<p>Investment Strategy</p>	<p>Strategy for Equity Securities</p> <p>The Investment Manager prefers adopting a top-down approach with regard to investment in equity and equity related securities. This approach encompasses an evaluation of key economic trends and a diligent study of various investment opportunities within the specified sectors in each Scheme. In picking out individual investment opportunities for the portfolio, the Investment Manager will seek both value and growth. Value is discerned when the Investment Manager believes that the inherent worth or long-term growth potential of a company is not fully reflected in the share price of the company. Growth stocks, as the term suggests, are those stocks that are currently in the growth phase. Such growth in earnings could be due to a new product, a new process, growing market share, stronger brand equity, technological breakthrough and unique or predominant position in a market, among other factors.</p>

	<p>The Investment Manager will conduct in-house research in order to identify value and growth stocks. The analysis will focus, among other things, on the historical and current financial condition of the company, capital structure, business prospects, strength of management, responsiveness to business conditions, product profile, brand equity, market share, competitive edge, research and technological know-how and transparency in corporate governance. The quality or strength of management would be a key focus area.</p> <p>Strategy for Fixed Income Securities</p> <p>Fixed Income research by the Investment Manager will emphasise credit analysis, in order to determine credit risk. Credit analysis will focus on the issuer’s historical and current financial condition, current and anticipated cash flow and borrowing requirements, value of assets in relation to historical cost, strength of management, responsiveness to business conditions, credit standing, future business prospects as well as current and anticipated operating results, among other things. The Investment Manager will also analyse various economic trends in seeking to determine the likely future course of interest rates. The Investment Manager will invest only in those debt securities that are rated investment grade by a domestic credit rating agency such as CRISIL, ICRA, CARE etc. or in unrated debt securities, which the Investment Manager believes to be of equivalent quality. Where investment in unrated debt securities is sought to be made, specific approval of the Committee/Board of Directors of the AMC and the Trustee shall be obtained prior to investment.</p> <p>Representative Index</p> <p>DSP Healthcare Fund, a sector specific Scheme, shall focus on investing in pharmaceutical, healthcare and associated companies as mentioned earlier, keeping ‘S&P BSE Healthcare Index TRI’ (the Index) as the representative index. The Scheme shall have the flexibility to invest in stocks that are outside the composition of the Index but are within the investment focus of the Scheme. The Scheme may broadly follow the composition of the Index without necessarily tracking it. In accordance with SEBI Circular MF/CIR/09/014/2000 dated January 05, 2000, the Scheme being a sector specific Scheme, the upper ceiling on equity investments in a company by the Scheme shall be the weightage of the company in the representative sectoral index i.e., the Index as disclosed above or 10% of the NAV of the Scheme, whichever is higher.</p> <p>The Trustees reserves the right to change the Index, if any other appropriate/suitable index is available at a future date, in accordance with SEBI (MF) Regulations.</p> <p>For detailed investment strategy refer SID.</p>
<p>Risk Profile</p>	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment.	
Risk	Risk mitigants / management strategy
Market Liquidity Risk	The liquidity risk will be managed and/or sought to be addressed by creating a portfolio which has adequate access to liquidity. The Investment Manager will select securities, which have or are expected to have good secondary market liquidity. There is good secondary market liquidity in large cap stocks. Market Liquidity Risk will be managed actively within the portfolio liquidity limits. The first access to liquidity is through cash and fixed income securities.
Credit Risk	Credit Risk associated with Fixed Income securities will be managed by making investments in securities issued by borrowers, which have a very good credit profile. Limits are assigned for each of the issuers (other than government of India); these limits are for the amount as well as maximum permissible tenor for each issuer. The credit process ensures that issuer level review is done at inception as well as periodically by taking into consideration the balance sheet and operating strength of the issuer.
Term Structure of Interest Rates (TSIR) Risk	The Investment Manager will endeavour to actively manage the duration based on the ensuing market conditions. As the fixed income investments of the Scheme are generally short duration in nature, the risk can be expected to be small.
Rating Migration Risk	The endeavour is to invest in high grade/quality securities. The due diligence performed before assigning credit limits should mitigate company-specific issues. The limits are monitored after they have been assigned, on an ongoing basis.
Re-investment Risk	Re-investment Risk is prevalent for fixed income securities, but as the fixed income investments of the Scheme are generally short duration in nature, the impact can be expected to be small.
Market related to equity and equity related securities	The Investment Manager endeavours to invest in companies, where adequate due diligence and research has been performed by the Investment Manager. As not all these companies are very well researched by third-party research companies, the Investment Manager also relies on its own research. This involves one-to-one meetings with the management of companies, attending conferences and analyst meets and also tele-conferences. The company-wise analysis will focus, amongst others, on the historical and current financial condition of the company, potential value creation/unlocking of value and its impact on earnings growth, capital structure, business prospects, policy environment, strength of management, responsiveness to business conditions, product profile, brand equity, market share, competitive edge, research, technological know-how and transparency in corporate governance.
Risk associated with floating rate securities	There is very low liquidity in floating rate securities, resulting in lack of price discovery. Hence, incremental investments in floating rate securities are going to be very limited.

Pharmaceutical and Healthcare Sector Concentration Risk	The Scheme has primary investment objective to invest in Pharmaceutical and Healthcare sectors. Being a sector fund, it will have higher risk as compared to a diversified equity fund. The Investment Manager will endeavour due diligence in the stock selection. The investors are informed that a pure sector fund will have high volatility. This risk cannot be defeased and is the primary feature of the Scheme.
Risks associated with Pharmaceutical and Healthcare Companies	The Investment Manager will focus on companies with strong managements, responsiveness to business conditions, product profile, brand equity, market share, competitive edge, research, technological know-how and transparency in corporate governance besides financial condition of the company, potential value creation/unlocking of value and its impact on earnings growth, capital structure, business prospects and policy environment. The Investment Manager believes the good managements create good and sustainable companies and hence management quality will be a key differentiator.
Risk associated with favourable taxation of equity-oriented Scheme	This risk is mitigated as there is a regular monitoring of equity exposure of each of the equity oriented Scheme of the Fund.
Risk associated with Stock Lending	At present, there is no significant activity in the Securities Borrowing and Lending market. The Mutual Fund has so far not participated in Securities Lending market. However, we understand the risks associated with the securities lending business and the AMC will have appropriate controls (including limits) before initiating any such transactions.
Risk associated with investments in repo of corporate debt securities	<p>The Investment Manager will endeavour to manage counterparty risk in corporate debt repos by dealing only with counterparties having strong credit profiles. These could include SEBI regulated mutual funds, RBI regulated Banks, Non-Banking Finance Companies, Primary Dealers and IRDA regulated Insurance companies. Corporates for whom credit limits have been assigned are eligible counterparties. These corporates should have a minimum investment grade credit rating. For new counterparties, approval from Head - Risk will be taken and an assessment will be done by the Risk & Quantitative Analysis team.</p> <p>The collateral risk is mitigated by restricting participation in repo transactions only in AA and above rated money market and corporate debt securities, where potential for downgrade/ default is low. In addition, appropriate haircuts are applied on the market value of the underlying securities to adjust for the illiquidity and interest rate risk on the underlying instrument.</p>
Risk associated with trading in derivatives	The Scheme can use equity derivatives, both for directional (including equitisation of cash) and yield enhancement strategies. The credit risk associated with equity derivatives is defeased as only exchange traded equity derivatives are permitted. On the performance, portfolio and regulatory limits, there is an established daily monitoring process. As limits could be breached because of changes in the open interest, which is a function of market-wide activity and not specific to the Scheme and are not in control, there are hard and soft limits. Any breach beyond the soft limit is

		<p>immediately rectified and brought within the specified limit.</p> <p>The guidelines issued by SEBI / RBI from time to time for forward rate agreements and interest rate swaps and other derivative products would be adhered to.</p>																																				
	Risks Associated With Overseas Investments	The portfolio is predominantly in INR denominated securities. Should there be investments in ADRs/GDRs of Indian companies or foreign securities, the investment process of the fund manager will ensure that a comprehensive company specific due diligence is performed.																																				
	Risks associated with investments in REITs and InvITs	The Investment Manager endeavours to invest in REITs/InvITs, where adequate due diligence and research has been performed by the Investment Manager. The Investment Manager also relies on its own research as well as third party research. This involves one-to-one meetings with the managements, attending conferences and analyst meets and also tele-conferences. The analysis will focus, amongst others, on the predictability and strength of cash flows, value of assets, capital structure, business prospects, policy environment, strength of management, responsiveness to business conditions, etc.
