the funds in cash to meet redemptions or for corporate actions.
- c. Securities trading may halt temporarily due to circuit filters.
- d. Corporate actions such as debenture or warrant conversion, rights, merger, change in constituents
- e. Rounding off of quantity of shares in underlying index.
- f. Dividend payout.
- g. Disinvestments to meet redemptions, recurring expenses, IDCW payouts etc.
- h. Execution of large buy / sell orders
- i. Transaction cost (including taxes and insurance premium) and recurring expenses
- j. Realization of Unit holder's funds

It will be the endeavor of the fund manager to keep the tracking error as low as possible. Under normal circumstances, such tracking error is not expected to exceed 2% per annum. However, in case of events like, dividend received from underlying securities, rights issue from underlying securities, and market volatility during rebalancing of the portfolio following the rebalancing of the underlying index, etc. or in abnormal market circumstances, the tracking error may exceed the above limits. There can be no assurance or guarantee that the Scheme will achieve any particular level of tracking error relative to performance of the Index.

The Tracking Error of the Scheme is not expected to exceed by 2%. However, in case of unavoidable circumstances in the nature of force majeure which are beyond the control of the AMC, the tracking error may exceed 2% and the same shall be brought to the notice of the Board of DSP Trustee Private Limited ('Trustees') with the corrective actions taken by the AMC, if any.

Tracking Error of the ETF Schemes based on past one year rolling data, shall be disclosed on a daily basis, on the website of AMC (i.e. www.dspim.com) and AMFI.

Tracking Difference:

Tracking Difference is defined as the annualized difference of daily returns between the index and the NAV of the ETF Schemes.

Tracking difference of the Scheme shall be disclosed on the website of the AMC i.e. www.dspim.com and AMFI, on a monthly basis, for tenures 1 year, 3 year, 5 year, 10 year and since the date of allotment of units.

M. CREATION OF SEGREGATED PORTFOLIO IN CASE OF CREDIT EVENT:

Creation of segregated portfolio shall be subject to guidelines specified by SEBI from time to time and includes the following:

- 1) Segregated portfolio may be created, in case of a credit event at issuer level i.e. downgrade in credit rating by a SEBI registered Credit Rating Agency (CRA), as under:
 - a) Downgrade of a debt or money market instrument to 'below investment grade', or
 - b) Subsequent downgrades of the said instruments from 'below investment grade', or
 - c) Similar such downgrades of a loan rating
- 2) In case of difference in rating by multiple CRAs, the most conservative rating shall be considered. Creation of segregated portfolio shall be based on issuer level credit events as mentioned above and implemented at the ISIN level.
- 3) Creation of segregated portfolio is optional and is at the discretion of the AMC. It shall be created only if the Scheme Information Document (SID) of the scheme has provisions for segregated portfolio with adequate disclosures.

Process for Creation of Segregated Portfolio:

- 1) On the date of credit event, AMC should decide on creation of segregated portfolio. Once AMC decides to segregate portfolio, it should:
 - a) seek approval of trustees prior to creation of the segregated portfolio.
 - b) immediately issue a press release disclosing its intention to segregate such debt and money market instrument and its impact on the investors. The Fund will also disclose that the segregation shall be subject to Trustee approval. Additionally, the said press release will be prominently disclosed on the website of the AMC.
 - c) ensure that till the time the trustee approval is received, which in no case shall exceed 1 business day from the day of credit event, the subscription and redemption in the scheme will be suspended for processing with respect to creation of units and payment on redemptions.
- 2) Once Trustee approval is received by the AMC:
 - a) Segregated portfolio will be effective from the day of credit event
 - b) AMC shall issue a press release immediately with all relevant information pertaining to the segregated portfolio. The said information will also be submitted to SEBI.
 - c) An e-mail or SMS will be sent to all unit holders of the concerned scheme.
 - d) The NAV of both segregated and main portfolios will be disclosed from the day of the credit event.
 - e) All existing investors in the scheme as on the day of the credit event will be allotted equal number of units in the segregated portfolio as held in the main portfolio.
 - f) No redemption and subscription will be allowed in the segregated portfolio. However, upon recovery of any money from segregated portfolio, it will be immediately distributed to the investors in proportion to their holding in the segregated portfolio.
 - g) AMC should enable listing of units of segregated portfolio on the recognized stock exchange within 10 working days of creation of segregated portfolio and also enable transfer of such units on receipt of transfer requests
 - h) Investors redeeming their units will get redemption proceeds based on the NAV of main portfolio and will continue to hold the units of segregated portfolio.
- 3) If the trustees do not approve the proposal to segregate portfolio, AMC will issue a press release immediately informing investors of the same.
- 4) In case trustees do not approve the proposal of segregated portfolio, subscription and redemption applications will be processed based on the NAV of total portfolio.

Processing of Subscription and Redemption Proceeds:

All subscription and redemption requests for which NAV of the day of credit event or subsequent day is applicable will be processed as under:

- i. Upon trustees' approval to create a segregated portfolio -
 - Investors redeeming their units will get redemption proceeds based on the NAV of main portfolio and will continue to hold the units of segregated portfolio.
 - Investors subscribing to the scheme will be allotted units only in the main portfolio based on its NAV.
- ii. In case trustees do not approve the proposal of segregated portfolio, subscription and redemption applications will be processed based on the NAV of total portfolio.

TER for the Segregated Portfolio

- 1) AMC will not charge investment and advisory fees on the segregated portfolio. However, TER (excluding the investment and advisory fees) can be charged, on a pro-rata basis only upon recovery of the investments in segregated portfolio.
- 2) The TER so levied shall not exceed the simple average of such expenses (excluding the investment and advisory fees) charged on daily basis on the main portfolio (in % terms) during the period for which the segregated portfolio was in existence. In addition to the TER mentioned above, the legal charges related to recovery of the investments of the segregated portfolio may be charged to the segregated portfolio as mentioned below.
- 3) The legal charges related to recovery of the investments of the segregated portfolio may be charged to the segregated portfolio in proportion to the amount of recovery. However, the same shall be within the maximum TER limit as applicable to the main portfolio. The legal charges in excess of the TER limits, if any, shall be borne by the AMC.
- 4) The costs related to segregated portfolio shall in no case be charged to the main portfolio.

Explanations:

- 1) The term 'segregated portfolio' means a portfolio, comprising of debt or money market instrument affected by a credit event that has been segregated in a mutual fund scheme.
- 2) The term 'main portfolio' means the scheme portfolio excluding the segregated portfolio.
- 3) The term 'total portfolio' means the scheme portfolio including the securities affected by the credit event.

Risks associated with segregated portfolio

- 1. Investor holding units of segregated portfolio may not able to liquidate their holding till the time recovery of money from the issuer.
- 2. Security comprises of segregated portfolio may not realise any value.
- Listing of units of segregated portfolio in recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

Disclosure Requirements:

In order to enable the existing as well as the prospective investors to take informed decision, the following shall be adhered to:

- a. A statement of holding indicating the units held by the investors in the segregated portfolio along with the NAV of both segregated portfolio and main portfolio as on the day of the credit event shall be communicated to the investors within 5 working days of creation of the segregated portfolio.
- b. Adequate disclosure of the segregated portfolio shall appear in all scheme related documents, in monthly and half-yearly portfolio disclosures and in the annual report of the Mutual Fund and the Scheme.
- c. The Net Asset Value (NAV) of the segregated portfolio shall be declared on daily basis.

- d. The information regarding number of segregated portfolios created in a scheme shall appear prominently under the name of the scheme at all relevant places such as SID, KIM-cum-Application Form, advertisement, AMC and AMFI websites, etc.
- e. The scheme performance required to be disclosed at various places shall include the impact of creation of segregated portfolio. The scheme performance shall clearly reflect the fall in NAV to the extent of the portfolio segregated due to the credit event and the said fall in NAV along with recovery(ies), if any, shall be disclosed as a footnote to the scheme performance.
- f. The disclosures at paragraph 7(d) and 7(e) above regarding the segregated portfolio shall be carried out for a period of at least 3 years after the investments in segregated portfolio are fully recovered/ written-off.
- g. The investors of the segregated portfolio shall be duly informed of the recovery proceedings of the investments of the segregated portfolio. Status update may be provided to the investors at the time of recovery and also at the time of writing-off of the segregated securities.

Monitoring by Trustees:

- a. In order to ensure timely recovery of investments of the segregated portfolio, trustees shall ensure that:
 - i. The AMC puts in sincere efforts to recover the investments of the segregated portfolio.
 - ii. Upon recovery of money, whether partial or full, it shall be immediately distributed to the investors in proportion to their holding in the segregated portfolio. Any recovery of amount of the security in the segregated portfolio even after the write off shall be distributed to the investors of the segregated portfolio.
 - iii. An Action Taken Report (ATR) on the efforts made by the AMC to recover the investments of the segregated portfolio is placed in every trustee meeting till the investments are fully recovered/ written-off.
 - iv. The trustees shall monitor the compliance of this circular and disclose in the half-yearly trustee reports filed with SEBI, the compliance in respect of every segregated portfolio created.
- b. In order to avoid mis-use of segregated portfolio, trustees shall ensure to have a mechanism in place to negatively impact the performance incentives of Fund Managers, Chief Investment Officers (CIOs), etc. involved in the investment process of securities under the segregated portfolio, mirroring the existing mechanism for performance incentives of the AMC, including claw back of such amount to the segregated portfolio of the scheme.

INTRODUCTION TO EXCHANGE TRADED FUNDS

An ETF is a passively managed product that provides exposure to an index or a basket of securities with the objective of generating returns as close to the index as possible. The key benefit of an ETF

^{*} On the date of credit event i.e. on 31st March 2021, NCD of C Ltd (7.65%) will be segregated as separate portfolio and further it is assumed to be marked down by 25% on the date post segregation, before marking down the security was valued at Rs.98.4570 per unit.

over traditional open-ended index funds is liquidity and availability of real-time market price on stock exchange. They can be bought and sold on the exchange at prices that are usually close to the actual intra-day NAV of the Scheme. ETFs provide investors a fund that closely tracks the performance of an index with the ability to buy/sell on an intra-day basis. ETFs are structured in a manner which allows creating new units (called creation units) and redeem outstanding units directly with the fund, thereby ensuring that ETFs trade close to their actual NAVs.

ETFs are usually passively managed funds wherein subscription/redemption of units works on the concept of exchange with underlying securities. In other words, large investors/institutions can purchase units by depositing the underlying securities with the mutual fund/AMC and can redeem by receiving the underlying shares in exchange of units. Units can also be bought and sold directly on the exchange. ETFs have all the benefits of indexing such as diversification, low cost and transparency. As ETFs are listed on the exchange, costs of distribution are much lower and the reach is wider. These savings in cost are passed on to the investors in the form of lower costs. Furthermore, exchange traded mechanism helps reduce minimal collection, disbursement and other processing charges.

Tracking Error of ETFs is likely to be low as compared to a normal index fund. Due to the Creation/Redemption of units through the in-kind mechanism the mutual fund can keep lesserfunds in cash. Also, time lag between buying/selling units and the underlying shares is much lower.

Benefits of ETFs

- a. Can be easily bought / sold like any other stock on the exchange through terminals spread across the country.
- b. Can be bought / sold anytime during market hours at prices that are expected to be close to actual NAV of the Scheme. Thus, investor invests at nearly the real-time prices as opposed to end of day prices.
- c. Ability to put limit orders.
- d. Protects long-term investors from the inflows and outflows of short-term investors. This is because the fund does not bear extra transaction cost when buying/selling due to frequent subscriptions and redemptions.
- e. Flexible as it can be used as a tool for gaining instant exposure to the equity markets, equitising cash, for arbitraging between the cash and futures market.

Market for ETFs:

The assets-under-management for ETFs which was approx. Rs 3,800 crores as of September 2010 has grown to nearly Rs. 465,997 crores in August 2022. The primary categories of ETFs in India are: Nifty 50 and Sensex based ETFs. Government Disinvestment mandates like CPSE, Bharat 22 and Bharat Bond, Banking Sector ETFs, and Gold. There are also few fixed income, smart beta, sectoral and thematic ETFs, tracking specified indices. Given the ETF market globally has grown significantly over the past few years, there is a strong case that the size and breadth of the ETF market has a potential go up in India in years to come.

Settlement of Purchase/Sale of Units of the Scheme on Stock Exchange:

Buying/Selling of Units of the Scheme on Stock Exchange is just like buying/selling any other normal listed security. If an investor has bought Units, an investor has to pay the purchase amount to the broker/sub-broker such that the amount paid is realised before the funds pay-in day of the settlement cycle on the Stock Exchange(s). If an investor has sold Units, an investor has to deliver the Units to the broker/sub-broker before the securities payin day of the settlement cycle on the Stock Exchange(s). The Units (in the case of Units bought) and the funds (in the case of Units sold) are paid out to the broker on the pay-out day of the settlement cycle on the Stock Exchange(s). The Stock Exchange(s) regulations stipulate that the trading member should pay the money or Units to the investor within 24 hours of the pay-out.

If an investor has bought Units, he should give standing instructions for "Delivery-In" to his /her/its DP for accepting Units in his/her/its beneficiary account. An investor should give the details of his/her

beneficiary account and the DP-ID of his/her/its DP to his/ her/its trading member. The trading member will transfer the Units directly to his/her/ its beneficiary account on receipt of the same from NSE"s/ BSE"s Clearing Corporation. An investor who has sold Units should instruct his/her/its Depository Participant (DP) to give "Delivery Out" instructions to transfer the Units from his/her/its beneficiary account to the Pool Account of his/her/its trading member through whom he/she/it have sold the Units. The details of the Pool A/C (CM-BP-ID) of his/her trading member to which the Units are to be transferred, Unit quantity etc. should be mentioned in the Delivery Out instructions given by him/her to the DP. The instructions should be given well before the prescribed securities pay-in day. SEBI has advised that the Delivery Out instructions should be given at least 24 hours prior to the cut-off time for the prescribed securities pay-in to avoid any rejection of instructions due to data entry errors, network problems, etc.

Rolling Settlement

As per the SEBI's circular dated March 4, 2003, the rolling settlement on T+2 basis for all trades has commenced from April 1, 2003 onwards. The Pay-in and Pay-out of funds and the Units will take place within 2 working days after the trading date. The Points of Service ("POS") of MFUI with effect from the respective dates as published on MFUI website i.e. www.mfuindia.com against the POS locations will be considered as Official Point of

Acceptance/ Investor Services Centre where application for financial transactions in schemes of the Fund will be accepted on an ongoing basis. Further, investors can also submit their non-financial transaction requests at the POS.

The salient features of the facility to transact in units of the Schemes through MFU are given below:

 Common Account Number ("CAN"): Investors are required to submit duly filled in CAN Registration Form ("CRF") and prescribed documents at the MFUI POS to obtain CAN. The CRF can be downloaded from MFUI website i.e. www.mfuindia.com or can be obtained from MFUI POS.

CAN is a single reference number for all investments in the Mutual Fund industry, for transacting in multiple schemes of various Mutual Funds through MFU and to map existing investments, if any.

MFU will map the existing folios of investors in various schemes of Mutual Funds to the CAN to enable transacting across schemes of Mutual Funds through MFU. The AMC and / or its Registrar and Transfer Agent (RTA) shall provide necessary details to MFUI as may be needed for providing the required services to investors / distributors through MFU.

CAN registered investors can transact in physical mode through MFUI POS by submitting relevant Common Transaction Form prescribed by MFUI.

- 2. CAN registered investors can transact through electronic mode through MFU portal i.e. www.mfuonline.com and when such a facility is made available to them by MFUI. The time of transaction submission done through MFU portal i.e. www.mfuonline.com and the successful receipt of the same in the servers of MFUI would be the time-stamp for the transaction.
- 3. Investors not registered with MFUI can also submit their financial & non-financial transactions request at MFUI POS by giving reference of their existing folio number allotted by the Fund.
- 4. The transactions on the MFU portal shall be subject to the terms & conditions as may be stipulated by MFUI / Mutual Fund / the AMC from time to time.

All other terms and conditions of offering of the Scheme as specified in the SID, KIM and SAI shall be applicable to transaction through MFUI

Delay in payment of redemption / repurchase proceeds

As per SEBI (MF) Regulations, the Mutual Fund shall despatch the redemption proceeds within 10 Business Days from the date of acceptance of redemption request. In the event of delay/failure to despatch the redemption/repurchase proceeds within the aforesaid 10 Business Days, the AMC will be liable to pay interest to the Unit Holders at such rate as may be specified by SEBI for the period of such delay (currently @ 15% per annum).

Unclaimed Redemptions and IDCW

As per circular no. MFD / CIR / 9 / 120 / 2000, dated November 24, 2000 issued by SEBI, the unclaimed Redemption and IDCW amounts shall be deployed by the Fund in money market instruments. Further, according to circular no. SEBI/HO/IMD/DF2/CIR/P/ 2016/37 dated February 25, 2016 the unclaimed Redemption and IDCW amounts may be deployed in separate plan of Liquid scheme/Money market mutual fund scheme floated by Mutual Funds specifically for deployment of the unclaimed Redemption and IDCW amounts.

The investment management fee charged by the AMC for managing such unclaimed amounts shall not exceed 50 basis points. The circular also specifies that investors who claim these amounts during a period of three years from the due date shall be paid at the prevailing NAV. Thus, after a period of three years, this amount can be transferred to a pool account and the investors can claim the said amounts at the NAV prevailing at the end of the third year. In terms of the circular, the onus is on the AMC to make a continuous effort to remind investors through letters to take their unclaimed

amounts. The details of such unclaimed amounts shall be disclosed in the annual report sent to the Unit Holders.

In accordance with SEBI circular number CIR/IMD/DF/10/2010 dated August 18, 2010, units of all DSP Nifty 50 Equal Weight ETF which that are held in demat form, will be transferable and will be subject to the transmission facility in accordance with the provisions of SEBI (Depositories and Participants) Regulations, 2018 as may be amended from time to time.

If a person becomes a holder of the Units consequent to operation of law, or upon enforcement of a pledge, the transfer may be effected in accordance with the provisions of SEBI (Depositories and Participants) Regulations, 2018, provided the transferee is otherwise eligible to hold the Units.

Pledge of Units For Loans

Units held in demat form can be pledged by completing the requisite forms/formalities as may be required by the Depository. The pledge gets created in favour of the pledgee only when the pledgee's DP confirms the creation of pledge in the system.

Account Statements

Under Regulation 36(4) of SEBI (Mutual Funds) Regulations, 1996, the AMC/ RTA is required to send consolidated account statement for each calendar month to all the investors in whose folio transaction has taken place during the month. Further, SEBI vide its circular ref. no. CIR/MRD/DP/31/2014 dated November 12, 2014, in order to enable a single consolidated view of all the investments of an investor in Mutual Fund and securities held in demat form with Depositories, has required Depositories to generate and dispatch a single consolidated account statement for investors having mutual fund investments and holding demat accounts.

In view of the said requirements the account statements for transactions in units of the Fund by investors will be dispatched to investors in following manner for the Investors with Demat Account

- Consolidated account statement[^], based on PAN of the holders, shall be sent by Depositories to investors holding demat account, for each calendar month within 15th day of the succeeding month to the investors in whose folios transactions have taken place during that month.
- Consolidated account statement shall be sent by Depositories every half yearly (September/March), on or before 21st day of succeeding month, detailing holding at the end of the six month, to all such investors in whose folios and demat accounts there have been no transactions during that period.
- In case of demat accounts with nil balance and no transactions in securities and in mutual fund folios, the depository shall send account statement in terms of regulations applicable to the depositories.

Following provisions shall be applicable to CAS sent through AMC/ RTA and CAS sent through depositories:

a. In the event the folio/demat account has more than one registered holder, the first named Unit holder/Account holder shall receive the CAS (AMC/RTA or Depository). For the purpose of CAS (AMC/RTA or Depository), common investors across mutual funds/depositories shall be identified

on the basis of PAN. Consolidation shall be based on the common sequence/ orders of investors in various folios/demat accounts across mutual funds / demat accounts across depository participants.

For Unit Holders who have provided an e-mail address in KYC records, the CAS will be sent by e-mail.

Bank Account Details / Multiple Bank Account Registration

It is mandatory for all investors to provide their bank mandate which will be used for payment of redemption/IDCW payout. Applications without the mandatory bank details and supporting documents are liable to be rejected. Investors should ideally mention account details of the same bank account from where the payment towards purchase is made. If the bank account details mentioned are different from purchase pay-in bank, investors should attach a cancelled cheque off the said account with name and account number pre-printed. Should the investor fail to provide the documents, the Fund/AMC/RTA reserve the right to register the pay-in bank details as the redemption bank details and use such bank account for payment of any redemption/IDCW proceeds.

The Mutual Fund offers its Unit holders, facility to register multiple bank accounts for pay-in & payout purposes and designate one of the registered bank account as "Default Bank Account". This facility can be availed by using a designated "Bank Accounts Registration Form. In case of new investors, the bank account mentioned on the purchase application form used for opening the folio will be treated as default bank account till a separate request to register multiple bank accounts and change the default bank account to any of other registered bank account is submitted by such investor. Registered bank accounts may also be used for verification of payins (i.e. receiving of subscription funds) to ensure that a third party payment is not used for mutual fund subscription.

Change of Bank

For investors holding Units in demat mode, the procedure for change in bank details would be as per the instructions given by their respective Depository Participant(s).

New bank accounts can only be registered using the designated "Bank Accounts Registration Form" /'Change of Bank Form'. If Unit holder(s) provide a new and unregistered bank mandate or a change of bank mandate request with specific redemption/ IDCW payment request (with or without necessary supporting documents), such bank account will not be considered for payment of redemption/ IDCW proceeds, or the Mutual Fund withhold the payment for upto 10 calendar days to ensure validation of new bank mandate mentioned. Change of bank mandate would not be processed based on the request submitted along with the redemption request and the investor will have to submit a fresh request for change of bank mandate with supporting documents. Any request without the necessary documents will be treated invalid and will not be acted upon and any financial transaction, including redemptions, will be processed with the existing registered details only. Valid change of bank mandate requests with supporting documents will be processed within ten days of documents reaching the head office of the Registrar and any financial transaction request received in the interim will be carried based on the previously registered details.

Process for change of address

As units would be in demat mode, the procedure for change in address would be as determined by the depository participant.
